SUMMARY

Dynamic and detail-oriented **Data Analyst** with **4+** years of proven success driving data-driven strategies across **Healthcare Banking, Finance, Risk, and Capital Markets**. Recognized for delivering high-impact, cloud-native analytics solutions that streamline operations, automate reporting workflows, and reduce manual effort by up to **70%**. Expert in **SQL, Python, Power BI, Tableau, Murex, and ETL pipeline design on AWS and Azure**. Skilled in data modeling, API integration, stakeholder engagement, and end-to-end project execution while ensuring compliance with SOX, PCI-DSS, and GDPR standards. Adept at translating complex healthcare and financial datasets into actionable insights that enhance clinical and operational decision-making, strengthen regulatory risk monitoring (HIPAA, SOX), and drive strategic investments and cost optimization. **Actively seeking opportunities** to contribute to impactful, data-driven business solutions.

WORK EXPERIENCE

FactSet| Remote

March 2024 – Present

Data Analyst

Designed and optimized healthcare data pipelines using FactSet, Snowflake, and Databricks on AWS/Azure, boosting processing speed and data accessibility by 40% while ensuring HIPAA compliance. Delivered real-time analytics that supported Philips Healthcare executives in M&A evaluation, market expansion, and operational efficiency.

- Designed and developed **ETL/ELT pipelines, Python, SQL, Snowflake** to integrate healthcare financial, operational, and clinical datasets while ensuring **HIPAA compliance**.
- Built and automated **data models and dashboards** in **Tableau, Power BI, FactSet** to deliver insights on **M&A opportunities, market expansion, and competitive benchmarking** against MedTech peers such as **Medtronic, Abbott, and Stryker**.
- Collaborated with healthcare client teams to implement secure **cloud-based solutions** on **AWS and Azure**, leveraging **REST APIs and Data Frames** for seamless FactSet integration.
- Optimized **data quality, governance, and compliance frameworks** by applying **Informatica IICS, Azure Data Factory (ADF), Databricks**, reducing reporting errors and ensuring alignment with **HIPAA and SOX standards**.
- Partnered with Philips Healthcare executives through FactSet engagement to deliver **predictive analytics** using **Python, PySpark, FactSet APIs**, enabling data-driven decisions on **revenue forecasting, cost optimization, and healthcare trends**.
- Integrated **EHR/EMR data sources (Epic, Cerner)** and **claims datasets** into FactSet pipelines, ensuring interoperability through **HL7 and FHIR standards** for advanced **clinical analytics**.
- Delivered **healthcare analytics solutions** to track **patient outcomes, claims efficiency, and care quality metrics**, aligning insights with **HIPAA compliance** and supporting **value-based care initiatives**.
- Championed **end-to-end data security and compliance** by implementing **role-based access controls (RBAC), encryption standards, and audit logging** across FactSet healthcare pipelines, ensuring adherence to **HIPAA, HITRUST, and SOX** regulations.
- Enabled **executive-level decision making** by integrating FactSet analytics with **financial, operational, and clinical KPIs**, driving strategies for **M&A, global expansion, and healthcare innovation** at Philips Healthcare.
- Improved **scalability and performance** of healthcare data platforms by optimizing **FactSet workflows on cloud (AWS, Azure)**, reducing data processing time by 40% and accelerating **real-time healthcare reporting and forecasting**.

The Bancorp, SD

Data Analyst

Feb 2023 – Dec 2023

- Automated **Mark-to-Market (MTM) valuation reporting** in **Murex**, improving delivery accuracy by **98%** and reducing manual validation by **60%**, leveraging **SQL, PostgreSQL, and DataMart** for enhanced daily risk monitoring.
- Optimized complex **SQL/PostgreSQL queries** in **Murex Datamart**, boosting performance by **40%** and cutting query runtime by **35%** on large datasets exceeding 1M records.
- Designed and maintained daily position and trade movement reports for regulatory and operational teams, enabling real-time exposure tracking for **1,000+ trades** and reducing manual oversight by **70%** using **SQL and data automation scripts**.
- Streamlined **bond static data delivery** pipelines from **Murex to risk/compliance teams**, implementing twice-daily refreshes and cutting data processing time by **40%** through **ETL scripting and automated scheduling**.
- Built multilingual **SQL views** with Chinese character encoding to ensure **100% data integrity** for APAC swap reports, meeting cross-border compliance and reporting requirements.
- Enhanced **TRS netting logic** to exclude 50+ intra-entity and inter-portfolio trades, improving regulatory accuracy by **25%**, and automated TRS Fixing Advice report generation, reducing preparation time from **40 minutes to <10 minutes**.
- Automated **end-of-day reporting pipelines** using **Murex scheduled jobs, ETL scripts, and Git Bash version control**.

