

Sai Pratheek

+1 (850) 735-3122 | saipratheek717@gmail.com

Professional Summary:

As a Software Engineer around 5 **years of experience** in designing, developing, and deploying applications using **Java , Spring Boot, and Microservices architecture**. Skilled in leveraging modern Java features such as **Lambdas, Streams, and Functional Interfaces** to deliver efficient, high-performing solutions, and proficient in **Spring Boot 3, Spring Security, Spring Cloud, and Hibernate ORM** for building secure and scalable back-end services. Experienced in creating dynamic user interfaces with **React 17, Angular, JavaScript, HTML5, and CSS3**, while building and integrating **RESTful and SOAP APIs** for seamless system communication. Strong expertise in database management with **Oracle, MySQL, PostgreSQL, and MongoDB**, along with real-time messaging solutions using **Kafka and JMS**. Hands-on with **AWS and Azure cloud platforms**, containerization and orchestration using **Docker and Kubernetes**, and DevOps practices including **Jenkins CI/CD pipelines, Git/GitHub version control, and automated testing with JUnit**. Adept at working in **Agile/Scrum environments**, collaborating with cross-functional teams, and delivering secure, scalable, and enterprise-grade applications that meet business goals.

Education:

University of West Florida.

Master of Information Technology (GPA: 3.83/4.0)

Pensacola, FL

May 2024

Technical Skills:

Languages	Java 17/11/8, PL/SQL, SQL
Java/J2EE Technologies	Core Java, Spring Boot 3, Spring Security, Spring Cloud, Hibernate, Microservices, JMS, RabbitMQ, ActiveMQ, Design Patterns, EJB.
Frameworks	Spring Boot 3, Spring Security, Spring Cloud, Spring MVC, Hibernate ORM, Microservices.
Web Technologies	React 17, Angular 14/12/10, Node.js, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, jQuery, AJAX, JSON, XML.
Web Services	RESTful APIs, SOAP
Design & GUI Tools	Eclipse, IBM RAD
Cloud Services	AWS (EC2, S3, RDS, IAM, CloudWatch), Azure (Logic Apps, Functions, Blob Storage)
App servers	Apache Tomcat, JBoss, IBM WebSphere.
Version Controls	Git, GitHub
Databases/Tools	Oracle, MySQL, PostgreSQL, MongoDB, SQL Server
Methodologies	Agile, Waterfall
Operating Systems	Windows, Linux, UNIX

Professional Experience:

Client: Fidelity Investments, Remote

Jul 2024 - Present

Role: Software Engineer

Responsibilities:

- ✓ Designed and developed enterprise applications using **Java 17 features** (Lambdas, Streams, Optional), delivering efficient and scalable solutions across all phases of the software development lifecycle.
- ✓ Developed applications using **Spring Framework** (Spring MVC, Spring Boot, Spring REST, Spring Security) and implemented **microservices architecture** to create independent, scalable components with **RESTful APIs**.
- ✓ Integrated **GraphQL** to deliver precise data fetching, reducing payload size and improving API performance.
- ✓ Optimized data persistence using **Hibernate/JPA** with annotations and stored procedures in SQL, improving application performance and reducing query execution time by **30%**.
- ✓ Built cross-browser-compatible web pages using **HTML5, CSS3, JavaScript, and Angular 14**, modernizing legacy UIs and creating **SPAs** for improved user experience.

- ✓ Designed and maintained **Docker containers**, integrated **Kubernetes** for **cluster management**, and used **Kafka** for message-driven architecture with publish/subscribe patterns.
- ✓ Leveraged **AWS** services (**EC2, S3, RDS, CloudWatch, Elastic Beanstalk**) for deployment and infrastructure management and employed **Jenkins** for **CI/CD pipelines**.
- ✓ Implemented logging with **Log4j**, wrote unit tests with **JUnit**, and managed defect tracking using **JIRA**, ensuring robust software quality and bug resolution.
- ✓ Actively contributed to **Agile** processes, including **daily stand-ups**, requirement analysis, and **sprint planning**, fostering effective communication with stakeholders and the development team.

