PROFESSIONAL EXPERIENCE

Data Engineer | Bytes Consultancy Services | United States

July 2024 – Present

- Performed installations, upgrades, and maintenance of Oracle-based applications, ensuring stability and optimal performance across enterprise systems.
- Provided remote technical support for application issues, collaborating with cross-functional teams to troubleshoot and resolve incidents within defined SLAs.
- Managed Linux-based servers for hosting critical applications, including patching, configuration, and monitoring to maintain system availability at 99.9%.
- Administered Tomcat and other middleware environments to deploy and support enterprise web applications securely and efficiently.
- Spearheaded the design and implementation of high-performance ETL pipelines using AWS Glue and Spark, processing datasets exceeding 100 TB, ensuring scalability and efficiency.
- Enhanced operational efficiency by 30% through the automation of data workflows using Python and workflow orchestration tools.
- Assisted non-technical stakeholders by translating technical information into actionable insights, improving user understanding and reducing support requests by 30%.
- Performed regular system health checks and led disaster recovery efforts during 10+ system downtimes, reducing recovery time by 95%.

Dean Suites, Rawls College of Business, Texas Tech University | Student Assistant | Texas, United States

Aug 2022– May 2024

- Managed and analyzed large datasets related to academic performance and operations, using SQL, Python, and Advanced Excel to support strategic decision-making. Improved data integrity and accessibility, resulting in enhanced academic and administrative processes.
- Developed, maintained, and optimized custom reports and dashboards using Power BI and Tableau, providing actionable insights that informed faculty decisions and strategic planning. Streamlined report generation processes, reducing time-to-insight by 20%.
- Collaborated with faculty to design and implement data pipelines, ensuring efficient data collection, transformation, and loading(ETL).
- Employed SQL and Python for data extraction and transformation, enhancing data quality and consistency across systems.
- Leveraged advanced Excel functions, including VLOOKUPS, pivot tables, INDEX/MA TCH, IF, and SUMIF, to analyze trends and generate comprehensive reports. This work facilitated data-driven decision-making, improving academic performance and operational efficiency.

Junior Data Engineer | Wipro | India

July 2020 – July 2022

- Supported Oracle-based enterprise systems by performing application maintenance, upgrades, and patching, ensuring compliance with IT standards and security policies. Configured and maintained Unix/Linux environments for hosting databases and application servers, optimizing performance and resource utilization.
- Worked with PL/SQL and Java-based systems to integrate custom enhancements into existing administrative solutions.
- Designed and optimized ETL pipelines using AWS Glue and SSIS to seamlessly ingest, transform, and manage real-time data for enterprise-level reporting systems.
- Improved database performance by 25% through advanced schema optimization, index tuning, and restructuring of critical MySQL queries.
- Delivered technical training and documentation to staff, enabling effective use of enterprise applications and reducing operational issues.

PROJECTS

Student Information System (SIS)

- Developed a web-based Student Information System using HTML, CSS, JavaScript, PHP, and MySQL, which streamlined attendance tracking and course management, reducing administrative workload by 50%.
- Implemented secure user authentication and role-based access control with PHP's Bcrypt algorithm, enhancing data security and accuracy by 30%, and designed a reporting module to improve insights through detailed attendance reports and visualizations

Sales Data Analysis

- Cleaned and standardized Amazon sales datasets to remove inconsistencies, ensuring accurate reporting and analysis.
- Used advanced Excel functions and pivot tables to compute key metrics like average sales, discount trends, and regional performance.
- Detected and resolved data quality issues to enhance dataset reliability, supporting strategic decisions with actionable insights.

TECHNICAL SKILLS

- Programming & Query Languages : Python, SQL, PL/SQL SparkSQL, R, Linux, Java
- Databases : MySQL, PostgreSQL, Oracle Database, Redshift
- Big Data & Data Engineering Tools : Hadoop, Hive, Spark, EMR, AWS Glue, SSIS
- Visualization Tools : Tableau, Power BI, Advanced Excel (VLOOKUP, XLOOKUP, INDEXMATCH, SUMIF)
- Cloud Services : AWS (Lambda, EC2, IAM, Athena, RDS, Glue), GCP (BigQuery, DataPrep, Looker)
- Networking Concepts : TCP/IP, DNS, LAN/WAN, Firewall, Routing
- Other Skills : Google Suite, ETL Pipeline Design, Data Modeling, Data Warehousing

EDUCATION

Texas Tech University, Lubbock, TX

Aug 2022 - May 2024

Master of Science in Computer Science (GPA- 3.83/4.0)

CERTIFICATIONS

AWS Certified Data Engineer – Associate (Earned: January 2025), AWS Certified Cloud Practitioner (Earned: July 2024), Database Design by the Oracle Academy, Google IT Support, Cisco Certified Network Associate (CCNA), and Data Analytics.
