 Overland Park, Kansas

Professional Summary

Detail-oriented and deadline-driven Master’s in Computer Science candidate at the University of Central Missouri with a strong foundation in data analysis, data management, and IT systems. Proficient in Python, Java, and SQL with a solid understanding of data structures, algorithms, AWS cloud technologies, and full-stack web applications. Experienced in data cleaning, data validation, statistical analysis, site optimization, and online testing. Skilled in conducting market research and competitor research to identify marketing data trends and inform strategic decision-making. Adept at using Excel and Google Sheets for data analysis and reporting, and exploring applications of generative AI tools such as ChatGPT, Google Gemini, DALL·E, and Midjourney. Seeking opportunities to leverage problem-solving skills in data science, data analysis, software engineering or DevOps, contributing to scalable tech solutions in collaborative and fast-paced environments. Possesses strong communication skills and the ability to function as a subject matter expert. Committed to utilizing data-driven insights to achieve KPIs and optimize performance.

Education

University of Central Missouri <i>Master's, computer Science</i>	Aug 2023 - May 2025
Jawaharlal Nehru Technological University <i>Bachelor's, Computer Science</i>	Aug 2019 - May 2023

Experience

Experion Technologies [Jan 2023 - Jun 2023] [Hyderabad]

Data Analyst Intern

- Built and maintained data pipelines using Python and SQL to extract, clean, and prepare large datasets.
- Analyzed data with Pandas and Scikit-learn to uncover trends and build predictive models.
- Created interactive dashboards in Tableau and Power BI to present insights clearly to stakeholders.
- Performed data validation and cleaning to ensure accuracy and reliability of analysis.
- Collaborated with teams in an Agile environment to gather requirements and deliver data-driven solutions.
- Automated data collection and processing tasks, improving efficiency.
- Used Git and GitHub for version control and collaborative development.
- Documented analysis processes to ensure transparency and reproducibility.

Projects

Loan Eligibility Prediction System – LOANEX

- Built a machine learning model using Logistic Regression to predict loan eligibility with 83% accuracy.
- Conducted data wrangling and preprocessing (handling missing values, label encoding, feature scaling).
- Developed a user-facing web interface using Streamlit for real-time predictions.
- Evaluated model using accuracy, F1 score; benchmarked against Random Forest, SVM, and Decision Trees.
- Applied Agile principles with iterative development, scalability focus, and input validation for production-readiness

Music Instrument Rental Management System

- Built a web-based platform for renting musical instruments with features like inventory tracking, rental history, customer management.
- Worked as the Quality Assurance Engineer, writing test plans, running manual and automated tests, and ensuring overall system reliability.
- Collaborated with a team of 5 to design the database, develop frontend/backend functionality, and deploy the system.
- Helped deliver a fully functional product with user documentation, test reports, and deployment support.

Hotel Management System

- Built a web-based system for managing hotel bookings, room availability, staff, and customer records.
- Designed the backend using MongoDB with collections for rooms, bookings, payments, and user roles.
- Implemented admin features for managing room details, pricing, and staff information.
- Handled customer bookings with check-in/out tracking and integrated payment processing.
- Ensured seamless interaction between different user roles (admin, staff, customer) through a well-organized backend data model

Skills

- **Languages:** Python, C, C++, Java, JavaScript, SQL, HTML
- **Frameworks/Libraries:** Streamlit, Scikit-learn, Pandas, NumPy
- **Databases:** SQL, MongoDB
- **Cloud:** AWS
- **Concepts:** Data Structures, Algorithms, Object-Oriented Programming, Debugging, Agile Methodology, API Integration, Version Control (Git)
- **Data Analysis:** Statistical Analysis, Data Mining, Data Mapping, Data Validation, Data Cleaning, Modeling
- **Tools:** Excel, Google Sheets, Tableau, Power BI Git, GitHub
