

Sai Kumar Dasari

Data Analyst

Location: MI | Phone: 313-797-2116 | Email: kumar.saidasari6499@gmail.com | [LinkedIn](#)

SUMMARY

Highly Skilled Data Analyst with over **2+ years of experience** interpreting complex datasets and delivering data-driven solutions in **financial and enterprise environments**. Proficient in **SQL** and **Python** for **data extraction**, wrangling, and **EDA** using **Pandas**, **NumPy**, and **Matplotlib**. Skilled in building **Power BI** and **Tableau** dashboards that support 50+ stakeholders with real-time KPIs and operational metrics. Experienced in working with **MySQL**, **PostgreSQL**, and **BigQuery** to optimize query performance and manage high-volume transactional data. Exposure to machine learning techniques including classification, regression, and forecasting using tools like **TensorFlow** and **XGBoost**. Familiar with NLP frameworks such as **spaCy** and **OpenAI APIs** to support document analysis and contextual reporting where needed.

TECHNICAL SKILLS

Languages: Python, SQL, R, C++
Analytics & Visualization: Pandas, NumPy, Power BI, Tableau, MS Excel, Matplotlib, Seaborn
Databases: MySQL, PostgreSQL, MongoDB, BigQuery, Redshift
ETL & Data Engineering: Airflow, AWS Glue, Databricks, FAISS
Cloud & DevOps: AWS (S3, Lambda, Glue, SageMaker), GCP (BigQuery, Vertex AI), Docker, Kubernetes, Git
Machine Learning & NLP: Scikit-learn, XGBoost, TensorFlow, BERT, spaCy, LangChain, OpenAI APIs
Core Competencies: Data Wrangling, EDA, Statistical Analysis, Predictive Modeling, Feature Engineering

PROFESSIONAL EXPERIENCE

Data Analyst / AI Software Eng.

MI

Bank of New York Mellon, MI

Jul 2024 - Present

- Engineered **LSTM** and **XGBoost** models via **Vertex AI** to forecast price movement across 3 metal types, supporting **12 daily trade evaluations** and aligning output with **SOX requirements** through collaboration with **compliance** and **quant teams**.
- Automated **ETL workflows** using **Python** and **Cloud Functions** to ingest 6 external **API sources** into **BigQuery**; processed over **2 billion records** and reduced **data latency** by **4 hours per run**.
- Developed **10 real-time Power BI dashboards** for **PnL**, **exposure tracking**, and **anomaly detection** across 5 asset classes, enabling over 20 analysts to access insights within **seconds**.
- Created **RAG-based financial tools** using **LangChain**, **FAISS**, and **OpenAI APIs** to deliver **contextual summaries**, reducing manual lookup time by **80+ minutes daily** for **research teams**.
- Devised **NLP pipelines** with **spaCy** and **LayoutLM** to extract structured data from **1,500+ investor documents**, accelerating **review cycles** by **3 business days** per quarter.
- Orchestrated deployment of **6 ML microservices** using **Kubernetes (GKE)**, ensuring uninterrupted **model execution** during **5 peak trading hours** and maintaining **sub-second inference speed**.

Data Analyst

INDIA

KPMG

Jun 2021 – Jul 2022

- Analyzed ERP and ledger datasets using **Redshift** and **MySQL** to produce 25+ **audit-compliant reports**, ensuring data integrity across financial systems.
- Developed fraud detection models using **Isolation Forest** and Logistic Regression, uncovering 3,000+ anomalous entries and refining audit focus for key stakeholders.
- Streamlined** ingestion of 12+ external datasets via **Python** and **AWS Glue**, reducing manual data handling by 15 hours per week and enhancing report reliability.
- Crafted **Tableau dashboards** for audit triggers and cost gaps with live refreshes from **S3** and **SQL sources**, eliminating 10+ hours of manual updates and enabling real-time decision-making.
- Engineered NLP solutions with **BERT** and **LayoutLM** to extract entities from 2,000+ financial documents, expediting review processes by 3 business days and supporting automated classification.
- Delivered** scalable ML deployment workflows via **SageMaker** and **Lambda**; **facilitated** Agile sprints with compliance teams to integrate regulatory scoring logic into 4 high-risk portfolios.

EDUCATION

University of Michigan-Dearborn | MI, USA

Master of Science in Data Science (GPA: 3.7/4.0)

Aug 2022 – April 2024

Dayananda Sagar College of Engineering

Bachelor of Engineering in Electrical and Communication Engineering (GPA: 8.0/10.0)

Aug 2018 – April 2022

PROJECTS

Multimodal RAG Framework

- Built a full-stack web application using **React.js** and **FastAPI**, integrating **LangChain** for Retrieval-Augmented Generation (RAG) processes.
- Designed a vector search pipeline using **FAISS**, **Elasticsearch**, and **MongoDB**, improving data retrieval time by 40%.
- Deployed the application using **Docker** and **Kubernetes**, with **Redis** and **Celery** for background task management.

Predicting Employee Attrition Using Machine Learning

- Implemented Logistic Regression, Naïve Bayes, and SVM models, achieving 85% accuracy in predicting employee attrition.
- Analyzed factors like income, job satisfaction, and travel frequency to guide business decision-making.

CERTIFICATIONS

Microsoft Certified: Azure AI Engineer Associate| Modern AI Pro Essentials: Mitra Robot (2024)

Certified Kubernetes Application Developer (CKAD)| Deep Learning Specialization (Coursera) – Andrew Ng IBM Applied AI Certification.
