

Sainath Banda

FULL STACK JAVA DEVELOPER

Location: St Louis, MO | Email: sainath@jobitmail.com | Contact: (314) 900 6788

Summary

- Results-driven Full Stack Java Developer with Around 5 years of experience in delivering high-quality web applications across diverse domains, including finance, consumer electronics, and technology.
- Extensive experience in Software Development Life Cycle (SDLC), Web Application Design, Development, Testing, Support Maintenance, and End-User support.
- Proficient in modern web technologies, including Java, Spring Boot, JavaScript, TypeScript, React.js, and Angular, facilitating the creation of responsive, dynamic user interfaces and efficient backend services.
- Extensive Experience in using Microservice architecture for developing microservices using Spring Boot stack (Spring REST, Spring JPA and Spring Cloud).
- Proficient in relational databases like Oracle, MySQL, PostgreSQL and non-relational databases like MongoDB.
- Skilled in back-end integration through RESTful APIs, and cloud services like AWS, ensuring seamless data flow, robust security, and enhanced application performance.
- Expert in UI/UX design principles, collaborating effectively with cross-functional teams to transform complex requirements into user-friendly designs, leading to improved user engagement.
- Strong knowledge of version control and collaboration tools such as Git, GitHub, and Jira, promoting effective teamwork and streamlined project management.
- Experience with CI/CD pipelines using Jenkins, achieving efficient deployment processes and reducing release cycles by up to 50%.
- Proficient in Object Oriented Design (OOD) and Object-Oriented Programming (OOPs) with exposure to different Software Development Life Cycle (SDLC) methodologies.
- Experience with working in fast-paced AGILE, WATERFALL development environments.
- Extensive experience in conducting cross-browser compatibility testing to ensure seamless user experience.
- Dedicated to continuous improvement, staying abreast of the latest industry trends and technologies to drive innovation and elevate user experience.

Skills

Programming Languages: Core Java, J2EE, JavaScript, Type Script, jQuery.

Frontend Technologies: HTML, CSS, Angular, React.js, Bootstrap, JSON, Restful Services, XML.

Backend Technologies: Spring, Spring Boot, Hibernate, REST APIs

Databases: Oracle, MySQL, PostgreSQL, MongoDB

Developer Tools: Visual Studio, Eclipse, Jenkins, XAMPP, SonarQube

Version Control & Collaboration : Git, Git Hub, Jira, TFS

Web / Application Servers: Tomcat

Cloud Services: Amazon Web Services (AWS)

Other Tools: Microsoft Office 365, Microsoft Visio

Operating Systems: Windows, Linux / UNIX

Experience

Capital One, MO | Nov 2023 – Present

Full Stack Java Developer

- Engineered dynamic and interactive web applications with **React.js** and **Angular**, resulting in a 40% increase in user engagement and 25% faster page load times.

- Developed scalable and reusable UI components leveraging **Object-Oriented Programming (OOP)** principles, streamlining development workflows.
- Optimized data retrieval and transaction processing efficiency by 30% through seamless integration of **Java Spring Boot** with **RESTful APIs**.
- Architected a **microservices-based system** with Spring Boot, ensuring improved modularity and enhanced scalability to support evolving client needs.
- Enforced robust security protocols using **Spring Security**, ensuring secure authentication and authorization across application endpoints.
- Designed efficient database schemas for **MySQL** and **PostgreSQL**, achieving a 20% improvement in query execution and ensuring high-volume data integrity.
- Enhanced frontend performance by incorporating **React Hooks** for state management and **lazy loading** to optimize component rendering, leading to a 15% performance boost.
- Leveraged **CI/CD pipelines with Jenkins**, automating build and deployment processes to cut release times in half and reduce manual errors.
- Implemented advanced **state management techniques** with TypeScript and JavaScript, improving application scalability and reducing memory consumption by 20%.

KPIT Business Solution, India | Jun 2019 – Nov 2022

Full Stack Developer

- Revamped e-commerce applications with **Angular** and **jQuery**, improving platform reliability and boosting user retention by 20%.
- Built and integrated **RESTful APIs** using Angular services, utilizing **HttpClient** for efficient server communication.
- Spearheaded agile development practices, reducing project delivery timelines by 20% and fostering iterative progress.
- Developed fully responsive and cross-browser-compatible user interfaces with **Angular** and **Bootstrap**, ensuring seamless multi-device usability.
- Leveraged **Spring Framework** with **Hibernate ORM** to streamline database interactions and achieve efficient application persistence.
- Reduced server response times by 25% through seamless integration of **RESTful APIs** with Java Spring Boot.
- Enhanced system performance during peak traffic by optimizing **MySQL** and **Oracle databases**, enabling smooth high-demand operations.
- Created and managed **multithreaded applications** to execute parallel tasks, improving system responsiveness.
- Deployed scalable solutions on **AWS**, increasing infrastructure capacity to handle a 60% surge in traffic during peak usage periods.
- Built a robust **CMS** with **XML** and **JSON**, accelerating content updates by 15% and improving product rollout times.
- Ensured code reliability and stability by implementing **JUnit** and **Mockito** for thorough unit and integration testing.

Education

Master's in ITM	May 2024
Webster University, St Louis, Missouri	
Bachelor of Computer Science and Engineering	May 2020
CMR Engineering College, Hyderabad, India	

Certifications

- Microsoft Azure Fundamentals (AZ-900),
- Associate Integration Developer – Boomi
