Summary

- Business Analyst with 4+ years of experience in banking, insurance, and financial domains, specializing in process optimization, data-driven decision-making, and system integration to enhance operational efficiency and regulatory compliance.
- Proven track record of gathering requirements, documenting BRDs/FRDs, and leading cross-functional teams using JIRA, Confluence, and Scrum methodologies to deliver scalable solutions aligned with business goals.
- Skilled in SQL, Power BI, Tableau, and Python (Pandas) for data cleaning, dashboarding, and report automation, reducing manual efforts in risk analytics, loan processing, and claims workflows.
- Hands on experience in banking regulations (BCBS 239, CECL, AML/KYC) and insurance claims/policy administration, with a strong ability to profile data, resolve anomalies, and ensure audit-ready reporting.
- Adept at mapping workflows (BPMN/UML), designing APIs, and conducting UAT to streamline operations, resulting in faster loan approvals and reduced claims processing time.
- Effectively bridges the gap between business stakeholders and IT teams, translating complex requirements into actionable insights, wireframes, and test plans for seamless project execution.

Skills

Business Analysis & Tools: Requirements Elicitation & Documentation (BRD, FRD, SRS, User Stories, Use Cases), Process Modeling (BPMN, UML, DFD, ER Diagrams, Wireframing - MS Visio, Lucidchart), SQL (Querying, Joins, Data Profiling), Python (Pandas, NumPy - Basic Automation & Data Cleaning), API Integration & Data Lineage (Collibra, Informatica Data Quality).

Data Analysis & Visualization: Power BI, Tableau, Qlik, Excel - Advanced (PivotTables, VLOOKUP, Macros).

Project & Agile Management: Agile & Scrum (Sprint Planning, Backlog Grooming, UAT, Retrospectives), JIRA, Confluence, Trello, MS Project, Stakeholder Management, Cross-functional Collaboration.

Domain Knowledge: Banking (Loan Origination, Credit Risk, KYC/AML, Regulatory Compliance), Insurance (Claims Processing, Policy Administration, Underwriting), Finance (Risk Analytics, Financial Reporting, Automated Decision Systems).

Technical & Soft Skills: Data Governance & Quality Assurance (Data Cleaning, Anomaly Detection), Report Automation & Dashboarding (KPI Tracking, Real-time Metrics), Strong Communication (Client/Stakeholder Presentations, Technical Writing), Problem-Solving (Root Cause Analysis, Process Optimization).

Operating Systems: Windows, Linux.

Work Experience

M&T Bank

June 2024 – Present

Business Analyst

United States

- Spearheaded requirements gathering and documentation for enhancing risk data governance policies, integrating the Synergy platform with legacy banking systems using BPMN diagrams and JIRA, ensuring compliance with BCBS 239 and CECL regulations.
- Developed interactive Power BI dashboards to track credit exposure, default rates, and loan performance, enabling executives to make data-driven decisions with real-time risk insights.
- Conducted data profiling and root cause analysis using SQL and Informatica Data Quality, resolving anomalies in risk/loan data attributes and improving data reliability.
- Facilitated daily standups, sprint planning, and UAT with cross-functional teams (Risk, IT, Compliance), reducing manual reconciliation efforts via API automation between Synergy and loan origination systems.
- Mapped end-to-end data flows using Collibra, improving transparency in data sourcing and transformation for audits and regulatory reporting.
- Designed and implemented a standardized reporting framework for FDIC and OCC regulatory submissions, reducing manual data aggregation efforts by 50%.

Wipro Limited

July 2021 – July 2022

Business Analyst

India

- Conducted current-state analysis of claims processing workflows, identifying inefficiencies in manual adjudication and documentation. Proposed automation strategies leveraging Power BI for real-time tracking and Excel Macros for data standardization, reducing average claim turnaround time.
- Led requirements gathering for 4 new policy administration features, including automated fraud detection alerts and self-service claim status updates.
- Created detailed FRDs, use cases, and UML diagrams, ensuring traceability between business needs and technical implementation. Collaborated with developers to reduce post-release defects through rigorous acceptance criteria refinement.
- Partnered with Product Owner to groom and prioritize backlog in JIRA, breaking down epics into 50+ granular user stories with clear acceptance criteria. Facilitated sprint planning sessions with IT teams, improving sprint completion rates eliminating ambiguous requirements.
- Developed interactive dashboards tracking KPIs like claim denial rates, agent productivity, and customer satisfaction scores. Presented insights to senior leadership, leading to a increase in auto-approval rates for low-risk claims and reallocation of 15 FTEs to high-priority tasks.
- Designed end-to-end UAT test plans covering 120+ test scenarios for new system features. Collaborated with QA teams to log and triage defects in JIRA, achieving defect resolution prior to production deployment.
- Bridged gaps between underwriting, IT, and legal teams by conducting weekly requirement workshops. Documented process flows in BPMN 2.0 to clarify handoffs between legacy and new systems, cutting rework hours per sprint cycle.

Experion Technologies

August 2019 – June 2021

Business Analyst

India

- Built a Python-based tool to automate risk assessments (credit score, debt ratio), cutting loan processing time by 50% and improving accuracy.
- Designed Tableau/Power BI dashboards for financial trends and KPIs, enhancing decision-making for stakeholders in risk and finance.
- Designed ETL pipelines to consolidate data from 10+ sources (SQL databases, Excel, APIs) into a centralized Power BI dashboard for real-time financial reporting.
- Created dynamic visualizations for profitability trends, liquidity ratios, and portfolio risk exposure, enabling CFOs to identify underperforming assets 20% faster.
- Conducted UAT sessions and created user manuals, ensuring smooth adoption of new systems post-launch.
- Partnered with IT and finance teams to align system functionality with business goals, ensuring compliance with operational requirements.
- Translated complex regulatory requirements (e.g., RBI guidelines) into technical specs for developers, ensuring the loan system passed external compliance audits with zero critical findings.

Education

Florida Atlantic University

August 2022 – May 2024

Master of Science in Computer and Information Science

Boca Raton, Florida

Certifications

Project Management Professional (PMP)

Business Analysis by Microsoft
