

Sai Vikram Gurram | Data Analyst

TX, USA | +1-260-515-6303 | saivikramgurram2@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with nearly **3 years of experience** in healthcare and financial services, delivering insights that improved patient outcomes, reduced reporting delays, and supported financial planning. Experienced in designing dashboards, streamlining reporting processes, and building forecasting models. Strong focus on turning complex data into actionable strategies that drive measurable results for business and leadership teams.

TECHNICAL SKILLS

Programming & Data Science: Python (Pandas, NumPy, Scikit-learn, PySpark), R (tidyverse, caret), SAS, SQL, Data Cleaning, Exploratory Data Analysis, Hypothesis Testing, Statistical Modeling, A/B Testing

Machine Learning & AI: Regression, Classification, Decision Trees, Random Forest, XGBoost, Time Series Forecasting, Feature Engineering, Model Evaluation, Model Deployment (Flask, FastAPI, Streamlit)

Data Engineering & ETL: Apache Airflow, AWS Glue, Azure Data Factory, Databricks, SQL Server Integration, API Integration, Data Pipelines, Data Transformation

Data Warehousing & Big Data: Snowflake, Redshift, BigQuery, Delta Lake, S3 Data Lakes, Spark

Business Intelligence & Visualization: SAP (Power BI, HANA reporting, Advanced DAX, Data Modeling), Tableau, Looker, Excel (Pivot Tables, Power Query), Plotly, Matplotlib, Seaborn

Cloud Platforms: AWS (S3, Redshift, SageMaker), Azure (Synapse, Databricks, ML Studio, Microsoft Fabric Lakehouse), GCP (BigQuery, Vertex AI)

Project Management & Collaboration: Jira, Scrum, Agile, Stakeholder Collaboration, Cross-Functional Teaming

Domain Knowledge: Healthcare Analytics, Financial Services, HIPAA Compliance, Risk Analysis

Soft Skills: Data Storytelling, Problem Solving, Executive Communication, Collaboration

PROFESSIONAL EXPERIENCE

Humana, TX, USA

Jan 2025 - Current

Data Analyst

- Automated SQL pipelines and ETL workflows with Airflow and AWS Glue, cutting reporting latency by 35% and improving claims data quality for compliance and finance teams.
- Designed Tableau and Power BI dashboards consolidating healthcare cost, utilization, and patient outcomes, enabling executives to track KPIs in real time and spot cost-saving opportunities.
- Increased readmission risk prediction accuracy by 21% through XGBoost models, helping clinical teams reduce avoidable hospitalizations and improve patient satisfaction.
- Migrated 5M+ monthly claims into Snowflake and Redshift, creating centralized repositories that standardized reporting across actuarial, compliance, and operations.
- Partnered with engineering teams to re-architect ETL workflows, reducing ingestion failures by 28% and boosting processing throughput.
- Conducted A/B testing on patient engagement campaigns, identifying interventions that improved preventive care adoption by 18%.
- Built Flask and Streamlit applications for actuarial simulations, cutting premium adjustment analysis time by 50% and giving executives self-service tools.
- Conducted a Snowflake Proof of Concept (POC) to validate scalability and performance for enterprise adoption.

Mphasis, India

Aug 2021 - Aug 2023

Data Analyst

- Transformed and validated 10M+ financial records using SQL, Pandas, and PySpark, cutting manual preparation time by 40% and accelerating portfolio and risk analysis.
- Automated Tableau and Looker dashboards to track revenue, expenses, and profitability, saving 10+ reporting hours weekly and enabling faster executive decisions.
- Built regression and time-series models with 92% accuracy to forecast cash flows and claims volume, improving resource allocation and financial planning.
- Migrated legacy ETL workflows into Azure Data Factory and Databricks, ensuring scalable, standardized financial data pipelines.
- Performed statistical testing on financial controls and product performance, providing evidence for compliance and investment strategies.
- Developed customer segmentation models, enabling targeted cross-sell campaigns and improving retention in high-value segments.
- Delivered Power BI and Databricks dashboards that visualized profitability, liquidity, and risk exposure for leadership reporting.

ACHIEVEMENTS

- Improved patient outcomes at Humana by boosting readmission risk model accuracy 21%, reducing preventable hospitalizations.
- Cut compliance reporting turnaround by 35% through SQL and ETL automation.
- Saved 10+ weekly hours at Citigroup by automating dashboards, enabling faster leadership reporting.
- Reduced manual data preparation by 40% through large-scale financial data cleaning and transformation.

PROJECTS

End-to-End Customer Churn Analysis | SQL Server, Power BI, Python (scikit-learn)

- Designed an ETL pipeline in SQL Server to process 7K+ telecom customer records, preparing data for analysis and reporting.
- Developed a Random Forest model (ROC-AUC: 0.85) to identify at-risk customers, providing actionable retention insights.
- Integrated predictions into Power BI dashboards with advanced DAX for real-time monitoring.

EDUCATION

Master of Science, Computer Science | Purdue University, Fort Wayne, IN, USA

May 2025

Bachelor of Engineering, Electronics and Communication Engineering | Vellore Institute of Technology, Vellore, India

May 2023

CERTIFICATION

Microsoft Certified: Power BI Data Analyst Associate | **Microsoft Certified:** Fabric Analytics Engineer Associate

SQL Certification - HackerRank | **Python for Data Science** - Udemy
