

Sai Bhargav Podili

San Jose, California | 669-325-7752 | bhargav3521@gmail.com | [LinkedIn](#)

SUMMARY

- Data Scientist with 5+ years of experience driving **product and marketing strategies** through advanced experimentation and data storytelling, with a proven record of shaping **conversion, retention, and product roadmaps**.
- Skilled in **AI/ML, LLMs, and Generative AI**, with hands-on expertise in Python, R, SQL, PyTorch, TensorFlow, and modern ML frameworks; proficient in building **distributed data pipelines (Spark, BigQuery, Airflow, Kafka)** processing millions of events to deliver scalable business impact.

EXPERIENCE

AI Engineer Intern | *Saras Analytics, San Jose, CA*

June 2025 - Present

- Designed and deployed an **AI-powered RAG agent** that integrated internal knowledge sources with LLMs, automating insights retrieval for client-facing teams and reducing manual analysis time by **30%**.
- Developed **advanced analytics solutions** (Customer 360, cohort/RFM analysis, revenue concentration studies) to uncover retention drivers, improve upsell/cross-sell performance, and guide targeted marketing campaigns.

Data Scientist | *Saras Analytics, Hyderabad, India*

Nov 2020 - Dec 2023

- **Led website and product optimization initiatives** by designing and executing large-scale A/B tests (navigation flows, content personalization, checkout funnel), achieving a **20% uplift in conversion rates**.
- Built **scalable data pipelines** processing millions of events daily, and enhanced **marketing attribution models**, increasing accuracy, boosting ROI by **10%**; integrated customer feedback into models to drive **CSAT** and **15% churn reduction**.

Senior Data Analyst | *Toppr, Mumbai, India*

May 2020 - Nov 2020

- Partnered directly with the Founder's office to provide **data-driven insights** during investor due diligence, influencing multi-million-dollar strategic transactions.
- Built and maintained **SQL-driven pipelines and Power BI dashboards** monitoring real-time customer segmentation and website activity, improving **lead conversion by 15%**.

Data Analyst | *Accordion, Hyderabad, India*

Dec 2018 - May 2020

- Built a **centralized data warehouse and automated ETL pipelines**, reducing manual reporting effort and enabling real-time monitoring of key business KPIs.
- Developed interactive **dashboards and profitability models** (AOV, LTV, acquisition costs, margins) that provided executives with clear visibility into business health.
- Conducted **customer segmentation and cross-sell analysis**, uncovering high-value groups and driving targeted strategies that increased AOV by **5%**.

PROJECTS

Generative AI in Healthcare

Aug 2025 – Dec 2025

- Developing AI agent-based healthcare system to automate clinical workflows and improve patient communication, leveraging **LLMs, RAG, medical transcription, documentation, and symptom tracking agents**.

AI Agents and Multimodal RAG Systems

Jan 2024 – May 2024

- Built **agentic frameworks** including a travel planner (flights, hotels, weather, activities) and an employee leave management system using **MCP protocol and Claude** with external database integration for real-time tracking.
- Developed a **multimodal RAG pipeline** combining CLIP embeddings and LLMs to extract, index, and answer questions over PDFs with both text and images.

Real-Time Stock Price Prediction and Analysis | [Github](#)

Aug 2024 – Dec 2024

- Developed a scalable stock price prediction platform integrating **LSTM** for time-series analysis, **Apache Kafka** for real-time data streaming, and **InfluxDB** for efficient time-series storage and **Grafana** for visualization.

SKILLS

- **Programming & Data Engineering:** Python, R, Advanced SQL, PySpark, JavaScript, React, Airflow, Spark, Hadoop, Kafka, BigQuery, AWS, Azure
- **Experimentation & Analytics:** A/B Testing, Causal Inference, Experimentation Frameworks, Marketing Attribution, Mixpanel, Amplitude, Google/Adobe Analytics
- **Machine Learning & AI:** Scikit-Learn, XGBoost, Random Forest, Decision Trees, Logistic/Linear Regression, Clustering (K-Means), PCA, LLMs, RAG, Deep Learning (CNNs, RNNs, GANs), PyTorch, TensorFlow
- **Visualization & Storytelling:** Tableau, Power BI, Looker, Grafana, Matplotlib, Seaborn, Plotly, ggplot2

EDUCATION

San Jose State University

Jan 2024 – Dec 2025

Master of Science in Data Science (GPA: 4.0)

Indian Institute of Technology, IIT Kanpur

June 2014 – May 2018

Bachelor of Technology in Computer Engineering
