

SAI SRIKAR PUPPALA

Raleigh, NC | spupp3@ncsu.edu | (737)-881-1955 | [linkedin.com/in/saisrikarpuppala](https://www.linkedin.com/in/saisrikarpuppala)

PROFESSIONAL SUMMARY

Data Scientist with over 2 years of experience applying operations research, machine learning algorithms, and data-driven strategies to optimize business performance. Skilled in big-data analytics, developing functional dashboards, and committed to delivering insights that support strategic decision-making. Proficient in logistics, healthcare analytics, and supply chain optimization with a focus on improving financial performance and quality standards. Strong foundation in project design, statistical techniques, and data science principles, with the ability to adapt to evolving market conditions and complex datasets.

TECHNICAL SKILLS

Languages and Modeling Software: SQL, Python, R, C++.

Tools and Libraries: Power BI, Tableau, Microsoft Excel, Pandas, NumPy, SciPy, Matplotlib, Scikit-learn, Git, Docker, JIRA.

Data Analysis and Visualization: Dashboard Creation, Data Visualization, KPI Tracking, Data Mining, Exploratory Data Analysis, ETL, Data Cleaning, Statistical Analysis, Factor Analysis.

Analytical and Optimization Methods: Machine Learning, Regression Analysis, ANOVA, Process Optimization, Linear Programming, Inventory Management, Algorithms, Statistical Modeling.

WORK EXPERIENCE

Data Analyst Intern

May 2024 – Aug 2024

North Carolina State University - Raleigh, USA

- Constructed and trained metamodels (Linear Regression, Polynomial Regression, Random Forest) for a Colon Rectal Cancer study using R, resulting in a 15% increase in predictive accuracy and improved data modeling.
- Developed a dynamic Excel calculator that streamlined data analysis by integrating user inputs with R-generated parameters, reducing manual computation time by 30% and enhancing decision-making.
- Implemented and benchmarked multiple sampling techniques (Random, Stratified, Strauss, Sobol Sequence, Latin Hypercube) to optimize data representation, improving predictive model accuracy by 25% and supporting risk assessment.

Teaching Assistant

Jul 2024 – Aug 2024

Data Science Academy – NC State, Raleigh, USA

- Assisted Dr. David Stokes in delivering the Data Bootcamp in R, supporting over 50 students with coursework and addressing queries on R programming, data visualization, and statistical methods.
- Guided project teams, ensuring correct application of R-based data analysis techniques, fostering a collaborative learning environment, and improving course outcomes.

Data Analyst (Full Time)

Aug 2021 – Jul 2023

Fractal Analytics - Mumbai, India

- Utilizing MS Power BI, directed extraction of valuable insights from the finance data of a Fortune 500 CPG client's working capital, enhancing reporting data efficiency and supporting strategic marketing decisions, reducing manual efforts by 70%.
- Reduced business user issues significantly as a data analyst through streamlined data mapping and efficiently handled frontend DataOps using SQL and Python, leading to a 40% reduction in errors and improved data quality standards.
- Refactored the Data Analysis Expression (DAX) used in large dataset dashboards, which led to dashboard performance improvement of up to 23 % and subsequent cost reduction of 15%.

PROJECTS

Data Analytics Practicum (Supply Chain) - Anomaly Detection

Aug 2024 – Dec 2024

- Conducted advanced anomaly detection on large-scale trucking data using Python, employing Isolation Forest, Time Series decomposition, and Multiple Regression techniques to enhance data integrity and optimize processing accuracy.
- Validated detection methods by aligning results with real-time events and presented actionable insights to stakeholders, driving data-driven decision-making, and streamlining future supply chain analytics.

E-Commerce Product Review Prediction using Machine Learning Techniques

May 2024

- Engineered a recommendation system in Python, boosting review prediction accuracy by 12% using Random Forest, XGBoost, and AdaBoost, and enhanced personalized recommendations by 15% through advanced data preprocessing of 20,000+ transactions.

Optimizing Breast Cancer Diagnosis with Advanced Analytics

Apr 2024

- Leveraged multivariate analysis in R to identify key tumor features impacting breast cancer classification, uncovering insights from 30 FNA-derived features and supporting improved diagnosis, treatment protocols, and healthcare R&D.

ACCOMPLISHMENTS

Winner - NC Plant Science Initiative Hackathon [\[Github\]](#)

2024

Developed and deployed an ensemble of advanced machine learning models (Random Forest, KNN, Linear Regression, Lasso, Ridge Regression, to accurately predict key plant and soil parameters supporting precision agriculture through data-driven decision making.

EDUCATION

North Carolina State University | Raleigh, USA

Aug 2023 – May 2025

Masters in Operations Research
