

SAI PAVAN

SOFTWARE ENGINEER

New Jersey | pavansai.tha98@gmail.com | +1 (848) 213-5176 | [LinkedIn](#)

Professional Summary

Detail-oriented and results-driven Software Engineer with 3+ years of hands-on experience designing, developing, and deploying scalable web applications and RESTful APIs. Skilled in Python, Java, full-stack development, cloud deployment (AWS, Azure), microservices architecture, and automation using CI/CD pipelines. Proven track record of enhancing system performance, reducing deployment times, and delivering high-quality solutions in Agile environments. Committed to leveraging emerging technologies to drive innovation and user-centric design.

Technical Skills

Languages: Python, Java, C++, JavaScript

Web Development: HTML5, CSS3, React.js, Angular.js, Node.js, Flask, Django, REST APIs

Database Technologies: SQL, PostgreSQL, MySQL, MongoDB, Oracle, SQLite

DevOps & Tools: Git, GitHub, Bitbucket, Jenkins, Docker, Azure DevOps

Cloud Platforms: AWS (EC2, S3, Lambda, RDS), Azure, GCP

Methodologies: Agile (Scrum), CI/CD, TDD (Test-Driven Development)

Data Processing: Pandas, NumPy

Testing Frameworks: pytest, unittest, Jest

Professional Experience

Epsilon – New Jersey, USA

Software Engineer | May 2023 – Present

- Developed scalable RESTful APIs using Python (Flask, Django) and PostgreSQL, improving integration and real-time data processing across business units.
- Migrated legacy applications to microservices architecture, improving deployment flexibility and reducing system downtime by 25%.
- Built dynamic, user-centric dashboards with React.js and Node.js, enhancing data visualization for business intelligence teams.
- Integrated AWS services (EC2, S3, Lambda) to deploy cloud-native applications, ensuring high availability and optimized resource usage.
- Designed and implemented CI/CD pipelines with Jenkins, Docker, and Git, achieving a 50% reduction in release cycle times.
- Automated testing processes using pytest and Jest, increasing code coverage by 35% and significantly reducing critical bugs.
- Tuned SQL (PostgreSQL) and NoSQL (MongoDB) databases, reducing query latency by 40% and boosting application performance.
- Collaborated cross-functionally with DevOps, QA, and product teams to ensure seamless SDLC execution in Agile environments.
- Automated data pipelines and reporting tasks with Python scripting, increasing data processing efficiency and reporting accuracy.

Trigent Software – Hyderabad, India

Junior Python Developer | September 2020 – November 2021

- Designed and deployed web applications using Flask and Angular.js, resulting in a 30% improvement in end-user satisfaction.
- Built and optimized RESTful APIs, enhancing platform interoperability and achieving a 25% reduction in API response times.
- Developed and maintained automated CI/CD workflows with Docker and Azure DevOps, accelerating deployment pipelines by 35%.
- Applied TDD practices with pytest and unittest, reducing post-deployment issues by 40% and enhancing software quality.

- Enhanced database performance by optimizing PostgreSQL queries, leading to a 50% reduction in query execution time.
- Worked on cloud deployments leveraging Azure services, increasing system scalability and resilience.
- Wrote comprehensive technical documentation, improving onboarding time for new developers by 20%.
- Collaborated closely with cross-functional teams to deliver features aligned with business and client needs.

Education

Master of Science in Computer Science and Information Technology

Sacred Heart University – Jack Welch College of Business and Technology | Fairfield, Connecticut

Bachelor of Technology in Electronics and Communication Engineering

GITAM University – Hyderabad, India
