SUMMARY

Experienced data analyst with 4+ years building predictive analytics, ETL pipelines, and cloud-native dashboards using SQL, Python, and AWS. Skilled in stakeholder reporting, forecasting, anomaly detection, data governance, KPI tracking, secure compliance reporting, EHR data analytics, and cross-functional collaboration in healthcare domains.

EXPERIENCE

Data Analyst

May 2024 - May 2025

Medtronic

Houston, Texas

- Designed Talend ETL workflows and Snowflake SQL queries to integrate and transform healthcare and EHR data; enabled predictive analytics, audit reporting, and ensured HIPAA compliance tracking across the systems.
- Built Power BI and Tableau dashboards on Snowflake and Excel data; delivered KPIs, claim rejection trends, and financial metrics, enabling real-time decisions, audit readiness, and regulatory data compliance reporting.
- Automated ad-hoc reports, data validation, and Excel exports using SQL, Power BI, Talend; cut manual effort 40%, improved data quality, and streamlined compliance tracking for billing workflows and HL7 data workflows.

IT Data Specialist

Aug 2023 - May 2024

University of Houston

Houston, Texas

- Built SQL and Python ETL pipelines using AWS and Snowflake to clean, transform, and prepare datasets; improved retrieval speed 25%, enabled dashboard reporting, and supported HIPAA-compliant data management.
- Designed Tableau dashboards using SQL, Excel, and PeopleSoft data; delivered KPIs, forecasts, and metrics that improved workflow visibility 20%, enabled data-driven decisions, and enhanced stakeholder reporting accuracy.
- Automated reporting, validation, and Excel exports using SQL, Python, SAS, and Jira; reduced manual effort 35%, improved data quality, and provided predictive analytics supporting compliance and operational efficiency.

Data Analyst – Healthcare Analytics

Jan 2022 – July 2023

Infosys

Hyderabad, India

- Developed Python and SQL ETL pipelines using AWS S3, EC2, and Azure Synapse to ingest 10K healthcare records; improved throughput 25%, ensured HIPAA compliance, and enabled HL7 claims and billing integration.
- Built Tableau dashboards on Hadoop data sets with 20K records; delivered KPIs, claims trends, and RCM metrics using Agile methodologies, enabling audit readiness, executive decisions, and stakeholder-driven reporting.
- Automated SQL-based workflows using Azure Data Factory, Jira, and Hadoop; reduced data errors 25% through CI/CD pipelines, anomaly detection, and orchestration supporting data governance in healthcare operations.

SKILLS

- **Programming Languages:** Python, SQL, R, Shell, Java, JavaScript, Scala, C, C#.
- **Web Technologies:** HTML, CSS, JavaScript, SQL Server, NoSQL, REST APIs, Flask, Angular, API Gateway.
- **Tools:** SQL, Excel, Tableau, Power BI, Python, R, Snowflake, Azure (Synapse Analytics, Databricks, Data Factory), AWS (S3, Lambda, Glue, Redshift, API Gateway), Databricks, Apache Spark, Airflow, DBT, Jenkins, Git, MySQL, PostgreSQL, Alteryx, Jira, ServiceNow, Talend, MATLAB, Grafana, Flask, SAS, Informatica.
- **Technical Skills:** Data Engineering, ETL Pipelines, Data Modeling, Agile Methodologies, CI/CD Pipelines, Data Quality Assurance, Business Intelligence, Data Governance, Data Analytics, Data Visualization, KPI Reporting, Forecasting, Predictive Modeling, Statistical Analysis, A/B Testing, Data Storytelling, Stakeholder Communication, HL7, HIPAA, RCM, EHR data, Claims Processing, Audit Readiness, Compliance Reporting, Data Interoperability, Data Privacy Regulations, FHIR, Data Encryption, Reporting Automation, Data Audits.
- **Certifications:** AWS Certified Data Engineer Associate, Microsoft Certified: Azure Data Engineer Associate.

