OBJECTIVE

- Proactive and detail-oriented Master's student in Computer Science at Florida Atlantic University, seeking a Full Stack MERN + AWS Summer Internship. Eager to leverage experience in scalable web app development, cloud integration, and secure payment systems to contribute to dynamic development teams.

EDUCATION

Florida Atlantic University
Master of Science in Computer Science

Boca Raton, FL
January 2025 – Dec 2026

EXPERIENCE

Full Stack Developer (MERN + AWS) September 2023 – December 2023
SAMMABANDHA SERVICES PRIVATE LIMITED Bengaluru, India

- Developed and deployed a full-stack Matrimonial Web Application with tiered user subscription packages (Gold, Silver, Platinum) using React, Node.js, and MySQL.
- Integrated Stripe for secure, real-time payment processing for package purchases.
- Used AWS S3 to store and manage user-uploaded profile images securely.
- Implemented Socket.IO to enable live chat functionality between matched users.
- Employed Nodemailer for email verification and registration confirmation workflows.
- Built scalable backend APIs and maintained session security and state management using JWT and Redux.
- Demonstrated self-reliance by handling all frontend/backend aspects and adhering to startup timelines.

PROJECTS

WhatsApp Web Clone | *ReactJS, NodeJS, ExpressJS, PostgreSQL, Socket.IO* March 2023 – May 2023
* Developed a real-time messaging platform inspired by WhatsApp Web using **ReactJS** for the front end and **NodeJS** with **ExpressJS** for the backend.

- Utilized **Socket.IO** to enable two-way message transmission with instant updates for senders and receivers.
- Integrated **Redux** for effective state management, ensuring seamless synchronization of messages across components.
- Implemented user authentication, chat history persistence, and message routing using **PostgreSQL** as the database.

Movie Ticket Booking Application | *ReactJS, NodeJS, MySQL, Location API* January 2023 – March 2023
* Built a full-stack movie ticket booking system using **ReactJS** for the front end and **NodeJS** with **ExpressJS** for the backend.

- Integrated **Location API** to allow users to find theaters near their location using longitude and latitude.
- Designed and implemented a **MySQL** database to manage movie schedules, bookings, and user information efficiently.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, C++

Scripting Languages: HTML, CSS, JavaScript

Frameworks & Tools: React.js, Node.js, Express.js, PostgreSQL, Git, Docker

Databases: PostgreSQL, MySQL

Cloud DevOps: AWS (S3, EC2, EBS), Docker

Payment Email Services: Stripe, Nodemailer

Real-Time Communication: Socket.IO

Machine Learning: Scikit-learn, Pandas, NumPy

Other Tools: Redux, Postman, Visual Studio Code
