EDUCATION

Florida Institute Of Technology

Aug 2023 – May 2025

Masters in Computer Information Systems | GPA: 4.00

Melbourne, Florida

Institute of Aeronautical Engineering

Aug 2018 – Jul 2022

Bachelors in Electronics and Communication Engineering | CGPA: 7.75

Hyderabad, India

WORK EXPERIENCE

Symphony Talent

Jul 2022 – Jul 2023

Associate Software Engineer

Bangalore, India

- Developed and optimized job and candidate search filters using **Angular 13**, **ElasticSearch**, and **MySQL**, improving query performance by **30%** and reducing database load times by **25%**, directly enhancing the responsiveness of the SmashflyX application.
- Collaborated on transitioning the application from monolithic to **Microservices** architecture, leveraging **Java 17** and **JUnit** to ensure **95%** API reliability and achieving a **20%** reduction in system downtime for clients.
- Resolved critical performance bottlenecks by optimizing over ten **Logstash** pipelines and **MySQL** queries, reducing CPU utilization by **40%**, and improving data sync speeds for real-time job filtering.
- Crafted an efficient **Angular Storybook** library dedicated to reusable components while implementing advanced folder filtering properties within **Java** applications; maintained over **90%** code coverage as verified by SonarQube.

Cognizant Technology Services

May 2022 – Jul 2022

Programmer Analyst - Intern

Hyderabad, India

- Built a scalable e-commerce platform clone using the **MERN stack (MongoDB, Express.js, React, Node.js)**, featuring inventory, order, and product management, attracting a **30%** increase in user engagement through flexible discount and coupon functionalities.
- Transformed backend performance by redesigning database schemas and queries in **MongoDB**, achieving a **25%** improvement in data flow and system scalability.
- Collaborated with cross-functional teams to ensure smooth integration of core functionalities, enhancing user satisfaction and reducing system errors by **20%**.

Symphony Talent

Mar 2022 – May 2022

Associate Software Engineer - Intern

Bangalore, India

- Engineered a hybrid office seat booking system using **Spring Boot**, **Angular**, **MySQL**, and **Python** (Slack integration), enabling **90%** effective seat utilization during COVID-19 hybrid work adoption.
- Streamlined seat booking workflows by building a user-friendly web platform and Slack application, reducing booking errors by **25%** and enhancing employee satisfaction.
- Enhanced operational efficiency by creating an intuitive web platform and Slack-based application, reducing seat booking time by **30%** and minimizing errors by **25%**.

Virtusa Consulting Services

Dec 2021 – Mar 2022

Software Engineer - Intern

Remote

- Led a team of six to develop **PhotoFramed**, a social media platform, securing **2nd runner-up out of 42 teams** in Virtusa Neural Hack Season 5 (400K+ participants).
- Implemented features such as user search, private profiles, real-time chat, and interactive posts (likes, shares, comments) using **Java Spring Boot**, **React**, and **MongoDB**, showcasing proficiency in **team leadership**, **full-stack development**, and **scalable system design**.

PROJECT EXPERIENCE

LUCT Application | Java 17(Spring Boot), Angular 16, RestAPIs, MySQL

Aug 2024 – Sep 2024

- Designed a **centralized competitive programming tracking platform** integrating APIs from CodeChef, Codeforces, SPOJ, Interviewbit and LeetCode, reducing progress monitoring effort by **50%** using **Java Spring Boot** and **Angular**.
- Enhanced user engagement with features like **activity heatmap**, **leaderboard**, and **contest tracking**, boosting user retention by **40%** and enabling seamless peer comparisons.
- Optimized system performance through robust backend processing and caching strategies with **MySQL**, ensuring data accuracy and reducing **API latency** by **30%**.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, PHP, C

Frameworks: Angular, Spring Boot, ReactJS, ExpressJS, NodeJS, HTML 5, CSS 3, RESTful APIs

Database and Architecture: MySQL, MongoDB, Data Structures and Algorithms, HLD, LLD.

Developer Tools: VS Code, IntelliJ, Postman, GitHub, Jira.

Other Technologies: AWS (EC2, IAM), Microservices, Docker, Kubernetes, Agile, Scrum
