Summary

Data Analyst with over 5 years of experience in **SQL, Python, Data Visualization, ETL**, and **API integration**. Skilled in **data extraction, transformation**, and analysis to drive business insights and strategic decision-making. Expertise in developing dashboards (**Tableau, Power BI**), optimizing SQL queries, and automating workflows to enhance efficiency. Strong background in data migration, validation, and pipeline management, ensuring accuracy and consistency. Proven ability to collaborate with cross-functional teams to streamline operations and improve reporting efficiency. Optimized decision-making protocols through comprehensive data analysis that highlighted key insights.

Skills

Python, R, Microsoft SQL Server, PostgreSQL, MySQL, Power BI, Tableau, Jupyter Notebooks, Visual Studio Code, SSIS, Git, Generative AI, AWS, Visual Studio, Visual Studio Code, REST, SOAP, Advanced Excel, API Integration, Azure, Data Extraction, Data Migration

Work Experience

Sabnext LLC

Jun 2024 - Present

Data Analyst

7335E Kellogg Dr, Wichita, KS 67207

- Applied advanced **SQL** expertise to streamline data analysis workflows, reducing query execution times by 30%
- Designed and presented 10 impactful data stories that simplified **complex analytics** and strategic business initiatives, ultimately enhancing revenue streams and aligning team objectives with corporate goals. complex findings into actionable business strategies for stakeholders.
- Led Source-to-Target mapping **data migration**, achieving zero data loss, and improved data accuracy
- Managed **ETL** processes for 5 projects, transferring over 500GB of data to cloud-based storage solutions.

SAS Solutions

Feb 2019 - May 2022

Data Analyst

Hyderabad, India.

- Produced and showcased clear data narratives that translated intricate findings into actionable strategies, directly influencing stakeholder decisions and enhancing project alignment across 4 major departments within the organization.
- Improved analytical reporting capabilities, increasing efficiency by 15% through the development of customized dashboards.
- Handled **data extraction** and **integration** for 25+ projects, leveraging APIs and ETL tools for seamless operations.
- Worked on **data pipelines** processing over 2 million records monthly, ensuring data accuracy and consistency

Krish Automation Solutions

Aug 2017 - Jan 2019

SQL Developer

Hyderabad, India.

- Crafted and refined intricate **SQL** queries for seamless data extraction, enhancing reporting accuracy across platforms; achieved a 40% reduction in query response time while maintaining high-performance standards.
- Engineered **stored procedures** and **functions** that automated data processing tasks, resulting in an average of 20 hours saved per week on manual reporting efforts within the finance department
- Managed large-scale relational databases, executed **complex data migrations**, and optimized **ETL** workflows using SQL and **SSIS** to enhance data integrity, reporting accuracy, and decision-making efficiency
- Collaborated with cross-functional teams, including developers and analysts, to improve database performance, enhance ETL workflows, and ensure seamless **data integration**.

Education

Wichita State University

Aug 2022 - May 2024

Master's, Data Science

Wichita, United States

Matrusri Engineering College

Jun 2013 - Jun 2017

Bachelor of Engineering, Electrical and Electronics Engineering

Hyderabad, India
