

PROFESSIONAL SUMMARY

Continuous Improvement and Data Engineering professional with proven success in automating **Salesforce workflows**, designing scalable **ETL pipelines**, and delivering cloud-based analytics solutions. Skilled in **Python, SQL, AWS (EC2, S3, Glue, Redshift, EMR, Athena), Apache Spark, Tableau**, and Salesforce Platform, with expertise in CI/CD automation, data pipeline optimization, and AI-driven analytics. Experienced in **Salesforce CRM customization (Apex, LWC, Visualforce, CPQ), cloud deployment**, and **large-scale data integration**. Enjoys connecting the dots across complex datasets to turn raw information into meaningful insights that empower strategic business decisions. Recognized for **reducing manual processes by 40%, improving release efficiency by 30%**, and accelerating insight generation through data automation and cloud innovation.

CORE COMPETENCIES

- **Salesforce CRM:** Apex, Visualforce, Lightning Web Components (LWC), CPQ, Workflow Automation, Custom Component Development
- **Cloud & Data Engineering:** AWS (EC2, S3, Glue, Redshift, EMR, Athena), SQL, Python, Apache Spark, Kafka, Hadoop, ETL Pipeline Design & Optimization
- **Analytics & Business Intelligence:** Tableau, Power BI, Matplotlib, KPI Dashboarding, Data Modeling
- **Programming & Software Development:** Python, Java, C, Flask, HTML, Object-Oriented Design, API Development
- **Agile & DevOps Practices:** JIRA, Git, CI/CD Pipelines, Release Management, Automation Testing
- **Leadership & Collaboration:** Agile Team Coordination, Project Execution, Technical Mentorship, Knowledge sharing, Stakeholder Communication

CERTIFICATIONS

- Microsoft Power BI Data Analyst Associate
- Salesforce Certified Administrator
- Salesforce Platform Developer I
- Salesforce AI Associate

PROFESSIONAL EXPERIENCE

Custom Software Engineering Analyst- Accenture Solutions Pvt Ltd. India

Dec 2022 - Jul 2023

- **Salesforce Automation:**
 - Automated **Salesforce deployment pipelines** using **Salesforce DX** and **Git**, reducing deployment time and post-release errors by **30%** through optimized **CI/CD workflows**.
 - Developed **Apex classes, triggers, and Lightning components** to enhance **Sales Cloud automation** and improve overall system performance.
 - Built **REST API integrations** and backend automation solutions, streamlining **commercial quote generation** and improving **data consistency** while reducing cycle time by **30%**.
- **ETL and Data Pipelines:**
 - Designed and maintained **ETL pipelines** using **Python** and **SQL** to process large-scale datasets, reducing manual handling by **40%** and accelerating **data ingestion for analytics**.
- **Testing and Quality Assurance:**
 - Implemented **AI-based test automation** using **AccelQ**, increasing regression coverage by **30%** and improving software reliability through early defect detection.
 - Developed **automated data validation scripts** to monitor Salesforce and ETL pipeline data integrity, reducing manual error checks by **35%**.
 - Validated **Salesforce Sales Cloud** and **Apttus CPQ** workflows through automated test suites, ensuring **pricing accuracy** and **approval consistency** across releases.
- **Collaboration and Leadership:**
 - Optimized **code integration** and **version control** using **Git** and **CI/CD best practices**, ensuring consistent and error-free and efficient release management.
 - Mentored junior developers on **Salesforce development** and **CI/CD workflows**, improving team productivity.
 - Championed workflow optimization and led knowledge-sharing sessions, fostering a culture of continuous learning and collaboration across teams.
- Developed real-time **Tableau dashboards** by integrating **Salesforce CRM data**, enabling leadership to make data-driven business decisions faster.

- Developed **Salesforce custom components** (Apex, Visualforce, Lightning Web Components) to enhance platform functionality and improve user experience.
- Automated key **business workflows** using **Salesforce Flow** and **Process Builder**, reducing manual effort by **40%** and improving process reliability.
- Extracted, transformed, and validated **CRM datasets** with **SQL** and **Python**, enabling advanced analytics and predictive reporting.
- Collaborated with **QA** and **DevOps** teams during **Agile sprints** to streamline testing and deployment, improving release stability and efficiency.

PROJECTS

Movie Ticket Booking System

- Designed and developed a full-stack online movie ticket booking application enabling secure ticket reservations, real-time seat tracking, and digital ticket generation.
- Built responsive frontend using **Angular** and robust backend with **Java & Spring Boot (MVC)**, implementing **RESTful APIs** for seamless frontend-backend communication and ensuring scalability, and fast response times.
- Integrated **OMDB API** to fetch real-time movie details, posters, ratings, and release information.
- Designed and optimized **MySQL database schemas** for movies, theatres, payments, and users, improving query efficiency and data retrieval by **35%**, with indexing and normalization strategies.
- Implemented **role-based authentication** for customers and admins with **encrypted credentials**, enhancing data security and access control by **40%**, and integrated session management and JWT-based authorization.
- Integrated **dynamic pricing algorithms**, **payment processing workflows**, and real-time booking updates via scheduled Spring Boot services, reducing booking time by **25%**, improving operational reliability by **20%**, and increasing user satisfaction.

E-Commerce Trends & Netflix Global Content Growth Analysis

- Extracted and processed Netflix metadata from 2015-2020 using **SQL queries**, improving **data accuracy by 20%** and enabling high-quality analysis.
- Designed visually interactive Tableau dashboards using **calculated fields**, **parameters**, **filters**, and **custom charts** to enhance data exploration and actionable insights for strategic decision-making.
- Created **Tableau dashboards** visualizing content growth by year, region, genre, with drill-down functionality for deep insights.
- Designed **KPIs tracking content launches**, **viewer ratings**, and **geographic reach**, supporting strategic decisions in content acquisition.
- Optimized **SQL queries and dashboards reducing dashboard load times by 35%** and provided **actionable insights** on emerging markets and content trends to guide strategic decisions.

Content Management System (CMS)

- Engineered **role-based CMS** using **Java**, **Spring Boot**, and **JSP**, supporting multi-tiered user access and permissions.
- Developed **RESTful APIs** and optimized **MySQL schemas**, improving system scalability and speed by **25%**.
- Implemented **secure authentication**, **authorization**, and encrypted password handling, minimizing vulnerabilities.
- Conducted **unit and integration testing** with **JUnit** and deployed on **AWS EC2** with **CloudWatch monitoring**, ensuring system stability and reducing errors by **20%**.
- Managed multiple user roles and maintained detailed **system documentation**, enhancing workflow efficiency and future maintainability.

EDUCATIONAL BACKGROUND

University of Central Missouri | Master of Science in Big Data Analytics and IT
Aug 2023 - May 2025

Warrensburg, MO
Cumulative GPA: **3.50/4.00**

VR Siddhartha Engineering College | Bachelor of Technology
Aug 2017- May 2021

Vijayawada, India
