

Sai Sreekar Raju Konduru

Atlanta, Georgia, USA | +1(470)-662-6294 | saisreekarraju@gmail.com | [LinkedIn](#) | [Github](#)

EDUCATION

Georgia State University J.Mack Robinson college of Business

Atlanta, USA

Master of Science in Data Science and Analytics (CGPA: 3.94/4.3)

Aug 2024 - Dec 2025

Relevant Coursework – Database Systems, Advanced Machine Learning, Data Mining, Deep Learning, Statistical Foundations, Data Programming

CMR Institute of Technology

Hyderabad, India

Bachelors of Technology in Computer Science (CGPA: 8.70/10)

Aug 2019 - Jun 2023

Relevant Coursework – Cloud Computing, Machine Learning, Web Technology, Linux Servers, Android Applications, Linux.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, SQL, R

NLP/Generative AI: Sentence-BERT, FAISS, RAG, spaCy, Hugging Face, BLIP

Machine Learning : TensorFlow, PyTorch, scikit-learn, Keras, LLaMA, SHAP

Data & Cloud: AWS, Azure, GCP, Apache Spark, PySpark, Pandas, NumPy, XGBoost, Tableau

Core CS: Data Structures & Algorithms, OOP, Operating Systems, Database Systems, System Design

Tools & Others: Git/GitHub, Docker, Power BI, MS Excel/PowerPoint, Linux

EXPERIENCE

Research Data Scientist, Shepherd Center & Better Business Bureau

Aug 2024 – Apr 2025

- Applied **Random Forest and XGBoost models** to analyze cognitive impairment data, achieving strong predictive performance ($R^2=0.65$, $AUC=0.80$) and using **SHAP** for interpretability.
- Built **interactive dashboards** consolidating survey, clinical, and third-party data, enabling researchers and clinicians to explore insights in real time.
- Conducted analysis of **minority-owned businesses across Georgia** to support diversity and equity-focused initiatives.
- Presented research findings to cross-functional clinical and policy teams, directly influencing workflow improvements and healthcare discussions.

Data Analyst , Infor

Jul 2023 – Jul 2024

- Automated reporting workflows using **Python and SQL**, reducing manual effort by **40%** and improving overall efficiency.
- Designed and maintained **Tableau dashboards** to track engagement, churn, and revenue, while improving query performance for faster insights.
- Developed and optimized ETL pipelines to integrate data from finance, product, and marketing teams, ensuring accurate and reliable analytics.
- Collaborated with product managers in **Agile sprints** to translate business requirements into data-driven features and recommendations.

PROJECTS

Legal Document Summarizer- **RAG + GPT** | Sentence-BERT, FAISS, OpenAI API, Streamlit, Docker

- Developed a **RAG pipeline** to extract legal clauses and generate PDF summaries with integrated Q&A functionality, reducing contract review time by **60%**.
- Deployed experiments and monitored results in **MLflow**, ensuring reproducibility and efficient model tracking.
- Delivered a user-friendly interface via **Streamlit and Docker**, enabling seamless testing by legal professionals.

Multi-Task Deep Learning- **GAN + RL + Detection** | TensorFlow/Keras, Faster R-CNN, BLIP, DQN

- Built an integrated system combining **GAN-based data generation**, **Faster R-CNN object detection (mAP 0.76)**, and **BLIP image captioning** for automated content analysis.
- Designed and trained a **DQN reinforcement learning agent** to coordinate tasks and improve efficiency across detection and captioning workflows.

Stock Price Prediction- **ML Pipeline** | Python, scikit-learn, Pandas, NumPy

- Processed and engineered features from over **2,600 financial records**, applying statistical transformations and time-series techniques.
- Tested multiple machine learning models; achieved best results with **Decision Tree (RMSE 0.0036, $R^2 = 0.9963$)** for stock price prediction.
- Applied findings to **portfolio risk optimization**, demonstrating practical use cases for financial forecasting.

CERTIFICATIONS

- Data Science Professional Certificate (Simplilearn)
- Python for Everybody (University of Michigan)
