Education

New England College

Master of Science in Computer Information Sciences

Oct. 2023 – May 2025

Henniker, NH

Relevant Coursework

- Python Programming
- Database Design
- Analytics
- Information Security
- Cloud Computing
- Data Science and
- Artificial Intelligence
- Network Communication

Experience

Technofly Solutions

June 2019 – July 2019

Intern *Bengaluru, Karnataka*

- Collaborated with team members to create Python data models for real-world applications, resulting in effective analysis and interpretation of complicated datasets.
- Assisted in developing presentations and organizing events to promote technology solutions, highlighting the outcomes of data-driven insights and solutions.

Projects

COVID-19 Data Analysis | *SQL, Excel, Data Cleaning, Data Analysis*

January 2025

- Designed and implemented a SQL-based analysis of global COVID-19 data.
- Cleaned and transformed raw datasets to improve accuracy and usability.
- Wrote complex SQL queries to track infection rates, recoveries, and deaths over time.
- Analysed vaccination progress, testing rates, and regional impact for actionable insights. Optimized database performance for faster query execution and visualization integration.

Data Professional Survey Analysis | *Excel, Power BI, Data Visualization*

December 2024

- Developed an interactive Power BI dashboard to analyze survey data from data professionals, utilizing DAX functions and visualizations to extract key insights.
- Segmented survey participants by country, providing geographic insights into programming language preferences, work-life balance, and salary satisfaction.
- Identified key trends in the data, highlighting preferences in programming languages and factors affecting work-life balance and salary satisfaction.

Airbnb Data Analysis and Visualization | *SQL, Tableau, Excel*

November 2024

- Developed an interactive Tableau dashboard for analyzing Airbnb listings, utilizing SQL to retrieve and manipulate data for insights on pricing and market trends.
- Analyzed pricing trends and identified high-revenue zip codes, providing valuable insights to guide marketing and pricing strategies.
- Conducted annual revenue trend analysis, leveraging data to forecast future performance and support strategic business decision-making.

Technical Skills

Programming and Tools: Python (Pandas, NumPy, Apache Spark), SQL, Excel, Tableau, Power BI, Jupyter Notebook.

Databases: MySQL, SQL Server Management Studio (SSMS).

Data Analysis: Data Cleaning, Statistical Analysis, Hypothesis Testing, Regression Analysis.

Soft Skills: Problem-Solving, Critical Thinking, Team Collaboration, Communication.

Extracurricular Activities

Accenture North America Data Analytics and Visualization Job Simulation on Forage February 2025

Data Analyst Intern (Simulation)

Accenture

- Completed a simulation advising a hypothetical social media client as a Data Analyst at Accenture, focusing on uncovering actionable insights
- Cleaned, modeled, and analyzed seven datasets to identify content trends, providing data-driven insights to inform strategic decisions.
- Prepared a comprehensive PowerPoint deck and video presentation to effectively communicate key insights to the client and internal stakeholders.

Tata Group's Data Visualization: Empowering Business with Effective Insights on Forage. February 2025

Data Visualization Analyst (Simulation)

Tata Group

- Completed a simulation involving the creation of data visualizations for Tata Consultancy Services, aimed at enhancing business insights on Forage.
- Prepared and curated questions for a meeting with senior leadership to facilitate productive discussions and align on business needs.
- Developed impactful visuals for data analysis, assisting executives in making informed and effective decisions.

Quantium Data Analytics

February 2025

Quantium Data Analyst (Simulation)

Quantium

- * o Developed expertise in data preparation and customer analytics, utilizing transaction datasets to extract valuable insights and deliver data-driven commercial recommendations.
- * o Extended analytical capabilities to identify benchmark stores for conducting uplift testing on trial store layouts, enabling evidence-based decision-making.
- * o Leveraged acquired data analytics and insights from previous tasks to create comprehensive reports for the Category Manager, facilitating informed strategic decisions and enhancing commercial applications.
