SUMMARY

Experienced Data and Business Intelligence Engineer with 4+ years in designing scalable ETL pipelines, developing cloud-based analytics solutions, and automating data workflows using Python, SQL, AWS, Apache Spark, and Airflow. Expertise in building real-time dashboards with Power BI, Tableau, and QuickSight to enable executive reporting and operational insights. Strong background in supply chain analytics, data modeling, and process automation to drive efficiency and informed decision-making.

SKILLS:

- **Programming Language:** Python, R, SAS, MATLAB.
- **Data Analysis Tools:** NumPy, Pandas, Matplotlib, SciPy, OpenCV, scikit-learn, Snowflake.
- **Database Management:** SQL (MySQL, PostgreSQL, Redshift), NoSQL (MongoDB), Hadoop, Spark, Oracle Database.
- **Visualization Software:** Tableau, Quicksight, Power BI, Looker, Microsoft Excel.
- **Cloud & Tools:** AWS (EC2, S3, RDS), Azure, Google Cloud Platform, Docker, Kubernetes, Ansible, Terraform, Kafka.
- **Data science & Analytics:** Data Analytics, Data Visualization, Data Modeling, Ad Hoc Analysis, Forecasting Models.

EXPERIENCE:

Business Intelligence Engineer – PetSmart Inc., USA

May 2023 - Current

- Led the development of a predictive analytics solution using **Python**, **SQL**, and **Redshift** to optimize inventory across **100,000+ SKUs** and multiple warehouses, reducing stockouts by **15%** and cutting inventory costs by **10%**. Enabled cross-functional teams to leverage insights for demand forecasting and supply chain efficiency.
- Developed **10** self-service dashboards and automated anomaly detection audits in **QuickSight** and **Power BI**, proactively identifying inventory stockout trends and reducing fulfillment defects by **15%**.
- Established and automated scalable processes using **AWS tools** (EC2, S3, RDS) to optimize transportation routes, improving operational efficiency by **15%** and reducing delivery bottlenecks for high-demand regions.
- Leveraged **clustering algorithms** and **regression analysis** to analyze customer purchasing behavior, creating targeted marketing strategies that boosted retention by **12%** in the first quarter of the implementation.
- Partnered with cross-functional teams, including sales and operations, to define and track KPIs (e.g., order accuracy, fulfillment rates). Developed data-driven strategies that improved performance visibility and informed executive decision-making.
- Conducted causal analyses of program launches using **Apache Spark** and communicated actionable recommendations to stakeholders, mitigating risks and aligning objectives with organizational strategy.

Data Engineer – NTT Data Services, India

Jun 2020 - Aug 2022

- Architected data models for e-commerce platforms, enabling real-time analysis of customer delivery metrics using **SQL**, improving predictability of supply chain operations by **12%**.
- Created **15** interactive **Tableau** and **Power BI** dashboards to track customer satisfaction KPIs (e.g., NPS, order accuracy). Provided actionable insights that optimized customer experience strategies and improved SLA adherence by **10%**.
- Facilitated stakeholder workshops to communicate operational trends identified through statistical methods (e.g., t-tests, Chi-squared analysis) and proposed strategies that reduced costs by **10%**.
- Designed **SQL & Python**-based audit pipelines to detect data anomalies and ensure data integrity, reducing processing errors by **18%**. Improved data governance and compliance with internal security policies.
- Established **A/B testing** frameworks to assess the effectiveness of promotional campaigns, providing actionable insights that improved conversion rates and drove a **20%** increase in sales.
- Optimized inventory management processes by implementing **R-based analytics** to forecast motorcycle parts and accessories needs, reducing overstock by **10%** and aligning inventory turnover with customer purchase trends.

EDUCATION:

University Massachusetts, Boston

Aug 2022 - May 2024

Master of Science in Management Information Systems

GPA - 3.60

Sathyabama University, India

Jul 2017 - May 2021

Bachelor of Engineering in Electronics & Communication

GPA - 3.20

CERTIFICATIONS:

- **AWS** – AWS Cloud Practitioner
- **AWS** – Developer Associate
- **Microsoft** – Azure Fundamentals
- **Azure** – Security Engineer Associate
- **Oracle** – Foundations Associate

ACADEMIC PROJECTS:

Question Pair Similarity in Discussion Forum Websites

- Implemented an AI-driven model to detect semantically similar questions using Natural Language Processing (NLP), Python, and Scikit-learn, streamlining discussion thread management.
- Built a complete data preprocessing pipeline including tokenization, vectorization, and similarity computation (e.g., TF-IDF, cosine similarity) to improve classification accuracy.
