SUMMARY

Software Engineer with strong foundations in **Java, Python, and JavaScript**, experienced in **API development, SQL databases, and cloud deployment**. Skilled in **data structures, algorithms, debugging, and Agile practices**, with project and internship experience delivering scalable, reliable software.

EDUCATION

Master Of Science - Information Technology and Management
Illinois Institute of Technology

Aug 2023-May 2025
Chicago, IL

Bachelor of Technology- Information Technology
VNR Vignan Jyothi Institute of Engg & Tech.

May 2019 - May 2023
Hyderabad, Telangana, India

SKILLS

Languages: Java, Python, C++, JavaScript, SQL

Web Development: HTML, CSS, React.js

Databases: MySQL, MongoDB

Cloud Services: AWS (S3, EC2)

Version Control: Git

Other: Data Structures & Algorithms, Agile/Scrum, Debugging, Problem-Solving

EXPERIENCE

Media Mint | Intern – Software Development

Aug 2022 - Jul 2023

- Developed and debugged features using **Java and C++**, improving application stability.
- Built and maintained **RESTful APIs** to handle requests and responses.
- Wrote and optimized **SQL queries** for data retrieval and updates.
- Used **Git** for version control and collaborated within Agile teams.
- Assisted in debugging and documenting processes to ensure reliability and maintainability.

PROJECTS

Life of Fashion Webpage (Frontend, HTML/CSS) - Academic Project

- Developed a **hackathon project** showcasing products with responsive design.
- Collaborated with a **team of 4** to deliver a functional demo within 24 hours.
- Focused on **UI/UX design principles** and clean HTML/CSS layout.
- Gained practical experience in **rapid prototyping and teamwork under deadlines**.

Image-Based Search Engine Using Deep Learning

- Designed and implemented a search engine leveraging convolutional neural networks to retrieve similar images from large datasets.
- Utilized TensorFlow and OpenCV for feature extraction and indexing, achieving 85% accuracy.
- Deployed the model on AWS for real-time querying with optimized response times.

Employee Management System (CRUD, RESTful APIs, MySQL)

- Built a web app with APIs for adding, updating, retrieving, and deleting employee records.
- Designed and managed the **MySQL database** and implemented **request validation** and error handling.
- Strengthened understanding of **end-to-end system ownership** in design and deployment.
- Used Postman for API testing and Git for version control.

PUBLICATIONS

- Published research in IJRASET on 'Image-Based Search Engine Using Deep Learning.' ([Link](#))
