

Sai Charan Narige

Java Full Stack Developer

Email: saicharannarige009@gmail.com **Phone:** 312-684-9489 **LinkedIn:** linkedin.com/in/saicharannarige

Professional Summary

Results-driven **Java Full Stack Developer** with over **5 years of experience** designing and delivering secure, scalable, and high-performance enterprise applications across **retail, banking, and healthcare domains**. Skilled in the full **SDLC** under **Agile/Scrum** and Waterfall methodologies using **Jira** and **Confluence**. Expert in **Core Java 8** (Streams, Lambdas, Concurrency), **Spring Boot**, **Microservices**, and **REST/SOAP APIs**. Strong front-end expertise in **ReactJS**, **Angular**, and **TypeScript** with advanced UI/UX and state management using **Redux** and **GraphQL**. Cloud proficiency in **AWS** and **Azure**, CI/CD with **Jenkins**, **Docker**, and **Kubernetes**. Experienced with relational and NoSQL databases including **Oracle**, **PostgreSQL**, **MongoDB**, and **Cassandra**. Collaborative and detail-oriented engineer who ensures code quality, security, and performance through **unit testing**, **code reviews**, and **continuous integration**.

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL, HTML5, CSS3

Backend: Spring Boot, Spring MVC, Spring Cloud, Spring Security, JAX-RS, Apache CXF

Frontend: ReactJS, Angular, VueJS, Redux, Hooks, GraphQL, Bootstrap, jQuery, AJAX

Databases: Oracle, MySQL, PostgreSQL, DB2, MongoDB, Cassandra, DynamoDB

Cloud: AWS (EKS, EC2, S3, Lambda, SQS), Azure (AKS, App Services, Blob, AAD, Key Vault, Service Bus)

Monitoring: Splunk, ELK Stack, Prometheus, Grafana, Datadog, SLF4J, Log4j

Quality: SonarQube, Snyk.io, JaCoCo

Web Services: REST, SOAP, Feign Client, WebClient

Messaging: Kafka, RabbitMQ, ActiveMQ

Testing: JUnit, Mockito, TestNG, Cucumber, Selenium, Jasmine, Karma, Jest, Mocha, Chai; Postman, Swagger, JMeter

ORM: Hibernate, Spring Data JPA, JDBC, PL/SQL, Stored Procedures, Triggers, Indexing

DevOps: Jenkins, Docker, Kubernetes, Ansible, GitHub Actions, Azure DevOps; Maven, Gradle, Ant

Version Control: Git, GitHub, Bitbucket, SVN; Jira, Rally, TFS

Design: Factory, Singleton, Observer, UML (Use-Case, Sequence, Class Diagrams)

Professional Experience

JPMorgan Chase *Java Full Stack Developer* *September 2024 to Present - Chicago, Illinois*

- Developed **Spring Boot** microservices with **Spring Security** and **Spring Cloud**, enabling secure and scalable banking transactions.
- Engineered and deployed **RESTful APIs** via **Feign Client** and **WebClient**, facilitating integration with internal and partner systems.
- Transitioned legacy applications to a **microservices architecture** on **Azure Kubernetes Service (AKS)** using **Docker** containers.
- Delivered interactive **ReactJS** dashboards with **Redux** state management and **GraphQL** for efficient data retrieval.
- Introduced **Apache Kafka** and **ActiveMQ** to support event-driven messaging and near-real-time data streams.

- Utilized **Azure Blob Storage** and **Service Bus** for document storage and message queuing.
- Enhanced performance with optimized **Spring Data JPA** queries and **PL/SQL** scripts on **Oracle** and **MongoDB**.
- Delivered high-quality, test-driven code achieving over **85% unit test coverage** using **JUnit**, **Mockito**, and **Cucumber**.
- Deployed CI/CD pipelines through **Jenkins**, integrated with **SonarQube** and **Snyk.io** for static analysis and vulnerability scanning.
- Strengthened system observability with **Prometheus**, **Grafana**, and **Datadog** monitoring dashboards.

CVS Health

Java Full Stack Developer

July 2021 to August 2023

- Designed **Spring Boot** microservices for pharmacy workflows supporting millions of transactions daily under strict **HIPAA** guidelines.
- Created secure **REST APIs** and migrated legacy **SOAP services**, streamlining system integrations.
- Built reusable **Angular** components and reactive forms to enhance patient engagement portals.
- Leveraged **RabbitMQ** and **Kafka** for asynchronous communication across distributed systems.
- Implemented authentication with **OAuth2** and **JWT tokens**, ensuring encrypted end-to-end data exchange.
- Optimized queries and **Oracle stored procedures** for sub-second performance; utilized **MongoDB** for unstructured data.
- Deployed containerized services to **Azure Kubernetes Service (AKS)** with CI/CD in **Jenkins**.
- Defined APIs through **Swagger/OpenAPI** and secured secrets in **Azure Key Vault**.
- Monitored health and logs using **Splunk**, **ELK**, and **Grafana**; collaborated in Agile sprints using **Jira**.

eBay

Java Developer

June 2019 to May 2021

- Delivered **Spring Boot** services for order management, payment authorization, and delivery tracking at enterprise scale.
- Developed responsive front ends in **ReactJS** with Hooks and Redux, improving customer engagement.
- Devised **GraphQL APIs** to optimize query precision and response performance.
- Integrated third-party APIs for tax, logistics, and fraud detection while maintaining transactional integrity in **Oracle/PostgreSQL**.
- Orchestrated asynchronous streams through **Kafka**, processing high-volume analytics in **Cassandra**.
- Automated deployment to **AWS EC2** using **Docker**, load balanced via **ELB**, and monitored with **CloudWatch**.
- Created infrastructure as code via **Terraform**, enabling reproducible environments.
- Validated applications through **JUnit**, **Mockito**, **Selenium** and front-end testing with **Jasmine/Karma**.
- Applied continuous quality checks using **SonarQube**, **Snyk.io**, and **JaCoCo**.

Education

Master of Science in Computer Science
GPA: 3.30

Lewis University, Romeoville, IL

2025

Certifications

Oracle Certified Professional, Java SE Programmer

AWS Certified Developer

Microsoft Certified: Azure Developer Associate
