EXPERIENCE

Allstate, USA | Financial Analyst

Jan 2025 - Present

- Designed and implemented automated financial models using Python and Excel VBA, improving forecast accuracy by 18% and cutting reporting turnaround time by 25%.
- Conducted DCF, CCA, and sensitivity analyses to evaluate profitability and long-term value of insurance portfolios, supporting pricing and product diversification decisions.
- Automated budget variance and cash flow reports using SQL and Alteryx, reducing manual effort by 30% and ensuring real-time visibility of financial KPIs.
- Developed interactive Power BI dashboards integrating data from Oracle, Bloomberg Terminal, and ERP systems, enhancing executive decision-making and operational transparency.
- Performed credit risk and portfolio risk assessments across reinsurance and investment assets, contributing to improved risk-adjusted returns and capital efficiency.
- Collaborated with cross-functional teams under Agile methodology to migrate manual financial planning processes to automated workflows, saving 15+ analyst hours per week.
- Led quarterly scenario analysis and IRR evaluation for investment portfolios, optimizing fund allocation strategies aligned with market volatility and regulatory requirements.
- Supported quarterly and annual reporting under US GAAP, performing analytical reviews, reconciliations, and audit-ready documentation to ensure compliance.
- Partnered with the treasury and actuarial teams to monitor fixed-income and derivative positions, improving hedging effectiveness and liquidity management

Mphasis, India | Financial Analyst

Jun 2020 - Nov 2022

- Built financial forecasting, budgeting, and variance models in R, SQL, and Advanced Excel, improving accuracy by 20% and supporting quarterly business reviews.
- Conducted IRR, NPV, and KPI evaluations for IT modernization and digital transformation projects, driving capital allocation decisions worth over \$5M annually.
- Designed Power BI and Tableau dashboards for CFO reporting, automating manual Excel-based reports and reducing turnaround time by 40%.
- Executed comparable company, precedent transaction, and LBO modeling to benchmark valuations and assess potential M&A opportunities.
- Utilized SAS and VBA macros to standardize data cleansing and transformation, enhancing audit readiness and improving reporting accuracy across financial datasets.
- Performed cash flow, credit risk, and portfolio exposure analysis to identify high-risk accounts and improve collection efficiency by 12%.
- Collaborated with the finance automation team to integrate ERP and QuickBooks data into SQL-based reporting pipelines, ensuring consistency and transparency in monthly reporting.
- Conducted financial statement analysis and trend forecasting for internal management, providing insights that contributed to a 10% improvement in cost control.
- Participated in the full SDLC for a finance data integration project, defining requirements and validating results to ensure seamless automation of financial consolidation reports.