EDUCATION

University of Houston	CGPA 3.85
Master of Science in Computer Science	May 2025
Relevant Coursework: Artificial Intelligence, Statistical Methods in Research, Cloud Computing, Software Design, Digital Image Processing, Data Mining, Data Visualisation, Database Management Systems, Machine Learning.	
Jawaharlal Nehru Technological University	CGPA 3.8
Bachelor of Technology in Computer Science	June 2023
Relevant Coursework: Big Data Analytics, Software Testing, Data Structures and Algorithms, Operating Systems, Object Oriented Programming, Linear Programming, Linear Algebra, Web Development, Distributed Systems.	

PROJECTS

MRI Simulation Framework for Brain Analysis — Python, MATLAB, OASIS Dataset	Jan 2024 – May 2024
University of Houston	Houston, Texas

- Developed an MRI simulation pipeline using Python and MATLAB with the OASIS dataset, optimizing T1/T2* contrast maps and voxel sequences to improve QA diagnostic pattern detection for radiology image analysis.
- Built statistical profiling, preprocessing, and signal transformation logic to reduce the image entropy by 20%, enhancing tissue boundary clarity with optimized filter design, denoising algorithms, and QA-aligned validation.
- Applied Agile workflows and Jira to coordinate 150 development tasks, ensuring reproducibility, parameter traceability, and cross-platform script integration for MRI imaging workflows and simulation review support.

Data Visualization of Global GDP Trends — Python, MySQL, AWS, Pygal, Jira	Jan 2025 - May 2025
University of Houston	Houston, Texas

- Built efficient Python and SQL ETL pipelines on AWS S3 and EC2 to clean, transform, and prepare GDP data for 200 countries; improved ingestion speed 20% and delivered analytics-ready datasets supporting dashboards.
- Developed interactive dashboards using Pygal and Python to visualize GDP trends effectively; enabled 30% faster data exploration of 1,000+ records through dynamic filtering, styling, and stakeholder-focused data storytelling.
- Created robust Python scripts using Matplotlib to improve data profiling and reduce quality issues by 15%; enhanced reporting accuracy and supported data-driven decisions through stakeholder-aligned validation steps.

CartWhisperer — AWS Lambda, API Gateway, DynamoDB, Azure, Snowflake	Aug 2024 - Dec 2024
University of Houston	Houston, Texas

- Built serverless ETL pipelines using AWS Lambda, Snowflake, and Azure Factory to ingest and validate 1,000+ transactions; improved data quality 20% and enabled KPI reporting supporting scalable e-commerce analytics.
- Integrated DynamoDB and API Gateway for structured data storage supporting daily cart analytics for 500 users; enhanced query data performance 20% and delivered analytics-ready datasets for operational reporting.
- Automated reporting and monitoring of cart data using AWS S3, audit logs, and GitHub Actions; reduced errors 25% and supported business insights through dashboard-ready data exports and stakeholder-aligned workflows.

Business Operations KPI Dashboard — Python, SQL, Tableau, Power BI, AWS S3	Jan 2024 – May 2024
University of Houston	Houston, Texas

- Built Python and SQL pipelines on AWS S3 to clean, transform, and integrate operational data; improved data availability 25% and enabled reporting accuracy through data analytics-ready dashboards and KPI tracking.
- Designed Tableau and Power BI dashboards to visualize KPIs, trends, and forecasts; supported real-time insights, enhanced decision-making, and reduced manual report preparation by 30% with dynamic data visualizations.
- Conducted data validation, profiling, and anomaly detection on operational datasets; improved data reporting accuracy 20% and delivered clean, verified data to support executive reviews and stakeholder-driven analytics.

ACHIEVEMENTS

- **Merit Scholarship, University of Houston** Aug 2023
Awarded competitive academic scholarship of 5000 dollars with in-state tuition for academic excellence in MS.
