PROFESSIONAL SUMMARY

Passionate iOS Developer with a Master's in Information Technology (4.0 GPA) from the University of Cincinnati. Experienced in developing and deploying iOS applications using Swift, SwiftUI, CoreML, Firebase, and AWS. Skilled in machine learning, API integration, multithreading, and performance optimization. Successfully built AI-powered applications, including a fruit nutrition analyzer using ML and a real-time cryptocurrency tracker. Strong problem-solving abilities, with experience mentoring 100+ students in iOS development. Seeking opportunities to innovate and contribute to impactful mobile applications.

EDUCATION

University of Cincinnati

Master of Science in Information Technology | GPA: 4.0/4.0

Cincinnati, OH

Jan. 2024 – May 2025

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, Swift, JavaScript, SQL, PL/SQL

Web Development: HTML5, CSS3, Bootstrap, Node.js, Express.js, React

iOS Development: SwiftUI, UIKit, CoreML, Core Data, SwiftData, MapKit, CoreLocation, AVFoundation, Vision, SDK, Multithreading, Memory Management, Unit Testing, Debugging, MVC, MVVM

Mobile Development: iOS Development (Swift, SwiftUI), React Native

Databases: Oracle, MySQL, Firebase, MongoDB

Cloud Services: AWS (Rekognition, S3), Firebase FireStore

Other Skills: macOS Development, Machine Learning, Data Structures and Algorithms, Object-Oriented Programming (OOP), Version Control System (Git), Problem-Solving, Computer Networks, Operating Systems(OS), Computer Science.

EXPERIENCE

iOS Developer

January 2024 – Present

University of Cincinnati

Cincinnati, OH

- Developed and deployed 3+ iOS applications, improving user engagement by 30% through optimized UI/UX.
- Built a Cryptocurrency Tracker App with real-time price tracking and historical analysis using CoinGecko API, managing over 100+ saved coins with SwiftData and securing user login with Firebase Authentication.
- Applied problem-solving and debugging techniques to resolve complex UI issues and improve app performance. Worked closely with team members to resolve production issues and enhance user experience, demonstrating strong teamwork and communication skills.
- Mentored 100+ students in Swift, SwiftUI, API integration, Firebase, and SwiftData, improving their iOS development skills by 40% based on lab evaluations.

PROJECTS

AI-Powered Fruit Nutrients Identification App | SwiftUI, CoreML, CreateML, Kaggle Dataset

- Developed an iOS application that identifies fruits using machine learning and provides instant nutritional information.
- Trained a CoreML model using CreateML on a 10,000+ image dataset sourced from Kaggle, achieving 90%+ accuracy in fruit classification.
- Integrated real-time camera scanning and photo library upload features for seamless fruit detection.
- Implemented multithreading to ensure smooth real-time processing and optimized memory management for efficient on-device inference, reducing classification time to under 2 seconds.
- Applied debugging and unit testing techniques to enhance model accuracy, performance, and reliability.

Personalized News Aggregator | SwiftUI, SwiftData, News API

- Developed an iOS app fetching 50+ news articles daily from News API, categorized across 8+ topics.
- Integrated SwiftData, enabling users to bookmark 200+ articles for offline reading.
- Designed a seamless TabView navigation across Home, Categories, Bookmarks, and Settings.
- Implemented multithreading to optimize API calls and background data loading without lagging the UI.
- Used debugging techniques to resolve UI inconsistencies and improve app performance.

Restaurant Finder App | SwiftUI, Yelp API, MapKit, CoreLocation

- Created an iOS app allowing users to find top-rated restaurants in 1000+ locations via Yelp API.
- Integrated the Yelp API to fetch real-time restaurant data, including ratings, reviews, and images.
- Implemented CoreLocation to fetch real-time user location and display nearby restaurants.
- Used multithreading to ensure smooth API data retrieval while keeping UI interactions responsive.
- Integrated MapKit, providing navigation and interactive maps for enhanced user experience.
