

RANGU SAI PRAKASH

Memphis, TN 38111 | saiprakashrangu77@gmail.com | (901)-215-6239

PROFESSIONAL SUMMARY

- Software Engineer with hands-on experience in backend development, cloud deployment and DevOps.
- Proficient in Spring Boot, AWS, Jenkins, GitHub Actions and CI/CD pipelines.
- Experienced in microservices, containerised systems and automated deployments.
- Strong background in building RESTful APIs, working with databases and deploying applications on AWS.
- Agile team player with excellent communication, fast learning ability and strong problem-solving skills.

EDUCATION

M.S. in Information Studies (MSIS) | TRINE UNIVERSITY – Detroit, MI

Aug 2022 – Aug 2024

Relevant Courses: Data Science and Big Data, Advanced Database, Data Mining and Data Visualisation

EXPERIENCE

Associate Software Engineer | MPHASIS , India

Jul 2021 – Aug 2022

Description:

Worked on enterprise-level solutions for FedEx involving backend dashboard creation, database migration and automation of software deployment processes.

Responsibilities:

- Developed and deployed two **Spring Boot** based dashboards:
- One for migrating production database tables to QA/UAT/Dev environments.
- Another for managing an internal **employee facing E-Market portal**.
- Designed and integrated RESTful APIs with intuitive, user-friendly GUIs to enhance backend usability and functionality.
- Automated sprint builds and server deployments using Jenkins, achieving a 70% reduction in manual deployment efforts.
- Implemented **CI/CD pipelines** using **GitHub Actions** and **AWS CodeDeploy** for efficient, scalable deployments.
- Participated across the **Software Development Life Cycle (SDLC)** from **requirement analysis to deployment and documentation**.
- Collaborated closely with **QA, Product and Infrastructure** teams to ensure smooth integration and delivery.

Tools Used:

Java, Spring Boot, REST APIs, HTML/CSS, JavaScript, Jenkins, GitHub Actions, AWS (EC2, S3, Lambda, CodeDeploy, CloudFormation), MySQL, IBM Watson Studio, IntelliJ, Visual Studio, PyCharm, MySQL Workbench

Environment:

Agile, Microservices Architecture, Linux, CI/CD, Cloud-native deployments

PROJECTS

• PROJECT 1 :Client-Server Messaging System (C++ and TCP Sockets)

Feb 2019

Description:

Built a **real-time text messaging system** using **C++ sockets** for TCP/IP communication.

Responsibilities:

- Developed a socket-based client-server architecture with basic message passing.
- Handled TCP stream communication using low-level socket APIs.

Tools and Environment:

C++, Linux, GCC, TCP/IP, Console-based

• PROJECT 2 :Top-k Similarity Search on Encrypted Data

Jan 2020 –Apr 2020

Description:

Created an **encrypted search system** allowing users to perform top-k keyword queries using **random traversal encryption algorithms**.

Responsibilities:

- Implemented search logic to securely rank and retrieve encrypted data.
- Built test scenarios and simulated query responses.

Tools and Environment:

Java, Java Cryptography API, Eclipse, Desktop Application

• PROJECT 3 :Face Detection and Recognition App

Sep 2020 –Dec 2020

Description:

Built a **GUI-based** face detection system using **OpenCV and Python** for recognising registered users.

Responsibilities:

- Built modules for facial registration, detection and profile matching.
- Applied image processing to optimise recognition accuracy.

Tools and Environment:

Python, OpenCV, Tkinter, Jupyter Notebook, ML-based Desktop Environment

CERTIFICATIONS & TRAINING

- **Backend & DevOps** : Git, Spring Boot, Jenkins, REST APIs, Java Micro-services (Mphasis)
- **Cloud & Programming** : Cloud Fundamentals (AWS), Python Programming (BREWC)
- **Data Science** : Data Science Specialisation (Internshala)
- **Coding Achievement** : Gold Badge – Python (HackerRank)

TECHNICAL SKILLS

Programming Languages : Java, Python, JavaScript, PHP, Shell Scripting, .NET

Frameworks & Libraries : Spring Boot, HTML/CSS, Bootstrap, jQuery, REST APIs

Cloud & DevOps : AWS (VPC, Lambda, S3, CloudFormation), Jenkins, GitHub Actions, CodeDeploy, CloudWatch

Databases : MySQL, MongoDB, IBM Watson Studio

Tools & IDEs : Git, Apache Server, Visual Studio, PyCharm, MySQL Workbench

VOLUNTEER EXPERIENCE

- 3 years at NGO U&I, teaching underprivileged children (Dec 2018 – Mar 2021)
- 1 year as a scribe for visually impaired students (Feb 2019 – Feb 2020)
- 3 months as teaching volunteer at Team Everest Organisation (Jan – Mar 2020)
