PROFESSIONAL SUMMARY

Versatile Software Engineer skilled in Full Stack Development, Data Science, and QA. Experienced in building scalable apps using React, Node.js, Python, and Django, with strong focus on microservices, cloud deployment, and data-driven solutions.

EXPERIENCE

SOFTWARE ENGINEER

December 2022 – June 2023

ESPIRE INFOLABS PVT LTD

Hyderabad, India

Developed and deployed 10+ scalable RESTful APIs and enterprise microservices using Node.js, Django, and Python, improving system modularity and enabling 35% faster feature rollout. Automated 50+ test cases using Python-based scripts, contributing to a 40% reduction in regression bugs and enhanced software assurance.

Integrated SmartCOMM dynamic content workflows across internal systems, leading to a 25% improvement in communication delivery speed and customization.

Implemented CI/CD pipelines using GitHub Actions, Docker, and Azure DevOps, cutting release cycle times by 30% and reducing manual deployment errors.

Collaborated in Agile/Scrum teams across 3+ time zones, contributing to sprint planning, stand-ups, retrospectives, and continuous delivery goals.

IMPLEMENTATION ASSOCIATE

July 2021 – December 2022

ALTRUISTA HEALTH SERVICE PVT LTD

Hyderabad, India

Led the development of 15+ multilingual SmartCOMM templates, improving patient engagement and accessibility across diverse healthcare populations by 20%.

Designed and implemented SQL-driven reports and real-time BI dashboards to track campaign KPIs, resulting in a 30% increase in stakeholder visibility and decision-making efficiency.

Collaborated with UI/UX designers and backend engineers to deliver customized communication modules using Thunderhead, reducing deployment time by 25%.

Maintained HIPAA-compliant documentation standards and supported cross-team knowledge transfer, streamlining onboarding for 5+ technical team members.

Enforced regulatory compliance and data security protocols in all ETL workflows, ensuring 100% audit readiness and minimizing risk exposure.

DATA ANALYST (FREELANCER)

Developed a cross-platform mobile finance app using JavaScript and the Ionic Framework, designed for rural banking, reaching over 1,000+ end users in underserved regions.

Integrated 10+ RESTful APIs and implemented local data caching with IndexedDB, enabling 100% offline access in low-connectivity environments.

Participated in UI/UX design sprints and peer code reviews, ensuring a responsive interface and seamless frontend-backend synchronization that improved app load time by 35%.

SOFTWARE DEVELOPER INTERN

CEDAR INFO TECH PVT LTD

Developed and deployed 5+ predictive machine learning models using Python, Scikit-learn, and Pandas, enhancing customer targeting and segmentation accuracy by 18%.

Automated KPI reporting pipelines and dashboard generation using Matplotlib, Seaborn, and SQL, reducing manual reporting time by 60%.

Integrated data-driven insights into product development cycles and customer decision workflows, resulting in a 15% increase in data-informed feature adoption.

PROJECT

Client: Humana, Ucare, Highmark, Baylor Scott & White, VillageCare, CareFirst, BCBSAZ, Quartz, HCSC, Apex, BlueCross BlueShield

Role: SmartCOMM/Thunderhead Template Developer

Developed 100+ dynamic SmartCOMM templates (print, email, web) using Advanced Template Designer, aligned with client branding and healthcare compliance.

Mapped and transformed data using XML, XSLT, XPath, and SmartCOMM Data Modeler to support personalized communications for 1.2M+ members.

Reduced rendering latency by 30% through optimized logic, smart conditions, and efficient data bindings.

Integrated SmartCOMM with AWS-based platforms, ensuring HIPAA and HITRUST compliance.

Collaborated in Agile sprints and partnered with QA/DevOps to automate test cycles, cutting pre-release issues by 40%.

Authored technical documentation and provided production support, maintaining 95% SLA adherence across clients.

SKILLS

Programming Languages: C, C++, Java, Python, Ruby, Shell Scripting, JavaScript, SQL, HTML/CSS

Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, Django, RESTful APIs

Scripting & Automation: Bash, Perl, Python scripting

Data Science & Analysis:

Pandas, NumPy, Scikit-learn, Matplotlib, Hypothesis Testing, Cluster Analysis, Regression Modeling

Architecture & Assurance:

Microservices, CI/CD, Software Assurance, Fault Tolerance, Scalable Systems, MVC

Architecture

Debug & Validation Tools:

Oscilloscopes, Logic Analyzers, JTAG, Voltmeters, ATE Systems

Version Control: Git, SVN, CVS, GitHub, Azure DevOps

Cloud & DevOps: AWS (EC2, S3), Azure, Docker, GitHub Actions

Agile Practices: Agile, Scrum, Kanban, XP, TDD, OOP

CERTIFICATIONS & AWARDS

JNTU Hack Fest & Central

Hackathon – 2nd Place

Best Leader Award – NSS

Camp, 2018

Certifications: C Programming, Java, Web Design

Recognized as Best Event

Organizer at ACE Engineering College.

EDUCATION

City University of Seattle — Seattle, WA

Master's in Computer Science (Expected Fall 2025)

ACE Engineering College, JNTU

— Hyderabad, India

Bachelor's in Computer

Science (2016 – 2020)
