

Saif Ali Syed

Data Analyst

Chicago, IL | 773-577-4471 | saifsyed2025@gmail.com | [LinkedIn](#)

Professional Summary

Analytical and detail-oriented Data Analytics graduate with practical experience in Python, SQL, Tableau, and applied statistical techniques. Proven ability to clean, analyze, and visualize large datasets to drive business decisions and improve process efficiency. Skilled in hypothesis testing, regression analysis, and relational database management (MySQL, PostgreSQL). Adept at building dashboards and generating insights to support cross-functional teams. Actively seeking an opportunity to apply technical and analytical expertise in a data-focused role within a growth-driven organization

Education

Master of Science in Data Analytics | Indiana Wesleyan University, Merrillville, IN | 2025

Relevant Coursework: Statistical Analysis, Machine Learning, Data Visualization, Database Management

Bachelor of Commerce | Osmania University, India | 2019

Technical Skills

- Programming Languages:** Python (Pandas, NumPy, Matplotlib, Seaborn), R, SQL, Bash
- Data Manipulation & Analysis:** Pandas, NumPy, Group By operations, Data Merging & Joins, Data Cleaning & Wrangling
- Data Visualization Tools:** Tableau, Power BI, Matplotlib, Seaborn Dashboard development, Interactive Visual, Drill-down Report
- Statistical & Analytical Techniques:** Hypothesis Testing, A/B Testing, Linear & Logistic Regression, ANOVA, Time Series Analysis,
- Database Management Systems:** MySQL, PostgreSQL, SQLite, Microsoft SQL Server Writing complex queries, Data modelling, Stored procedures
- Cloud & Big Data Tools** (*optional if exposed*): Google Big Query, AWS S3, Redshift, Snowflake, PySpark (basics), Databricks
- ETL & Data Integration Tools:** Alteryx, Talend, SSIS (if applicable), Excel Power Query
- Scripting & Automation:** Python scripting for data automation, Shell scripting for scheduling tasks, Cron jobs
- Version Control & Collaboration:** Git, GitHub – Branching, Pull Requests, Team Collaboration
- Office & Productivity Tools:** Microsoft Excel (Advanced: Pivot Tables, VLOOKUP, Macros), Microsoft Word, PowerPoint
- APIs & Web Data Access:** REST APIs using Python requests, JSON/XML parsing, API token-based authentication

Professional Experience

Data Analyst | Kaiser Permanente, USA | Oct 2024 – Present

- Collaborated with clinical and operations teams to design a data-driven patient outreach system, increasing annual wellness visit compliance across targeted populations.
- Developed and automated ETL workflows using SQL and Python to extract and transform patient-level data from Electronic Medical Records (EMR) and claims databases.
- Built interactive Power BI dashboards to visualize appointment adherence, demographic response rates, and overall campaign performance metrics.
- Performed statistical analysis, including Chi-square tests and ANOVA, to uncover significant trends in engagement based on age groups, locations, and insurance types.
- Integrated data from Epic EMR, Salesforce Health Cloud, and internal data marts using Snowflake and Azure Data Factory for centralized reporting.
- Led A/B testing initiatives for personalized messaging, resulting in measurable increases in appointment bookings for under-engaged segments.
- Ensured compliance with HIPAA data governance standards, implementing secure access, audit trails, and privacy protocols across all reports and visualizations.
- Presented insights and recommendations to population health leadership and C-level stakeholders through executive reports and self-service dashboards.

Data Analyst | KPIT Technologies, India | Jun 2019 – Jul 2023

- Designed and deployed automated dashboards using Tableau and Power BI to track vehicle performance KPIs, reducing manual reporting time and improving data visibility for operations teams.
- Developed and optimized complex SQL and PL/SQL queries to extract and aggregate data from Oracle and SQL Server for real-time performance tracking.
- Implemented CI/CD pipelines using Azure DevOps to streamline deployment of data integration workflows and automated dashboard refreshes.
- Conducted A/B testing on UI improvements and software updates, contributing to a measurable increase in user engagement and feature adoption.
- Performed data cleaning and transformation on sensor and telemetry logs using Python (Pandas, NumPy) to prepare for anomaly detection and predictive modeling.
- Collaborated with engineering and QA teams to define business rules, validation criteria, and quality control checks, resulting in reduced data input errors.
- Documented ETL processes, data sources, and analytics workflows to enhance reproducibility and support knowledge transfer across teams.
- Assisted senior data analysts by generating executive summaries, KPI snapshots, and ad-hoc insights for strategic planning and quarterly business reviews.