Axis Bank
Data Analyst

Hyderabad, India
DEC 2021-AUG 2022

***Analyzed** multi-source financial datasets and engineered scalable cloud-based data pipelines using AWS, GCP, and Starburst Presto, enabling seamless federated querying. **Improved** data accessibility and streamlined processing, reducing reporting turnaround time by **35%** in a secure, compliant environment.*

- Developed **Python ETL scripts** for financial transaction datasets, integrating **AWS Glue, EMR, and GCP Dataflow**, improving fraud detection workflows and reducing data processing time by **35%**.
- Designed **federated querying solutions** using **Starburst Presto** with **S3, BigQuery, Oracle, and on-prem databases**, streamlining cross-platform reporting and reducing operational delays by **30%**.
- Automated real-time **transaction monitoring** with **Kafka, Zookeeper, and Flume**, enhancing fraud prevention and enabling faster anomaly detection across millions of daily records.
- Optimized analytical workloads on **Amazon Redshift** and **Google BigQuery** through cost-aware SQL tuning, reducing query latency by **40%** and lowering compute costs by **20%**.
- Collaborated with compliance and risk teams to implement **SOX, PCI-DSS, and GDPR** controls, including role-based access and data masking, ensuring secure handling of sensitive financial data.

HEXAWARE
Data Analyst

Hyderabad, India
Oct 2020-NOV 2021

Designed and automated financial reconciliation workflows using Python, MySQL, and Excel VBA, streamlining month-end reporting.

***Reduced manual processing time by 40%** and improved data accuracy, enabling faster, audit-ready insights.*

- **Created** Python scripts for data transformation on financial reconciliation datasets, integrating **MySQL** to streamline month-end reporting processes by **29%**.
- **Automated** recurring finance workflows using advanced **Excel features** PivotTables, VLOOKUP, VBA Macros and optimized SQL queries, boosting automation by **40%** and improving operational efficiency.
- **Led** cross-functional workshops with finance, compliance, and operations teams to gather and validate **95%+ of business and technical requirements** for reporting automation projects.
- **Developed** data quality checks, KPI frameworks, and validation logic to ensure accuracy and compliance in reconciliations, reducing reporting errors and audit findings.

PROJECTS

Integrated ticket booking system for BUS and train

Jan 2021 – Mar 2021

- **Designed and developed** a real-time transportation booking analytics platform using **Python, MySQL, and REST APIs**, enabling live tracking of ticket sales and route performance. **Implemented** PCI-compliant transaction data handling and dynamic route optimization features, improving booking accuracy by **25%** and enhancing customer experience through data-driven insights.

Operating Systems in the Cloud

Feb2025 – Apr2025

- **Researched and analyzed** cloud operating system performance data, focusing on virtualization, containerization, security, and scalability metrics. Developed analytical reports on **Kubernetes, Docker Swarm, OpenStack**, and AWS ECS, incorporating insights on emerging trends like serverless, edge computing, and quantum OS to guide strategic cloud adoption decisions.

SKILLS

- **Databases:** Snowflake, Microsoft SQL Server, MySQL, PostgreSQL
- **Programming Languages:** Python, R, Power Query, DAX
- **Tools & Libraries:** Advanced Excel, PowerPoint, JIRA, Confluence, GitHub, Bitbucket, Git Bash, Word, Murex 3.1
- **Data Visualization:** PowerBI, Tableau, Tableau Prep Builder, Alteryx, Looker
- **Data Management & Analysis:** ETL, Data Profiling, Anomaly Detection, Data Mapping, Data Reporting,
- Data Storytelling, P&L Analysis, Financial Modeling
- **Soft Skills:** Cross-functional Collaboration, User-Centered Design, Business Process Improvement, Stakeholder Communication, Project Facilitation

EDUCATION

Masters in computer science, Saint Leo University, Tampa, FL	GPA: 3.55	Aug 2022 - May 2024
Bachelors in computer science, JNTUH, Hyderabad, India	GPA: 3.04	Aug 2017 - M a r 2 0 2 1
