

Sai Nikhil Muriki

Full Stack Developer

📞 +1 (513) 599-9667 ✉️ sainikhil@techjobmails.com  [LinkedIn](#)

Professional Summary

- Full Stack Developer with 4+ years of experience in building and deploying highly scalable web applications using modern frameworks like React, Angular, and Vue.js, ensuring responsive and interactive user experiences.
- Proficient in backend development using Java, Spring Boot, Spring MVC, and Hibernate, with expertise in designing and implementing RESTful APIs and microservices architectures to improve application performance and scalability.
- Extensive hands-on experience with cloud platforms like AWS (Lambda, EC2, S3, RDS) and Azure, leveraging containerization tools such as Docker and Kubernetes for efficient deployment and orchestration of cloud-native applications.
- Skilled in front-end technologies including HTML5, CSS3, JavaScript, TypeScript, and frameworks like Bootstrap and Tailwind CSS, creating dynamic and visually appealing interfaces for seamless user experiences.
- Strong experience in implementing CI/CD pipelines using Jenkins, Git, and Maven, ensuring streamlined development workflows and reducing deployment time.
- Adept in database management using MySQL, PostgreSQL, MongoDB, and Redis, with a proven track record of optimizing query performance and ensuring high system reliability.

Skills

Programming Languages: Java, Python, C, C++, JavaScript, TypeScript, SQL.

Frameworks & Libraries: Spring Boot, Spring MVC, Hibernate, React.js, Node.js, Angular.js, Vue.js, Tailwind, Next.js, Express.js, SOAP, WebSocket, RabbitMQ.

Web Development: HTML5, CSS3, Bootstrap, Tailwind CSS, XML, JSON, AJAX, jQuery, DOM Manipulation, Redux.

Cloud Platforms: AWS (Lambda, S3, EC2, RDS, SQS, CloudWatch), Azure.

Containerization & Orchestration: Docker, Kubernetes, OpenShift.

Microservices & Architecture: Microservices, RESTful APIs, Apache Kafka, Spring Security.

Databases: MySQL, PostgreSQL, MongoDB, Oracle, Redis, DynamoDB.

CI/CD & DevOps Tools: Jenkins, Git, GitLab, GitHub, Maven, Terraform, Ansible, Puppet, CloudFormation.

Testing Frameworks: JUnit, Mockito, TestNG, Selenium, Postman, Jest.

Big Data Technologies: Apache Kafka, Apache Spark, Hadoop.

Security: Secure Coding Practices, SonarQube, OAuth2.

Agile & Methodologies: Agile, Scrum, SDLC, TDD, DevOps.

Development Tools: PyCharm, Jupyter Notebook, Visual Studio Code, IntelliJ IDEA.

Other Tools: Swagger, Elasticsearch, Rally, Jira, Tableau, Power BI.

Work Experience

State Street

January 2024 – Present

Full Stack Developer

United States

- Designed and developed responsive and interactive user interfaces by integrating Angular with Bootstrap and Vue.js, ensuring cross-browser compatibility and a seamless user experience. Built reusable components using React.js, enhancing maintainability and reducing development time by 30%.
- Engineered backend services using Node.js and Spring Boot, implementing RESTful APIs to improve system performance and enable seamless data exchange between microservices.
- Integrated Apache Kafka for real-time financial data processing, reducing latency by 50% and improving system reliability by 30%.
- Enhanced SQL database performance by optimizing queries with Hibernate ORM, achieving a 40% improvement in execution speed and reducing database load.

- Developed and deployed scalable applications on AWS using EC2, S3, and RDS. Managed Kubernetes clusters to orchestrate containerized applications and used Jenkins for CI/CD pipelines, achieving a 30% reduction in deployment errors.
- Worked in an Agile environment, collaborating with cross-functional teams to deliver project milestones within tight deadlines. Actively participated in sprint planning, stand-ups, and retrospectives to improve team productivity.
- Implemented asynchronous programming principles in Node.js to optimize backend processes, ensuring non-blocking operations and efficient handling of concurrent user requests.

Tata Consultancy Services

August 2021 – November 2022

Full Stack Developer

India

- Developed Java-based microservices architecture using Spring Boot, reducing response times for critical processes. Designed secure and scalable RESTful APIs, enabling seamless integration with third-party systems and enhancing application scalability.
- Automated testing using JUnit and Mockito, achieving 95% code coverage and reducing manual testing efforts by 40%. Employed Test-Driven Development (TDD) to minimize defects and enhance application stability.
- Leveraged Apache Kafka to streamline data processing workflows, reducing latency by 50% and ensuring real-time updates for critical systems. Optimized SQL queries using Hibernate ORM, leading to a reduction in query execution time.
- Deployed and managed containerized applications using Docker and Kubernetes, ensuring efficient scaling and 99.9% uptime. Automated infrastructure provisioning using Ansible and Terraform, reducing deployment time by 30%.
- Applied Spring Security to secure web applications, achieving compliance with HIPAA standards and reducing vulnerabilities by 35%.
- Built Continuous Integration and Deployment pipelines using Jenkins, automating build processes and reducing deployment errors.

Intex Technologies

May 2019 – July 2021

Java Developer

India

- Designed and implemented scalable Java-based web applications using Spring Boot and Hibernate, reducing development time and improving scalability. Developed RESTful APIs to enable seamless integration with third-party services, reducing system complexity.
- Built reusable and customizable React.js components for a single-page application, improving the application's responsiveness and user experience.
- Created and executed unit tests using JUnit and Mockito, achieving 95% test coverage and ensuring application stability during production releases.
- Designed and maintained databases using MySQL and Redis, reducing query response times. Optimized database schemas to enhance data retrieval and storage efficiency.
- Collaborated with cross-functional teams in Agile development cycles, delivering multiple project milestones on time and within scope.
- Conducted code reviews and implemented performance optimizations, achieving a 15% improvement in application speed.

Education

University of Cincinnati

January 2023 – April 2024

Master of Science in Information Technology

Cincinnati, Ohio
