## EDUCATION

**The University of Texas at Dallas (UTD)**, Dallas, TX

Master of Computer Science

Aug 2023 - May 2025

GPA: 3.96/4.00

**Vellore Institute of Technology (VIT University)**, Vellore, India

Bachelor of Technology in Electronics and Communication Engineering

Jun 2019 - May 2023

GPA: 3.98/4.00

## EXPERIENCE

**Full Stack Developer – Ryder System** || Java, Spring Boot, Angular, Gradle, Oracle SQL

Jul 2025 - Present

- Designed and developed scalable web applications using Spring Boot and Angular, integrating with Oracle databases to enhance shipment data processing for over 500 daily transactions.
- Implemented microservices architecture with automated deployment pipelines in Azure CI/CD, improving delivery efficiency and ensuring high system reliability.
- Collaborated with cross-functional Agile teams to deliver features 1 week ahead of sprint deadlines and leveraged GitHub Copilot for code reviews and introduced improvements that boosted team productivity.

**Computer Science Teaching Assistant – University of Texas at Dallas**

Dec 2024 – Jun 2025

- Assisted Professor Gity Karami in teaching “Web Programming Languages”, mentored 90 students in JavaScript, React.js, Node.js, and PHP, and conducted coding workshops to improve project success rates by 30%.

**Software Developer Intern – Corizo** || Python, TensorFlow, Scikit-learn, JSON, OpenPose

Jan 2023 - Mar 2023

- Built a violence detection model using OpenPose and Bi-LSTM, achieving 81.82% accuracy on the RLVS dataset by analyzing 2D skeletal keypoints from 2,000+ surveillance videos.
- Trained and optimized a deep learning model with 88K parameters in TensorFlow, leveraging Adam optimizer, dropout, and early stopping to improve generalization and prevent overfitting.

**Software Developer Intern – Indian Railways** || Node.js, Express.js, JavaScript, AWS, Git

Apr 2022 - Jul 2022

- Developed a RESTful API with JavaScript, Node.js, and Express.js, incorporating microservices for Product Management, User Authentication, User Feedback and Ratings to enhance user experience.
- Implemented JWT authentication and CORS policy, improving application security and reducing unauthorized access attempts by 50%.
- Documented the API using Swagger 3.0, providing interactive documentation that expedited front-end development.

## PROJECTS

**Food Delivery Application** || Java, Spring Boot, MySQL, Docker

- Created a food delivery application using Java and Spring Boot for the backend, with Docker for containerization, streamlining the process of browsing restaurants and menu items.
- Designed a MySQL relational database schema for restaurant and menu items data, optimizing CRUD operations to enhance data retrieval times by 45% and reduce the error rates by 35%.

**Dynamic Chat Framework** || JavaScript, React.js, MongoDB, RESTful API, Socket.IO, Bcrypt

- Built a scalable real-time chat app with React, Node.js, MongoDB, and Express, enhancing communication.
- Integrated Socket.IO for bidirectional communication, reducing latency by 70% and enabling instant messaging.

**Enterprise Healthcare Database System** || SQL, RDBMS, Git, Oracle

- Optimized a healthcare RDBMS by integrating patient records, medical data, and billing modules, improving data integrity by 30% and query performance by 25% through SQL tuning, views, and 3NF normalization.

**Search Engine for Movie Summaries** || Python, PySpark, Spark SQL, Databricks, Scala, Hadoop

- Engineered a high-performance movie search engine leveraging PySpark, TF-IDF, and cosine similarity on Databricks, optimizing large-scale text retrieval and boosting search relevance for movie summaries.

## TECHNICAL SKILLS

**Programming Languages** – Java, Python, JavaScript, C++, C, SQL, HTML, CSS

**Frameworks** – Angular, Spring Boot, Bootstrap, .NET Core, Tailwind CSS

**Libraries** – NumPy, Pandas, Scikit-learn, Flask, Gson, Keras, TensorFlow, Express.js, JDBC, NLTK, OpenCV

**Tools** – Git, RESTful APIs, Azure, AWS, DevOps, Docker, MySQL, Redux, Node.js, Elastic Cache, Kinesis

## PUBLICATION

- Research and Publication:** Published research paper titled "Angina Pectoris Predicting System using Embedded Systems and Big Data" in the **International Research Journal of Engineering and Technology (IRJET 2023)**. [Link](#)

## CERTIFICATIONS

- AWS Certified Cloud Practitioner** – Issued by Amazon Web Services (AWS), [Verification Link](#)
- System Design Certification** – CodingNinjas, [Link](#)
- Java Certification** – HackerRank, [Link](#)
- AWS Certified Solutions Architect** – Udemy, [Link](#)