Environment: Java 17, Spring Boot 3, Spring MVC, Spring Security, Hibernate/JPA, Microservices, REST APIs, SOAP, Angular 14, HTML5, CSS3, JavaScript (ES6+)/TypeScript, GraphQL, Node.js, AWS (EC2, S3, RDS, CloudWatch, Elastic Beanstalk), Docker, Kubernetes, Terraform, Kafka, JMS, MongoDB, Oracle SQL, PL/SQL, Jenkins, Git, JUnit, Log4j, JIRA, Agile, Windows.

Client: Farmers Insurance, Westfield Center, OH

Nov 2020 - Oct 2022

Role: Full Stack Developer

Responsibilities:

- ✓ Developed scalable web applications with **Java 11, Spring Boot**, and **Hibernate**, leveraging features like Lambdas, Streams, functional interfaces, and the new Date API to build efficient **microservices** and persistence layers.
- ✓ Developed **RESTful APIs** with **Spring Boot** for backend operations and built **React 17 SPAs** with reusable components, hooks, and state management to deliver dynamic and interactive user interfaces.
- ✓ Designed and developed front-end applications using **React 17, Node.js, HTML5, CSS3, and JavaScript (ES6+)**, building SPAs with reusable components for responsive and user-friendly designs.
- ✓ Worked on containerization and orchestration using Docker for creating and deploying microservices, Kubernetes for automated scaling and management of containerized applications, and **terraform** for automating cloud infrastructure provisioning, while using Apache Kafka for messaging and streaming.
- ✓ Deployed applications on **AWS (EC2, S3, IAM)** for scalable infrastructure, while automating CI/CD pipelines with **Jenkins** and monitoring logs with **Log4j**. Tracked defects and managed documentation through **JIRA and Confluence**.
- ✓ Wrote **JUnit** test cases for business objects, developed **SOAP** Web Services with **WSDL and XML**, and designed **MongoDB** schemas for **non-relational data storage**. Actively tuned **SQL queries** and developed stored procedures, triggers, and functions for efficient **database operations**.
- ✓ Actively participated in **Agile Scrum ceremonies** including daily stand-ups, sprint planning, and retrospectives, ensuring alignment with team goals and timely delivery.

Environment: Java 11, Spring Boot, Spring Security, Hibernate/JPA, Microservices, REST APIs, React 17, Node.js, HTML5, CSS3, JavaScript (ES6+)/TypeScript, AWS (EC2, S3, IAM), Kafka, Docker, Kubernetes, Terraform, MongoDB, Oracle SQL, JMS, Jenkins, JUnit, Log4j, Git, JIRA, Agile, Windows.

Client: Cigna Healthcare, Bloomfield, CT

Jun 2019 - Nov 2020

Role: Software Engineer

Responsibilities:

- ✓ Developed **web applications** using **Java 8** features like **Functional Interfaces, Lambda Expressions, and Stream API** to enhance performance, and implemented the **Spring Core Framework with MVC architecture, Dependency Injection (DI), AOP, and transaction management**.
- ✓ Built persistence layers with **Hibernate, integrating POJOs for ORM** and performing database operations like **PL/SQL stored procedures, functions, triggers, and SQL** tuning to optimize performance.
- ✓ Created dynamic and responsive user interfaces using **Angular 10/JS, HTML5, CSS3, and JavaScript**, developing **SPAs** and reusable components, and integrated front-end designs with **Node.js** for server-side rendering.

- ✓ Developed **RESTful APIs** and serverless applications on **Azure Cloud**, leveraging Logic Apps, Function Apps, Blob Storage, and **Web APIs** for hosting and data retrieval.
- ✓ Configured **Docker** for containerization and implemented **CI/CD pipelines using Jenkins** for continuous integration and deployment, along with **Kafka** for messaging and streaming operations.
- ✓ Ensured high-quality delivery with **JUnit tests, Log4j logging, and TDD practices**, while collaborating in Agile Scrum using **JIRA** for bug tracking and project management.
- ✓ Used **React** for building modular and interactive user interfaces and utilized **JIRA** for bug tracking and project management, ensuring timely delivery and resolution of issues in collaboration with the team.

Environment: Java 8, Spring Boot, Spring MVC, Hibernate, Microservices, REST APIs, SOAP, Angular 10, HTML5, CSS3, JavaScript (ES6+), Azure (Logic Apps, Function Apps, Blob Storage), Docker, Kafka, Oracle SQL, PL/SQL, JMS, Jenkins, JUnit, Log4j, Git, JIRA, Agile, Windows.
