

SAI ABHIRAM GODASI

Texas | (551) 465-6067 | saiabhiramgodasi@gmail.com | [linkedin.com/in/sai-abhiram-godasi](https://www.linkedin.com/in/sai-abhiram-godasi)

SUMMARY

- **Achievement-driven data analyst** with **3+ of experience** specializing in pharmaceutical **sales data analysis, performance reporting, and forecasting.**
- Experienced in **leveraging data-driven insights to enhance patient outcomes, ensure data accuracy, and optimize clinical collaboration** using **healthcare metrics and KPIs.** Proficient in tools such as **Tableau, Power BI, and Excel** for data visualization and analysis.
- Skilled in **developing and implementing strategic plans,** integrating **advanced machine learning models (Python, Pandas, NumPy)** for deeper insights, and **driving improvements in healthcare quality** through effective use of **SAS.**
- **Expertise in financial data analysis, cost optimization, and forecasting** using tools such as **Excel, Power BI, and AWS services (EC2, S3, RDS).** Proficient in **ETL processes, regression models, and hypothesis testing** to support informed decision-making and enhance operational efficiency.
- **Expertise in SQL for robust database management,** ensuring data integrity and accessibility for detailed analysis and reporting.
- **Extensive collaboration with cross-functional teams** to extract and interpret complex data, supporting strategic decision-making in drug development and marketing initiatives.
- **Possessed strong analytical acumen,** coupled with effective communication and problem-solving skills, crucial for delivering impactful, **data-driven solutions in dynamic and fast-paced environments.**

SKILLS

Programming Language:	Python, SQL, R
Methodologies:	SDLC, Agile, Waterfall
Packages:	NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Seaborn
Visualization Tools:	Microsoft Power BI, QlikView, Looker, Google Data Studio, Tableau, Advanced Excel (Pivot Tables, VLOOKUP)
IDEs:	Jupyter Notebook, Visual Studio Code, PyCharm
Database:	MongoDB, MySQL, PostgreSQL, Snowflake
Cloud Technologies	AWS (Amazon Web Services)
Version Control Tools:	Git, Jenkins, GitHub
Operating Systems:	Windows, Linux
Processing & Workflow Orchestration	AWS Glue, SSIS
Data Storage & Management	Data Warehousing, Data Transformation
Reporting Tools	SSRS
Analytical & Computational Methods	Probability Distributions, Confidence Intervals, ANOVA, Hypothesis Testing, Regression Analysis, Linear Algebra, Machine Learning Algorithms, Advanced Analytics, Data Mining, Data Visualization, Data Storytelling, Data Cleaning, Data Wrangling, Association Rules, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling
Soft Skills	Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving.
Certifications	AWS Cloud Practitioner, Tableau Desktop Specialist

EDUCATION

Master of Science in Engineering Data Science – University of Houston, Texas
Bachelor of Technology in Electronics & Communication Engineering – Vellore Institute of Technology, India

HCA Healthcare, Texas

Data Analyst

Aug'2023 – Present

- Conducted statistical analysis on pharmaceutical sales data, achieving a 20% improvement in forecasting accuracy using Excel.
- Developed interactive Power BI dashboards, enhancing visualization of clinical trial data, patient outcomes, and healthcare operational metrics across multidisciplinary teams.
- Utilized Python for ETL processes, ensuring data reliability and reducing discrepancies by 15% in datasets sourced from EHR systems, claims databases, and patient registries.
- Partnered with cross-functional teams to extract actionable insights from healthcare data, supporting strategic decisions in pharmaceutical R&D and market access strategies.
- Implemented scalable AWS cloud architectures to support Java-based health informatics applications, ensuring secure, compliant, and cost-efficient solutions.
- Applied Looker for data visualization, improving the accessibility and comprehension of healthcare data insights.
- Employed Python libraries such as Pandas, NumPy, and Matplotlib to clean, analyze, and visualize large datasets, driving deeper insights and informed decision-making.
- Created dynamic and interactive dashboards using Tableau, transforming complex data into intuitive visual representations to support strategic decision-making.
- Developed healthcare KPIs to measure patient outcomes and operational efficiency, leading to a 15% improvement in patient care quality.
- Utilized Python extensively for statistical analysis and data manipulation, developing machine learning models to enhance predictive analytics and patient risk stratification.
- Conducted variance analysis on healthcare expenditure and patient outcomes using Microsoft Excel and SQL, identifying cost-saving measures, and improving clinical outcomes by 15%.
- Monitored key healthcare performance indicators (KPIs) with Tableau, Power BI, and Excel, enhancing the accuracy of quality metrics tracking by 30% and elevating care standards by 20%.
- Implemented machine learning models using Python and TensorFlow, driving predictive analytics and personalized medicine initiatives.
- Collaborated with clinical and IT teams to ensure data accuracy and consistency in patient records, employing SQL, which bolstered data reliability by 25% and improved interdisciplinary communication by 15%.

Birlasoft, India

Data Analyst

Aug'2019 – Jul'2022

- Prepared and presented comprehensive financial reports, dashboards, and visualizations using Power BI and Microsoft Excel, enhancing stakeholder satisfaction with financial reporting by 30% and improving decision-making speed by 20%.
- Performed variance analysis and financial forecasting using advanced R features, increasing data processing efficiency by 35% and improving financial insight reliability by 25%.
- Analyzed financial data using Python with Pandas, NumPy, and Matplotlib, improving through statistical modelling and visualization.
- Implemented KPI analysis for financial performance, achieving a 35% improvement in project timelines.
- Automated financial data pipelines using ETL frameworks like Airflow and Luigi, reducing manual intervention by 20% and ensuring data integrity throughout the financial data lifecycle.
- Communicated complex analytical results to stakeholders with strong written and verbal communication skills, ensuring clarity and actionable insights.
- Utilized Tableau to transform raw data into accessible visual formats, significantly enhancing data transparency and enabling real-time analysis and reporting for various teams.
- Performed advanced data analysis using SQL, applying regression models and hypothesis testing to derive actionable insights, resulting in a 30% increase in predictive accuracy.
- Conducted A/B testing and performance analysis, identifying optimal marketing strategies that boosted conversion rates, thereby improving overall marketing efficiency.
- Designed and implemented customized Tableau visualizations tailored to specific business needs, facilitating a deeper understanding of data trends and patterns among non-technical stakeholders.
