

SAIVASAVI BANDARU

saivasavibandaru1997@gmail.com. 475-351-(6443)

PROFILE SUMMARY

- Health Informatics professional with a strong clinical background and over 3 years of experience supporting enterprise health IT systems. Proven success in **EMR/EHR optimization, clinical workflow analysis, and interface configuration**. Skilled in **systems configuration, user access management, HL7 integration**, and providing **technical application support** to interdisciplinary teams. Known for driving improvements in **data integrity, regulatory compliance, and system usability** across healthcare environments.

WORK EXPERIENCE

Clinical Informatics Analyst **May 2025- Present**
Tech Robots, Cary, NC

- Provided **technical support for EMR systems and third-party clinical applications**, assisting in **system configuration, interface testing, and issue resolution** across multiple healthcare clients; improved issue resolution time by **30%**.
- Designed and implemented **custom data validation workflows**, ensuring **99.9% data accuracy** across patient records submitted via HL7 and FHIR-based interfaces.
- Managed **user roles and access controls** for over **150 clinical and administrative users**, aligning with HIPAA and organizational policies for **data security and audit compliance**.
- Collaborated with cross-functional teams to execute **system upgrades, end-user training, and documentation**, reducing post-implementation support requests by **40%**.

Health Information Specialist **Sep 2024- Apr 2025**
The Plastic Surgery Center, Red Bank, NJ

- Resolved chart errors, updated demographic data, and supported scheduling and documentation accuracy in Nextech EMR.
- Partnered with administrative and clinical staff to implement improvements in intake workflows and patient access.
- Provided EMR training and support to clinical staff, enhancing documentation accuracy and compliance with HIPAA and TJC standards.
- Assisted in transition planning for system improvements, identifying integration points across scheduling, billing, and lab results.
- Maintained and optimized Nextech EMR databases, improving structured data capture for clinical research and operational reporting.
- Conducted data validation and record linkage for patient-level analytics, supporting documentation integrity and quality outcomes measurement.
- Partnered with clinical teams to perform EMR-based retrospective data analysis, contributing to workflow insights and performance metrics.
- Participated in reporting automation and template development for better data visualization and accuracy across patient records.
- Supported in tracking and trending KPIs and maintained controlled spreadsheets, master list of documents, and up-to-date files for Investigations, CAPA, and Audits.

Clinical Data Analyst **Sep 2023 – Aug 2024**
Carnegie Soft Corp, Princeton, NJ

- Worked on EMR data migration and validation for ambulatory care systems, ensuring integrity of patient and encounter data.
- Developed structured test plans for clinical scenarios and supported implementation teams during go-live phases.
- Generated data quality reports and documented system defects using Jira and internal tracking tools.
- Supported process validation activities, including drafting and executing IQ/OQ/PQ protocols for diagnostic assay development and manufacturing workflows.

Clinical System Analyst **Nov 2019–Nov 2022**
Sri Datta Hospitals, Guntur, India

- Spearheaded the **implementation and optimization of a hospital-wide EMR system**, collaborating with **3+ IT vendors** and **5+ clinical departments**, ensuring **100% compliance** with documentation standards for over **500+ patient encounters daily**.
- Acted as a **cross-functional liaison** between pharmacy, nursing, and IT teams to **configure 1,200+ drug formulary records, automate dose calculators, and enable real-time drug-allergy interaction alerts** in the EMR.
- Performed **workflow analysis** across inpatient medication ordering processes, leading to a **25% reduction in transcription errors** and **30% faster order processing** through customized **EMR form and template redesign**.
- Supported and monitored **HL7 interface testing** across 3 third-party lab and pharmacy systems, achieving **99.5% transaction success rate** during post-go-live evaluation.
- Contributed to **2 major EMR version upgrades**, assisting in **UAT (User Acceptance Testing), bug reporting, and change control documentation**, which resulted in **zero critical issues post-deployment**.

- Designed and managed **user role-based access** for 70+ pharmacy and clinical staff in the EMR, ensuring **HIPAA-compliant security configurations** aligned with hospital policies.
- Delivered **EMR onboarding and refresher training** to **100+ clinicians and administrative users**, resulting in a **40% decrease in EMR-related support tickets** within 3 months.
- Played a key role in clean room facility maintenance, overseeing environmental conditions, cleanliness, and adherence to standard operating procedures (SOPs) for a controlled and compliant manufacturing environment.

EDUCATION

Masters in Health Informatics	Jan 2023- Apr 2024
Sacred Heart University, Fairfield, CT	GPA- 3.8/4.0

ACADEMIC PROJECT **Jan 2024**

Exploratory Analysis of the MIMIC-IV Dataset

- Utilized SQL queries in PostgreSQL and SQL Workbench to explore data structure and extract relevant tables concerning patient demographics, diagnoses, procedures, interventions, medications, and vital signs. Implemented data preprocessing techniques using Python and pandas, including handling missing values, standardization, normalization, and creating derived features like the Charlson Comorbidity Index. Conducted comprehensive exploratory analysis within the ICU setting, focusing on patient characteristics, diagnoses, procedures, medication usage, and temporal trends. Employed various data visualization techniques with libraries such as matplotlib and seaborn to create informative plots and charts depicting distributions, relationships, and temporal trends. Integrated Tableau for advanced data visualization, developing interactive dashboards to showcase key insights and trends in critical care settings.

CERTIFICATIONS

- Adult First Aid/CPR/AED by American Red Cross.
- Career Essentials in Data Analysis by Microsoft and LinkedIn.

TECHNICAL SKILLS

Data Analytics | SQL | SAP | Data Modeling | Business Intelligence | Tableau | Looker | GCP BigQuery | UAT Testing | Requirements Gathering | Financial Analysis | Reporting Solutions | Data Visualization | Business Process Analysis | Stakeholder Communication | System Configuration | Change Control | Workflow Documentation | Cross-functional Collaboration | End-user Training | Requirements Gathering | Data Flow Analysis | Application Support | Healthcare IT | Cross-functional Communication | End-user Training | Nextech EMR | End-User Support | Provider Workflow Optimization | JIRA | HIPAA | TJC | System Build | Clinical Informatics | | EPIC | Nextech | HL7 | Clinical Documentation Improvement

Tools: Microsoft Word, Excel | PowerPoint | SharePoint | Outlook | Power BI | JIRA software.
