

Sai Avinash Polina

Business Data Analyst

Fairfax, VA | 571-536-0164 | saiavinashpolina@gmail.com | [LinkedIn](#)

SUMMARY

3+ Years of Experience as a Business Data Analyst with expertise in Python (pandas, NumPy), SQL, and R-based modeling to deliver insights and improve outcomes. Skilled in Tableau, Power BI, and Google Data Studio for dashboards, with experience in ETL pipelines (Airflow, Snowflake, Redshift, BigQuery) managing 5TB+ data. Strong in data modeling, workflow automation, and Agile/Scrum delivery to support multimillion-dollar business strategies.

EDUCATION

Master of Science in Data Analytics Engineering | George Mason University, Fairfax, VA | GPA: 3.97 | **May 2025**

Bachelors in Electrical and Electronics Engineering | VNRVJIET, India | GPA: 8.3 | **Jun 2019 – Jun 2023**

TECHNICAL SKILLS

Programming & Analysis: SQL (PostgreSQL, MySQL, BigQuery, Oracle OTBI), Python (pandas, NumPy), R (statistical analysis), A/B Testing, Hypothesis Testing, Regression, Time Series Forecasting, Predictive Modeling.

BI & Visualization: Tableau, Power BI, Looker, Google Data Studio, Dashboard Development, KPI Tracking, Data Storytelling

Data Modeling & Warehousing: Snowflake, Redshift, BigQuery, Apache Airflow, ETL Development, Data Modeling (Star Schema, Snowflake Schema), Data Governance (Data Quality, Metadata, Lineage)

Cloud Platforms: AWS (S3, Redshift, Athena), Google Cloud (BigQuery, Data Studio), Microsoft Azure (Synapse Analytics), Oracle Cloud ERP/EPM

Productivity & Collaboration: Advanced Excel (Pivot Tables, VLOOKUP, Financial Modeling), SharePoint, Microsoft Office Suite, Jira, Confluence, Agile/Scrum, Stakeholder Management, Requirements Gathering, Cross-Functional Collaboration, Technical Presentations

Emerging Technologies: Predictive Analytics, Large Language Models (ChatGPT), Prompt Engineering, Data Automation

PROFESSIONAL EXPERIENCE

Business Data Analyst | Capital One Financial, VA | Jan 2025 – Present

- Wrote and tuned SQL queries across PostgreSQL and MySQL, which sped up monthly reconciliations and cut manual work by about a quarter, while keeping 200K+ records accurate.
- Built Python workflows for loan portfolio data that helped identify delinquency patterns and supported recovery strategies that improved outcomes by 8%.
- Helped monitor Airflow pipelines and ran ad-hoc queries in AWS Athena/S3, which supported fraud detection for compliance teams.
- Designed interactive Power BI dashboards with live feeds from Google Data Studio, giving leaders real-time branch performance views.
- Built Redshift star-schema models for financial KPIs, making monthly board reporting quicker and easier.
- Streamlined KPI dashboards in Tableau and Power BI (NPL ratio, ROI, churn), freeing up 15+ hours per month of manual reporting for executives.
- Set up ETL jobs in Airflow and Snowflake that cut query wait times by 40%, making risk analytics faster and more reliable.

Data Analyst | Mphasis, India | Aug 2021 – Jul 2023

- Cleaned and transformed datasets with SQL and Python, improving accuracy and saving 25% of manual prep time.
- Used A/B testing and regression analysis in R/Python to uncover insights that drove 12% growth in product adoption in the first quarter.
- Built KPI dashboards in Tableau and Power BI for hospitals, helping stakeholders make decisions 15% faster.
- Designed star and snowflake schemas for the enterprise data warehouse, which sped up reporting queries by 30%.
- Handled big datasets (5M+ rows) in AWS S3/Athena and BigQuery, optimizing them for faster analytics.
- Automated SharePoint updates with Power Automate, improving team collaboration by 18%.
- Worked with stakeholders on requirements and added governance checks, reducing rework by 15% and ensuring compliance during audits.
