PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience transforming complex datasets into actionable insights across tech, healthcare, and education sectors. Skilled in Python, SQL, and Power BI, with hands-on expertise in ETL, A/B testing, NLP, and cloud platforms like AWS and Snowflake. Proven ability to drive product improvements, streamline operations, and support strategic decision-making through data. Known for delivering insights that power smarter decisions and measurable impact.

EDUCATION

Rutgers, The State University of New Jersey | MS in Business Analytics (GPA: 3.55)

Sept 2022 – Dec 2023

Savitribai Phule Pune University | BE in Computer Science (GPA: 3.8)

Aug 2017 - Jul 2021

PROFESSIONAL EXPERIENCE

Data Analyst | Cantonica | New York, NY – Remote

Mar 2024 – Present

- Analyzed user interaction data to uncover high drop-off rates and low trust indicators in Cantonica's mobile web discovery experience, where search results were presented in an app store-like format to mimic native app behavior.
- Leveraged SQL, BigQuery, Power BI (DAX), and Mixpanel to analyze 3M+ user sessions, built NLP-based review credibility models using Python, scikit-learn, and spaCy, and monitored A/B test performance via Amplitude.
- Drove a 15% uplift in click-through rates, 12% reduction in bounce, and 28% increase in trusted content engagement, shortened feature rollout cycles by 50%, resulting in 20–25% higher adoption.

Data Analyst | Rutgers University | Camden, New Jersey

Sept 2022 – Dec 2023

- Automated retention analytics for the Office of Institutional Research using Python (Pandas), SQL, and Tableau.
- Built an ETL pipeline that pulled data from Banner (student info system) into AWS Redshift.
- Analyzed financial aid trends using Python and Power BI to study the impact of aid disbursement timing on semester persistence; automated weekly dashboard updates via AWS Lambda and SFTP data pipelines.

Data Analyst Intern | Boston Scientific | Pune, India

May 2023 – Aug 2023

- Developed and automated data pipelines using SQL, Python, and Airflow to consolidate EMR records, implant usage logs, and patient vitals from 3+ hospital systems into Snowflake for analysis.
- Analyzed 12K+ cardiac implant cases to identify patterns between patient profiles and device performance, using statistical testing and clustering (Pandas, SciPy), findings revealed device-patient mismatches affecting recovery times.
- Automated Excel reports using macros and formulas, standardizing weekly updates, and reducing reporting errors by 30%.

Data Analyst | Magnum Automotive Industries | Pune, India

Jul 2021 – Jul 2022

- Tracked delays in stainless steel deliveries from Tier-2 suppliers using SQL and Power BI to flag vendors with >15% late rates, enabling the sourcing team to renegotiate terms, improving material availability by 19%.
- Built a monthly demand forecast for the top 20 exhaust tip SKUs using Python (Prophet), trained on 2 years of shipment and production data. Enabled procurement to plan raw material orders 4–6 weeks ahead, cutting stockouts by 27%.
- Flagged ₹12L worth of slow-moving SKUs sitting in the warehouse for over 180 days, ran ABC analysis in Python, and linked findings to sales data. Helped revise reorder points and batch sizes, reducing holding cost by 14% over 2 quarters.

ACADEMIC PROJECT

Dining Concierge Chatbot | AWS, DynamoDB, OpenSearch, Python, REST API

Jan 2023 – Apr 2023

- Built an AWS Lex chatbot to capture user inputs (cuisine, location, time), stored scraped Yelp data in OpenSearch for fast querying, and used DynamoDB to store restaurant metadata, including names and addresses.
- Orchestrated a serverless pipeline using Lambda, SQS, and CloudWatch to process user requests asynchronously and send personalized restaurant recommendations via SMS using AWS SNS.

TECHNICAL SKILLS

Programming Languages: Python (Pandas, NumPy, Matplotlib, Seaborn), R, SQL

Tools & Platforms: Power BI (DAX), Tableau, Excel (Pivot Tables, VLOOKUP, Macros, VBA), Jira

Data Engineering & Cloud: ETL Pipelines, Apache Spark (PySpark), Kafka, Amazon Kinesis, Snowflake, AWS

Databases: MySQL, PostgreSQL, T-SQL, Google BigQuery, MongoDB, OpenSearch

Other: Estimating tools, Model QA & validation, User training & adoption, Cross-functional collaboration

CERTIFICATIONS

AWS Certified Cloud Practitioner, Google Data Analytics Professional Certificate, CBAP
