

SAI KRISHNA JAJULA

DATA ANALYST

+1 (513) 580-0583 | saikrishnausa224@gmail.com | [Linkedin](#)

SUMMARY

Experienced **Data Analyst** with 6+ years of expertise in **data processing, analysis**, and visualization using **ML, AML, Python, SAS, SSMS, Oracle 11G, SQL, R, Lidar, Radar** sensors, **deep learning** and **AWS** well versed in designing and automating large-scale **ETL** pipelines with **Apache Airflow** and constructing **NoSQL**-based workflows to process over **2TB** of data monthly. Proficient in **Power BI** and **Tableau** for creating interactive dashboards that deliver actionable insights.

TECHNICAL SKILLS

Programming Languages:	Python (Fast API, SQL Alchemy, Pandas, NumPy), R, Bash
Libraries:	NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Seaborn
Databases:	MySQL, SSMS, SSRS, Oracle 11G, PostgreSQL, Oracle, MongoDB, NoSQL, Snowflake
Cloud Platforms:	AWS (EC2, S3, Redshift, Athena, Glue, EMR, Lambda), Azure (Data Factory, Data Lake, Databricks)
Data Visualization:	Tableau, Power BI, Seaborn, MS Excel
Version Control:	Git, GitHub, SVN, Bitbucket
Project Management Tools:	JIRA, IBM UDeploy, Confluence, MS Project, SharePoint, Google Suite, Jupyter Notebook, Hadoop, Hive and Spark
Methodologies:	Agile (Scrum), Waterfall

WORK EXPERIENCE

SQL Developer

RIA Money Transfer | CA | USA

May 2025 - Present

- Revolutionized **SQL** logic for **Walmart's** remittance platform, accelerating **UI** screen load times to under 2 seconds and shrinking execution time by **60%** across 1,000+ agent locations.
- Executed complex data joins, filtering, and conditional branching logic in **SSMS** to support beneficiary migration workflows, impacting over **10M** transaction records and enabling seamless integration between legacy and new data models.
- Engineered data validation and transformation layers using **T-SQL**, supporting frontend dashboards and financial reports used by **5+** internal departments, which decreased data inconsistency defects by **85%** during **UAT** cycles.
- Piloted **SQL** upgrades, streamlining **UI** adjustments on 3 **Ria** channels while partnering with product teams to orchestrate release cycles, and slashing data change requests by **40%**.
- Pioneered automated migration strategies for **SQL** stored procedures with **Azure DevOps**, identifying and resolving the top 3 causes of deployment failures, boosting release frequency by **20%**.

Data Analyst

Bank Of New York | NC | USA

Sep 2024 – March 2025

- Devised robust data processing frameworks by leveraging **Python** libraries such as **Pandas** and **NumPy**, achieving high-quality standardization of diverse datasets that enhanced the integrity of over **200** monthly business intelligence reports.
- Conducted trend analysis and predictive modeling using **SQL** and **R**, delivering insights that informed client strategies; findings identified top three operational inefficiencies leading to systematized decision-making processes across four key industries.
- Increased data accuracy and consistency by **30%** by implementing standardized data cleaning processes, leading to higher quality analytics.
- Arranged **AWS Glue** pipelines which refined data workflows by **40%**, resulting in expedited retrieval processes; quicker access to vital datasets, streamlining decision-making for cross-functional teams.
- Achieved a **25%** reduction in **cloud** infrastructure expenses by optimizing **SQL** queries and refining data pipeline architecture within **AWS**, resulting in notable long-term savings for the organization's operational budget.

Data Analyst / Associate Analyst

CITI Bank | India

July 2021 – January 2023

- Designed and Deployed **PL/SQL** triggers, cursors, functions, and stored procedures in **Oracle 11g** to automate core **banking** workflows and enforce data integrity across millions of financial transactions.
- Created **Oracle APEX** dashboards and interactive forms with **JavaScript**-based validations and dynamic actions, enabling real-time **KPI** monitoring and reducing reporting turnaround from day to hours.
- Created custom **APEX** charts, reports, and role-based access dashboards, improving usability for 200+ business and compliance users.
- Automated **ETL** data pipelines in **PL/SQL** to process **5M+** monthly records, integrating upstream and downstream financial systems with upgraded accuracy.
- Applied error handling, auditing, and logging within **PL/SQL** procedures to meet strict compliance and regulatory requirements.
- Collaborated in Agile sprints using **JIRA** for task tracking, **Bitbucket** for version control, and **IBM UDeploy** for **CI/CD** deployments, delivering 12+ projects **20%** ahead of schedule.

Computer Vision Engineer

NVIDIA | India

August 2018 – June 2021

- Developed perception pipelines for **LiDAR** and **radar** sensors, applying deep learning (CNNs, RNNs) and sensor fusion to boost real-time object detection and tracking accuracy by 35% in autonomous driving systems.
- Engineered **HD-mapping** frameworks using multi-modal, multi-view networks to extract lane lines, poles, and road elements, achieving sub-lane level localization accuracy for Level 4 self-driving prototypes.
- Built auto-labeling systems leveraging multi-modal offline networks, reducing manual labeling effort by 50% and accelerating dataset preparation for training.
- Integrated foundation vision models into **LiDAR** data pipelines for panoptic segmentation, enabling scalable semantic mapping of dynamic obstacles.
- Optimized cloud-based data workflows on **AWS/Azure** to process terabytes of multi-sensor data monthly, cutting training cycle times by 30%.
- Collaborated with cross-functional **AV** research teams on **NVIDIA DRIVE**, embedding sensor fusion pipelines into production-ready end-to-end driving models

EDUCATION

University of Cincinnati, Cincinnati, OH, USA (GPA 4.0/4.0)

Jan 2023 – Apr 2024

Master of Science, Information Technology
