

Sai Ramya Vinnapala

Data Analyst

sairamyav08@gmail.com | +1 (312) 723-2729 | MD, USA

SUMMARY

Data Analyst with 3+ years of experience in financial and logistics domains. Skilled in Python, SQL, Power BI, Tableau, and ETL tools like Azure Data Factory, AWS Glue, and Alteryx. Built forecasting and anomaly detection models using ARIMA, Prophet, and SAS. Improved audit accuracy, reporting, and supported data governance to drive business decisions and reduce risk.

SKILLS

Programming:	Python (Pandas, NumPy), R, SQL,SAS
ETL Tools:	Azure Data Factory, SSIS, Alteryx
Databases:	MongoDB, PostgreSQL, Oracle, Azure SQL, Cosmos DB
Visualization:	Power BI, Tableau, Jupyter, Excel (Pivot Tables, VLOOKUP, Macros)
Big Data & Cloud:	Apache Spark, Kafka, AWS (Glue, Lambda, S3, RDS), Azure Synapse, Databricks
Workflow & Tools:	GitHub, Jira, Salesforce, Agile, Data Cleaning, A/B Testing, Forecasting

EXPERIENCE

Uber | Atlanta, United States | Data Analyst | Jan 2025 - Present

- Developed financial ETL workflows using **AWS Glue, Lambda, and Data Pipeline**, streamlining monthly data ingestion and reducing manual reconciliation by over **5 hours/month**.
- Created **Power BI dashboards** for finance stakeholders, cutting static reporting by **30%** and speeding up insight delivery.
- Validated **1,000 weekly financial records** in **Alteryx**, boosting data reliability and reducing processing errors.
- Built and deployed time-series forecasting models (**ARIMA, Prophet**) to predict revenue and asset trends, improving forecasting accuracy by **15%** and enabling proactive fund allocation.
- Coordinated deployment of **ML-driven forecasting tools** across internal analytics platforms, supporting data-backed investment decisions for treasury and finance teams.
- Ensured data consistency across **Amazon S3 and PostgreSQL**, enabling uninterrupted analytics with **zero data loss**.

Capgemini | India | Data Analyst | Sep 2020 - Dec 2022

- Developed ETL workflows in **Azure Data Factory** to integrate and transform large financial datasets, supporting **compliance and risk reporting**.
- Created **data mapping** document and participated in testing cycle to support accurate ETL deployment aligned with **SDLC**.
- Engineered interactive **Tableau dashboards** to track financial KPIs, risk exposure, and portfolio performance, accelerating decision-making and increasing stakeholder visibility across business units.
- Performed advanced **data mining and exploratory analysis** using **Python and SAS**, uncovering anomalies and key transaction patterns that enhanced risk mitigation strategies.
- Deployed **data validation and anomaly detection** routines in **Azure Databricks**, improving data quality across financial pipelines and reducing reporting discrepancies by 30%.
- Integrated insights with **Salesforce** dashboards to support real-time financial tracking and compliance alerts.
- Applied **data governance standards** to 100+ datasets and collaborated in Agile teams using **GitHub** for versioning and peer reviews, ensuring regulatory compliance and timely delivery of scalable analytics solutions.

Trigent Software | India | Data Analyst Intern | Feb 2020 - Sep 2020

- Revolutionized data reporting through optimized **SQL queries** and database indexing, increasing BI dashboard performance by **40%** and reducing report generation time by **25%**.
- Automated data workflows in **Python**, saving 10+ hours/month in manual reporting.
- Configured daily, weekly, and monthly backups of **100+ PostgreSQL and Oracle** databases, leading to successful data restoration within 2 hours of reported incidents, and 100% data recovery.
- Conducted **A/B tests** on web features, driving insights that lifted user engagement by **12%**.

Adani | India | Data Analyst Intern | Aug 2019 - Feb 2020

- Processed and cleaned over **200K rows** of equipment sensor and operational data using **Python (Pandas)** and **SQL**, improving pipeline readiness for analytics by **45%**.
- Automated ETL workflows in **Azure Data Factory and Alteryx**, cutting logistics data integration time by **30%**.
- Created **Power BI dashboards** to visualize plant energy usage and maintenance KPIs, enabling plant managers to track consumption anomalies and optimize shift schedules.
- Supported forecasting of monthly supply delays using **R and Excel macros**, enabling timely dispatch decisions.

EDUCATION

Illinois Institute of Technology Masters in Computer Science JAN 2023 – Dec 2024	Chicago, United States
Pragati Engineering College Bachelors of Technology in ECE May 2016 - Sep 2020	Kakinada, India

PROJECTS

- Risk Analytics in Financial Services:** Performed financial risk analytics using Power BI and predictive models (Random Forest, SVM), achieving 82.65% accuracy.
- Restaurant Revenue Optimization:** Built PuLP-based model in Python, raised revenue by 10%.

CERTIFICATIONS

- Google Data Analytics Specialization, Google
- Data Analysis With R, Google
