

# Sai Siddaraju Poojitha

(945) 527-2124|saispoojitha@gmail.com|TX, USA |<https://www.linkedin.com/in/saispoojitha>

## SUMMARY

IT professional with 3 years' experience in data analysis, data engineering, predictive modeling, and dashboard development using SQL, Python, Tableau, and Power BI. Skilled in processing large datasets, building automated pipelines, and delivering actionable insights to support business decisions.

## SKILLS

**Programming:** Python, SQL, R, Excel (Pivot Tables, VLOOKUP)

**Database:** MongoDB, PostgreSQL, Oracle 10g, SQL Developer, Oracle Transportation Management (OTM), SAP

**Cloud:** AWS (S3, RDS, Redshift, Glue), Azure (Data Factory, Databricks, Data Lake Storage, Azure Cognitive Services)

**Data Engineering:** ETL Pipelines, Data Wrangling, Data Cleansing, Data Aggregation, Process Optimization

**Big Data:** Apache Airflow, Spark, Hive, HDFS, Data Aggregation

**Analytics:** Power BI, Tableau, Data Storytelling, Dashboard Development, Predictive Analysis, KPI Development

**Soft Skills:** Cross-functional Team Collaboration, Stakeholder Engagement, Effective Communication

## EDUCATION

**Master of Science in Information Technology and Management | May 2025**

The University of Texas at Dallas, TX, USA

**Bachelor of Engineering in Information Science | July 2020**

Visvesvaraya Technological University, INDIA

## PROFESSIONAL EXPERIENCE

**Data Analyst Intern | Insight Global, TX, USA | January 2025 – May 2025**

- Built and automated Azure Data Factory pipelines to ingest, clean, and transform project data from Jira and other project tracking tools into analytics ready datasets.
- Delivered interactive Power BI dashboards with automated refresh and drill-down capabilities, enabling real-time visibility into testing metrics and sprint KPIs.
- Created an AI agent with Azure Cognitive Services, enabling leadership to query project datasets in natural language and receive instant, actionable insights.
- Managed project timelines, scope, and deliverables, ensuring analytics initiatives were completed on schedule and within defined requirements.

**Data Systems Engineer | Tata Consultancy Services, India | April 2021 – August 2023**

- Designed and automated ETL workflows to process supply chain data from SAP and OTM, reducing data latency and improving processing efficiency by 35%.
- Optimized database queries and implemented indexing strategies to accelerate generation of shipment cost, supplier performance, and procurement trend reports by 40%, enabling faster supply chain decision-making.
- Designed and deployed Power BI dashboards consolidating supplier performance, shipment costs, and inventory KPIs from SAP and OTM, giving leadership real-time operational visibility.
- Collaborated with cross-functional teams to translate supply chain business requirements into scalable data models and dashboards.

## ACADEMIC PROJECT EXPERIENCE

**Predictive Analytics for Car Insurance | August 2024 – December 2024**

- Leveraged machine learning algorithms, including Decision Tree, Logistic Regression, and Neural Networks, to analyze 10,000+ consumer records, reaching a 80% AUC in predicting high-risk car insurance claims.
- Developed an end-to-end ML pipeline with custom feature engineering, which enhanced model accuracy and automated the insurance claim prediction workflow.

**Visualizing Pandemic Impact in Texas | January 2024 – May 2024**

- Standardized CDC mortality datasets in SQL and Excel for cause-specific analysis; reduced inconsistencies by 25%.
- Applied Python-based statistics to detect patterns in disease-specific deaths during COVID-19.
- Designed Tableau dashboards with year-over-year comparisons to support public health reporting.

## CERTIFICATIONS

- Azure Data Fundamentals by Microsoft
- Generative AI - openSAP 2023 Edition by SAP (AI for business intelligence and data automation)
- Certified AI Associate by Salesforce (AI for CRM Integration, CRM Analytics)
