

KURRA SAI VIRAJ

New York, New Jersey | 908-294-6044 | SK3573@njit.edu | <https://www.linkedin.com/in/kurra-saiviraj-5a0550232/>

SUMMARY

Detail-oriented Software Engineer with six months of hands-on experience in full-stack and web development at SysIntelli. Currently pursuing a master’s degree, I am eager to leverage my skills and academic knowledge in a full-time role. Adept at solving complex problems and committed to continuous learning and growth in the field of software engineering.

EDUCATION

NEW JERSEY INSTITUTE OF TECHNOLOGY	New York, NJ
Master of Science in Computer Science - 3.3/4 GPA	Sept 2023-Dec 2024
Relevant Coursework - Security and Privacy, Machine Learning, Cloud Computing	
Vellore Institute of Technology	Andhra Pradesh, India
Bachelor of Technology, Computer Science – 8.00/10 GPA	July 2019-May 2023
Relevant Coursework - Web technologies, Object Oriented Programming, Data Structures, Machine Learning	

SKILLS

Programming languages: Java, Python, JavaScript, R, CSS
Technologies and Frameworks: Git, Linux/Unix, Pandas, NumPy, Matplotlib, Operating Systems, HTML, SQL, Django, Google Colab, Scikit-Learn, React JS, Node JS, AWS, Database Management Systems, Software IDEs like VS Code
Soft Skills: Team work, coordination skills, Analytical skills, Detail oriented, Time management

WORK EXPERIENCE

Sysintelli	
Full Stack Developer	Jan 2023 – June 2023
- Engineered and optimized web applications using Java, HTML, CSS, JavaScript, and SQL, enhancing user experience and interface - Collaborated with a team of developers to deliver high-quality software solutions, improving project delivery time by 20%. - Spearheaded the development of new features that increased application functionality, leading to a 15% boost in user engagement. Presented project outcomes to stakeholders, demonstrating clear and concise communication skills, which contributed to a 10% increase in project approvals.	
1 Stop Company	
Software Engineering Intern	Jan2021–Aug2023
- Delivered impactful projects in Artificial Intelligence (AI), Internet of Things (IoT), and Natural Language Processing (NLP), contributing to cutting-edge technology solutions. - Developed a comprehensive programming practice tool that supported 10 advanced skill areas, allowing programmers to enhance their coding abilities across multiple languages. - Collaborated with a team of engineers to design and deploy scalable solutions, meeting project deadlines and exceeding performance expectations. - Utilized modern software development methodologies and best practices, ensuring high code quality and maintainability.	

PROJECTS And CERTIFICATIONS

AWS CERTIFIED DEVELOPER , AWS CERTIFICATION SUCCESSFULLY COMPLETED	
Text File to Numerical Data Converter	
- Developed a robust Java application to convert text files into numerical data formats, facilitating data processing and analysis. - Implemented efficient file parsing and data transformation algorithms, resulting in a 40% reduction in processing time. - Integrated error handling and validation features to ensure data accuracy and integrity.	
Interactive Web Layouts	
Created visually appealing and responsive web layouts using HTML and CSS, enhancing the user experience across various devices. Developed and implemented custom CSS styles and media queries, resulting in a 50% improvement in mobile and tablet accessibility.	
Artificial Intelligence Project: Stellar Classification	
- Executed a sophisticated AI project for classifying stellar objects using machine learning techniques and data analysis. - Presented project outcomes to academic peers, highlighting contributions to the field of astronomy and AI research.	

PUBLICATIONS AND PATENTS

"ip2vec," published in the *International Journal of Scientific Research* [Paper Link](#) ISSN: 2456-3307, Manuscript Number: CSEIT2390553
This research article explores advancements in vector representation methodologies.
