

# Sai Tejaswar Reddy Dalli

+1 (562) 569-3720 | [saitejaswar84@gmail.com](mailto:saitejaswar84@gmail.com)

**LinkedIn:** [www.linkedin.com/in/tejaswar](https://www.linkedin.com/in/tejaswar) | **GitHub:** [github.com/tjswar](https://github.com/tjswar)

**Published Apps:** MediLook (App Store) • Instancify (App Store)

## Education

California State University, Dominguez Hills – Carson, CA

Master of Science in Computer Science | GPA: 3.515 | 2023–2025

Raghu Engineering College – India

Bachelor of Technology in Computer Science & Engineering | 2015–2019

## Technical Skills

**Languages:** Python (Pandas, NumPy, Scikit-learn, FastAPI, Flask, Matplotlib), SQL, Familiar(JavaScript, Swift, C, C++ )

**AI/ML & Data Science:** LLMs (Llama 2, GPT-4), NLP, Neural Networks, TensorFlow, PyTorch, Hugging Face, Data Wrangling, Data Visualization

**Frameworks & Tools:** LangChain, OpenAI APIs, Streamlit, Docker, Kubernetes, Git, GitHub, VS Code, Xcode, Linux

**Cloud & Big Data:** AWS (EC2, S3, Lambda, SageMaker), Hadoop, Spark, Hive, HDFS, ETL Pipelines, API Integrations

## Professional Experience

**Infosys Pvt Ltd – Senior Software Engineer (Client: JG Summit Holdings)**

Feb 2020 – Jan 2023 | India

- Developed and optimized Python-based automation workflows and data pipelines, improving reporting and analytics efficiency by 35%.
- Built and deployed ETL pipelines to process large-scale financial and supply chain data for JG Summit, enabling faster business insights.
- Designed RESTful APIs in Python to integrate SAP systems with internal applications, reducing manual data transfers.
- Implemented real-time monitoring dashboards and alerting systems, reducing incident response time by 30%.
- Partnered with client stakeholders and business analysts to translate requirements into scalable software solutions.
- Authored technical documentation and reusable Python libraries, reducing onboarding time for new engineers.
- Introduced automated test frameworks in Python, cutting QA effort by 40% and increasing release confidence.

## Projects

### I. Published Applications

- **MediLook** – Mediation Lookup (App Store): Developed an iOS app that securely scans prescriptions using OCR, enabling patients and caregivers to track medications. Published on the App Store and used by healthcare students.
- **Instancify** – AWS Cost Management App (App Store): Created an iOS app to monitor AWS EC2 instances, track spending, and auto-stop idle resources. Helped users reduce AWS costs by 15–20%.

### II. Academic & Research Projects

- **Domain-Specific AI Model Fine-Tuning:** Fine-tuned Llama 2 for finance and medical text classification, achieving >90% F1-score. Deployed on AWS SageMaker with interactive API and evaluation metrics.
- **Intelligent Document Processing:** Built a semantic search system using LangChain + GPT-4 + FAISS, allowing users to query documents with natural language. Reduced document lookup time by 70%.
- **Big Data Analytics Pipeline:** Designed Python ETL workflows on Hadoop & Spark for datasets exceeding 100GB, enabling large-scale data processing and real-time visualization.
- **Semantic Segmentation for Object Detection:** Implemented U-Net in TensorFlow for vehicle/pedestrian detection, optimized via hyperparameter tuning (IoU score: 0.87).
- **VR Blockchain Visualization:** Built a 3D interactive visualization tool for Algorand blockchain transactions using A-Frame, Three.js, WebGL, used in classroom demos.

## Certifications

- AWS Certified AI Practitioner
- AWS Academy Graduate – Machine Learning through Application
- Scientific Computing with Python
- Generative AI with AWS (Udacity)
- Infrastructure & Application Modernization with Google Cloud
