

SAI KIRAN GAJULA

Data Analyst

(980)291-3827 | skiran0519@gmail.com | LinkedIn

SUMMARY

Data Analyst with 4+ years of experience delivering actionable insights and data-driven solutions across healthcare, cloud analytics, and enterprise operations. Skilled in transforming complex datasets into strategic business intelligence using Python, R, SQL, Tableau, and Power BI to optimize processes, enhance decision-making, and improve operational efficiency. Proficient in ETL development, data modeling, and predictive analytics with hands-on expertise in Snowflake, Apache Airflow, AWS Glue, and Redshift for large-scale data processing. Adept at maintaining HIPAA and GDPR compliance, implementing data governance frameworks, and collaborating cross-functionally to align analytics strategies with business goals. Experienced in leveraging cloud platforms (AWS, Azure, GCP) to design scalable analytics solutions that improve data accuracy, reporting speed, and overall organizational performance.

WORK EXPERIENCE

United Healthcare Group, USA | Data Analyst Apr 2024 – Present

- Collaborated with cross-functional teams to define business goals and **developed a Claims Data Optimization dashboard**, reducing **denial rates by 18%** and improving **claim cycle efficiency**.
- Analyzed EHR data from Epic and Cerner to enhance claims accuracy, **ensuring HIPAA compliance** and visualizing **clinical KPIs** through interactive **Tableau dashboards** for leadership review.
- Designed and implemented standardized reporting frameworks and **custom ad hoc reports**, delivering **tailored insights** to both **executive and operational teams** for data-driven decision-making.
- Built real-time **Tableau dashboards** to track claim status, **reducing Cycle Time to Action (CTA) by 30%** and enabling faster interventions in processing delays.
- Conducted feasibility studies for adopting **advanced analytics tools**, assessing **AWS Glue and Redshift integrations**, and improving **large-scale data ingestion efficiency** across claims and provider systems.
- Partnered with Finance teams to build **predictive financial models**, identifying **12% potential cost savings** by improving **provider performance and claims processing alignment**.
- Collaborated with Operations Systems teams to **diagnose and resolve data pipeline issues**, ensuring **KPI accuracy** and maintaining **high dashboard availability** for enterprise reporting.
- Ensured full **HIPAA compliance** by securely consolidating and validating **claims, eligibility, and provider network datasets**, maintaining **data privacy and integrity** across analytical processes.

Persistent System, India | Data Analyst Jan 2020- Jun 2022

- Consolidated marketing and operational datasets using **Python (Pandas, NumPy)** and **SQL**, improving data accuracy and enabling **25% faster decision-making** through automated and validated business intelligence workflows.
- Developed interactive Tableau and Power BI dashboards to monitor KPIs and revenue trends, **reducing reporting turnaround by 40%** and improving stakeholder visibility across multiple departments.
- Automated end-to-end **ETL pipelines** with **Apache Airflow and Snowflake**, enhancing data pipeline reliability and **cutting manual data preparation time by 50%** for cross-functional analytics teams.
- Performed customer segmentation and predictive modeling in **R and scikit-learn**, identifying high-value customer cohorts and **increasing targeted campaign conversion rates by 18%**.
- Implemented organizational data validation and governance processes using **SQL, Power BI, and Excel-based automation**, improving **data accuracy and consistency by 30%** while ensuring compliance with **internal audit and data privacy guidelines**.
- Analyzed transactional and web log data using **Python, SQL, and visualization tools**, uncovering churn patterns that led to a **15% reduction in customer attrition** within six months.
- Created standardized reporting templates and executive dashboards in **Power BI**, **boosting insight adoption by 35%** and enabling leadership to make faster, evidence-based strategic decisions.

EDUCATION

Masters in Computer and Information Sciences Aug 2022 - May 2024
Alcorn State University, USA

SKILLS

Programming & Analytics: Python (Pandas, NumPy, scikit-learn), R, SQL, Excel (Pivot, Power Query), VBA
Data Visualization & BI Tools: Tableau, Power BI, Looker Studio, Excel Dashboards
ETL & Data Engineering: Apache Airflow, Informatica, Alteryx, Snowflake, AWS Glue, Redshift, SQL Server Integration Services (SSIS)
Data Warehousing & Cloud Platforms: AWS (Glue, Redshift, S3), Azure Data Lake, GCP BigQuery, Snowflake, Databricks
Machine Learning & Predictive Analytics: Logistic Regression, Random Forest, Clustering, Time-Series Forecasting, Hypothesis Testing, Statistical Modeling, A/B Testing
Healthcare & Domain Tools: EHR (Epic, Cerner), HL7, FHIR, ICD-10, HIPAA Compliance, Claims & Provider Data Analytics
Data Governance & Quality: Data Validation, Cleansing, Standardization, Metadata Management, GDPR & HIPAA Compliance, Master Data Management (MDM)
Project Management & Collaboration: Agile, JIRA, Confluence, Cross-functional Team Collaboration, Requirement Gathering, Business Process Optimization
Databases & Storage: Snowflake, Redshift, PostgreSQL, MySQL, MS SQL Server
Reporting & Automation: Power BI Service, Tableau Server, Excel Automation, ETL Scheduling, Report Optimization

PROJECTS

Campus Energy Consumption Optimization Project

- Collected and analyzed IoT-based utility and HVAC sensor data using **Python (Pandas, NumPy)** and **SQL**, identifying consumption inefficiencies and improving **energy forecasting accuracy by 18%**.
- Built interactive Tableau dashboards to visualize real-time campus energy trends, enabling facilities management to implement **data-driven conservation strategies** that **reduced energy costs by 15%**.

Student Retention and Performance Analytics Initiative

- Designed and developed a **predictive analytics model** in **scikit-learn** using attendance, grades, and engagement data to **identify at-risk students**, increasing early intervention efficiency by **20%**.
- Created automated **Power BI dashboards** connected to **Azure SQL** for academic leadership, providing **real-time retention insights** and supporting proactive, evidence-based student success programs.
