## Summary

Data-driven MBA candidate with 4+ years of experience in business analysis, financial modeling, and BI reporting across manufacturing, consulting, and academia. Skilled in Excel (VBA, pivot tables, macros), SQL, Python, Tableau, and Power BI with proven ability to automate workflows, build KPIs, and deliver insights that improve decision-making. Certified Lean Six Sigma Green Belt with expertise in root cause analysis, process improvement, and metric development.

## Professional Experience

### Mason School of Business, William & Mary

Sep 2024 - May 2025

Graduate Assistant - Data Analytics & Business Intelligence

Williamsburg, VA

- Delivered Excel (VBA, pivot tables, macros) and Python analytics labs for 40+ MBA students, creating reusable templates that improved classroom efficiency by 35%.
- Taught students to build Excel-based financial models using linear programming (Solver) to minimize/maximize functions such as cost, revenue, profit, and headcount, enabling adaptive data-driven decision-making.

### Sumitomo Drive Technologies

Jun 2024 - Aug 2024

Financial / Business Analyst Intern

Chesapeake, VA

- Collaborated with CFO and stakeholders to address a 6-month forecasting lag by integrating external shipment data (FedEx, UPS, Amazon) into Python models (FB Prophet, ARIMA, SARIMAX) with SQL integration, reducing planning errors by 15% and improving inventory allocation.
- Automated ETL workflows (Python, SQL Alchemy, Pandas) that transformed sales and supply chain datasets, reducing reporting cycle times by 40% and increasing data reliability.

### Capgemini

Aug 2021 - Jul 2023

Consultant - BI & Product Strategy (Hewlett Packard & Kohler Corp, US)

Kolkata, India

- Designed Tableau dashboards and Excel-based statistical models that provided executives with real-time workforce visibility, improving resource allocation by 15% across HP and Kohler projects.
- Manual processes consumed 15+ hours/week. Implemented Go and Python automation scripts for data processing, achieving 100% reporting accuracy and enabling developers to focus on additional client product requirements.

### Capgemini

Sep 2019 - Aug 2021

Sr. Software Engineer (Terumo BCT, US)

Gandhinagar, India

- Designed and maintained SQL-based backend systems (DDL, stored procedures, query optimization) for healthcare applications, supporting \$80K+ client launches and increasing product renewals by 30%.
- Automated QA pipelines using Python and Selenium, accelerating release cycles by 50% while ensuring regulatory compliance and maintaining product reliability for Terumo BCT healthcare systems.

## Key Projects & Research

### Lean Six Sigma Root Cause Analysis – Healthcare Project

- Applied Lean Six Sigma methodologies (SIPOC, VSM, FMEA, Pareto, RCA) to identify root causes of medication administration errors at Beni Hana Hospitals.
- Designed corrective actions and workflow improvements, reducing potential errors and improving patient safety compliance.

## Education

### Mason School of Business, William & Mary

Aug 2023 - May 2025

MBA, Business Analytics & Supply Chain

Williamsburg VA, USA

### Vellore Institute of Technology

Sep 2015 - May 2019

Bachelors of Technology

Vellore, India

## Skills & Technical Proficiency

**SQL** (MySQL, PostgreSQL, SQL Server, BigQuery) – complex queries, joins, indexing, optimization

**Python** (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Statsmodels, Prophet, XGBoost)

**Data Visualization** – Tableau, Power BI, Excel (pivot tables, macros, VBA)

**Data Cleaning/Wrangling** – ETL pipelines, Python (pandas), SQLAlchemy, API data integration

## Certifications

Google Data Analytics, Snow Flake, Python, Hubspot, AWS Cloud Practitioner (ongoing)
