

SAI PRANATHI ATHOTA

+1 513-399-0613 | pranathi2031@gmail.com | www.linkedin.com/in/sai-pranathi-athota-1166b9189

OBJECTIVE

A computer science student with a Master's degree in progress and almost 2 years of practical experience in software engineering and database management. Developed applications using modern frameworks and programming languages, focusing on both front-end and back-end solutions with hands-on project experience in machine learning and LLM models.

WORK EXPERIENCE

UNIVERSITY OF CINCINNATI

GRADUATE ASSISTANT PROGRAMMER

Oct 2024 - Present
OHIO, USA

- Designed and developed applications for the Graduate College IT Department using ASP.NET, MVC, Razor, Bootstrap and C# for 10 months.
- Tested application components and collaborated with team members to enhance user experience, leveraging Microsoft SQL Server, GitHub, and MS Visual Studio.

OPTUM GLOBAL SOLUTIONS PVT LTD

SOFTWARE DEVELOPER

Jun 2022 - Jul 2023
HYDERABAD, INDIA

- Developed and maintained full stack application features using ASP.NET, C#, Angular, HTML5, CSS, and Microsoft SQL Server, CI/CD (Jenkins) pipelines, ensuring high standards of software quality for 1 year 1 month.
- Built and executed automation test cases using Selenium in C#, contributing to the agile team's efforts in delivering scalable, impactful software solutions.

EDUCATION

UNIVERSITY OF CINCINNATI

Master of Science degree, Computer Science

Aug 2023 - Dec 2025

- GPA:** 4.0/4.0
- Coursework:** Intelligent Data Analysis, Operating system, Cloud Computing, Natural Language Processing, Data Structures and Algorithms, Data Science for Bio medical research, User Interface Design

AMRITA VISHWA VIDYAPEETHAM

Bachelor of Technology degree, Computer Science and Engineering

Jul 2018 - May 2022

- GPA:** 9.27/10.0
- Achievements:** Ranked 10th in the 2022 batch
- Academic Coursework:** Data Structures and Algorithms, Object Oriented Programming, Machine Learning, Neural Networks.

PROJECTS

LLM BASED DATA VISUALIZATION RECOMMENDATION-MS THESIS

2025

- Data Visualization recommendation in a data based meeting scenario based on transcript and visualization that is being discussed in a meeting. Using Python, Pandas, Altair, GPT (OpenAI API), Google Collab etc..

MOBILE ROBOT PATH PLANNING WITH VISUAL CUES

2022

- Team based project.
- Autonomous robot path detection using visual cues (color boards to indicate different directions).
- Using Python, Webots 3D robot simulation tool, OpenCV library (image processing).

DESSERT RECOMMENDATION

2021

- Flask based web application to recommend desserts based on location, cost or preference.
- Using Python, Machine Learning techniques, Google collab, Flask framework, HTML5, CSS.

TECHNICAL SKILLS

Programming Languages: C#, Python, Java, C, JavaScript (familiar)
Web Development: HTML, CSS, RESTful API development/integration
Frameworks & Libraries: Angular, Flask, Svelte, Scikit-Learn, Pandas, NumPy
Cloud & DevOps / Version Control: AWS (basic), CI/CD practices, GitHub
Database Technologies: Microsoft SQL Server, MySQL, database schema design & querying
Tools: Visual Studio, Google Collab, Microsoft Office.

SOFT SKILLS

Leadership, Time Management, Team Collaboration, Accountability, Effective Communication
