## EDUCATION

**Master of Science in Software Engineering**, San Jose State University  
**Bachelor of Science in Computer Science**, SNIST University

Aug 2022 - May 2024  
Jul 2016 - Jun 2020

## EXPERIENCE

**Software Development Engineer**  
Walmart Global Tech

Sep 2024 - Present

- Collaborated with cross-functional teams to optimize **multi-tenant SaaS** applications, using **Spring Boot**, **Kafka** and **ADF** in shipment architecture, boosting data processing efficiency by **40%** increase in sales.
- Developed **REST APIs** for 6 features across **9** services, achieved **175ms p50** and **200ms p95** response times.
- Resolved **35+** production incidents by analyzing **Splunk** metrics, debugging **Kubernetes pod logs**, **optimizing APIs**, and deploying application-level fixes, reducing incident resolution time by **30%**.
- Leveraged **TDD principles** in creating **25+** unit tests using **JUnit**, **Mockito**, Object-Oriented Programming.

**Software Development Engineer**  
Avance Care

Oct 2020 – Aug 2022

- Engineered high-fidelity application with **Spring Boot** and **Kafka** reducing development timeline by **40%**.
- Designed over **30+** RESTful APIs to integrate security features such as **JWT authentication**, **OAuth** and role-based access control (**RBAC**), and DBA team to optimize **OLAP queries**.
- Streamlined backend Java applications using **Spring Security**, **Hibernate**. Leveraged **Kafka** for data streaming, resulting **50%** reduction in response times and a **40%** improvement in system performance metrics.
- Teamed up with **DevOps** team in implementing automated **CI/CD** Pipelines for microservices using **Jenkins**, **Docker**, and **Kubernetes**, resulting in a **20%** increase in development team velocity.

**Software Engineer**  
Edwisely

Jun 2019 - Sep 2020

- Developed a real-time Placement Accelerator using Java, Spring Boot, HTML, CSS, React, and AWS architecture, utilizing **Agile methodologies** and **testing patterns**, resulting in a **50%** revenue increase.
- Integrated **authentication and authorization** mechanisms, ensuring user experience across **500+** users.
- Crafted **responsive** frontend app using React, optimized using **pagination** to reduce loading speed by **20%**.
- Spearheaded and deployed cloud-native applications using **AWS**, focusing on scalability and reliability.

## SKILLS

|                            |                                                                      |
|----------------------------|----------------------------------------------------------------------|
| Languages                  | Java, JavaScript, TypeScript, Python, HTML, CSS, SQL, JSON, XML      |
| Databases                  | PostgreSQL, MongoDB, MySQL, Redis, Oracle, RDS                       |
| Frameworks/ Libraries      | React, Angular, Spring Boot, NodeJS, jQuery, JUnit, Django           |
| Networking                 | RESTful API, gRPC, Apache Kafka, RabbitMQ, WebSocket, TCP, HTTP      |
| Cloud Technologies/ DevOps | AWS, GCP, Git, Docker, Jenkins, Kubernetes, Argo, ADF                |
| Tools                      | Splunk, Prometheus, Jira, Postman, VS Code, Swagger UI, Maven, Spark |

## PROJECTS

**DB-GPT - Spring Boot, multi-threading, React, Redis, Vue, LangChain**

Mar 2024

- Engineered an application for seamless integration with databases, enabling **NLP queries** using **LangChain SQL agents**. Secured a **50% decrease** in response times, significantly accelerating data retrieval for end-users.
