Professional Summary

Data Engineer with 3+ years of experience working in Agile environment in designing scalable ETL pipelines, big data solutions, and data validation processes. Proficient in Python, SQL, and cloud computing service platforms (Azure, GCP). Passionate about data-driven decision-making through advanced analytics and analytical solutions.

Technical Skills

Programming Languages: Python, Linux/Unix, Scala, SQL, NoSQL, R

Libraries: Pandas, NumPy, matplotlib, PySpark, seaborn

Cloud Tools: Google Cloud Platform (GCP), Azure, Informatica Cloud

Big Data Technologies: Apache Spark, Apache Kafka, Hadoop

Database Systems: Oracle, Salesforce, MongoDB, BigQuery, Hive

Visualization and Collaboration Tools: Tableau, Power BI, Looker, Excel, Docker, Git, Jira, DevOps

Certification: Microsoft Azure Data Engineer Associate

Experience

Cognizant

Jan 2021 – Nov 2022

Data Engineer

Hyderabad, India

- Engineered end-to-end secure cloud-native data pipelines with Azure Data Factory, leveraged Azure Data bricks and Apache Spark for big data processing and system integration, and Azure SQL for scalable data warehouse.
- Managed ETL pipelines using Azure Data Factory, leveraging linked services and datasets for data extraction, transformation, and loading from Amazon Cosmos DB and Azure Data Lake Storage in multiple formats.
- Led a team to implement real-time streaming data solutions using PySpark, Spark SQL optimizing data pipelines in Databricks and orchestrating workflows with Kubernetes containerization for high-performance analytics.
- Implemented data governance using Azure Key Vault and IAM roles, achieving 95% enhanced security and 65% faster pipeline performance through Azure Monitor optimization and troubleshooting.
- Collaborated with cross-functional teams to define technical requirements, architect and deliver comprehensive end-to-end data systems ensuring quality for data analysis.
- Applied dimensional modeling in Azure SQL data warehouse to enhance data architecture and querying. Implemented CI/CD pipelines using Azure DevOps for automated deployment, and maintaining version control.

Cognizant

Aug 2019 – Jan 2021

Data Analyst

Hyderabad, India

- Developed ETL workflows using Informatica Cloud, implementing data quality checks migrating to Oracle and Snowflake databases improving workflow performance by 40% across distributed systems.
- Fine-tuned complex SQL triggers, stored procedures, and views, ensuring data partitioning, query optimization.
- Transformed complex data structures through dimensional data modeling, implementing star schemas and SCD types, resulting in 35% faster database performance.
- Designed Power BI dashboards translating Key Performance Indicators (KPI's) into actionable business insights, using querying to improve decision-making for stakeholders by 60%.
- Deployed data automation using REST APIs in Github, cutting delivery times, and reduce the expenses by 40%.

Academic Projects

Big Data Powered Sentiment Analysis of Yelp Reviews | Kafka, Spark, Google Cloud

Dec 2024

- Built an scalable real-time data pipelines on Google Cloud Platform to process 50k+ daily reviews and 90 GB of historical data, leveraging Pub/Sub, DataProc, and Spark ETL jobs. Utilized an SVM predictive model for sentiment analysis on 2M+ reviews and designed Looker dashboards for cross-departmental insights.

Cloud Implementation of Data Warehouse Analysis | Google Cloud, Airflow, Tableau

May 2023

- Integrated a cloud-based ETL pipeline with Google Cloud Composer and Apache Airflow to process 60k records, ensuring data quality and reducing latency by 40%. Crafted Tableau dashboards with real-time KPIs, improving decision-making efficiency by 30%.

Education

San Jose State University

Jan. 2023 – Dec 2024

Masters of Science in Data Analytics

San Jose, CA

Course Work: Statistics for Data Science, DB Systems, Big Data, Machine Learning, Data Visualization, Deep Learning, Data Mining
