Professional Summary

Detail-oriented and results-driven Software Engineer with 5+ years of experience developing and deploying high-performance applications in fast-paced, Agile environments. Adept at designing scalable microservices, implementing RESTful APIs, and building full-stack systems using Java, Spring Boot, React, and cloud platforms like AWS and GCP. Proven success in reducing system latency, improving code quality, and streamlining CI/CD processes. Strong communicator and collaborator with a passion for building reliable, maintainable, and secure software solutions that scale.

Education

George Washington University

January 2023 – December 2024

Master of Science in Computer Science (GPA: 3.70 / 4.00)

Anurag College of Engineering

June 2017 – May 2021

Bachelor of Technology in Computer Science (GPA: 8.5 / 10.00)

Experience

Senior Software Engineer — PNC Financial, USA

August 2024 – Present

- Designed and deployed scalable REST APIs using Spring Boot and Java, reducing backend latency by 40% and supporting over 100K daily requests across distributed clients.
- Built cloud-native microservices integrated with AWS (EC2, RDS, S3, IAM), enabling secure, high-throughput pipelines for processing real-time healthcare data.
- Implemented CI/CD pipelines using Jenkins and GitHub Actions, achieving 3x faster deployments and maintaining 95% test coverage with JUnit and SonarQube.
- Created full observability stacks using Prometheus, Grafana, and Alertmanager, reducing incident response time by 60% and enabling real-time debugging.
- Participated in architecture reviews, contributed reusable design patterns, and authored onboarding and developer runbooks to accelerate team velocity.
- Optimized SQL queries, caching strategies, and data pipelines, improving database performance by 50% and reducing infrastructure costs by 25%.
- Championed security best practices by integrating OAuth2.0, JWT, and AWS IAM policies, strengthening application resilience against vulnerabilities.

Software Engineer — Wipro Technology, India

December 2021 – December 2022

- Refactored legacy ERP monoliths into Spring Boot-based microservices, reducing technical debt and improving modularity and deployment scalability by 45%.
- Scaled backend systems handling 10K+ daily user requests by optimizing Hibernate ORM configurations, indexes, and complex SQL queries.
- Developed REST APIs using Node.js and secured them with Azure AD, enabling robust role-based access for internal business users.
- Revamped enterprise dashboards using jQuery, AJAX, and Bootstrap, boosting frontend load performance by 40% and enhancing UI responsiveness.
- Led Agile ceremonies, mentored junior developers, and drove cross-functional documentation best practices to support smoother handoffs and code reviews.
- Automated deployment workflows with Jenkins and Docker, reducing release cycle time by 30% and improving deployment reliability.

Software Engineer — KPIT Technologies, India

January 2019 – December 2021

- Engineered enterprise-level applications by designing, developing, and maintaining software solutions, improving system scalability and reliability by 50%.
- Partnered with analysts, QA, and project managers to deliver end-to-end solutions, achieving 98% on-time delivery of critical projects.
- Led requirement analysis and produced technical documentation, enforcing best coding practices that improved code quality and maintainability by 40%.
- Supported client projects in production by resolving critical issues and coordinating updates, ensuring 99.95% uptime and smooth deployments.
- Promoted team efficiency by driving process improvements and mentoring new members, increasing team productivity by 30%.
- Optimized SQL queries and application performance tuning, reducing response times by 35% and improving user experience.

Technical Skills

Programming Languages: Java (Spring Boot, JUnit), Python (Flask, Pandas), C++, JavaScript (ES6+), TypeScript, SQL, Bash

Frameworks & Libraries: Spring Boot, Hibernate, Flask, Node.js, Express.js, React.js, Vue.js, AngularJS, jQuery, Bootstrap, Apache Kafka, RabbitMQ

Databases: MySQL, PostgreSQL, MongoDB, OracleDB, Redis, DynamoDB, NoSQL

Cloud Platforms: AWS (EC2, S3, RDS, IAM, Lambda, CloudWatch), Google Cloud Platform (GCP), Azure (AD, App Services), Firebase

DevOps & Infrastructure: Docker, Kubernetes, Jenkins, GitHub Actions, Git, Bitbucket, Maven, Gradle, Terraform, Ansible

Monitoring & Logging: Prometheus, Grafana, Alertmanager, ELK Stack (Elasticsearch, Logstash, Kibana), Splunk, New Relic

Testing & QA: JUnit, Mockito, Selenium, Postman, PyTest, SonarQube

Development Practices: RESTful APIs, Microservices Architecture, Agile/Scrum, CI/CD, Design Patterns, Secure Coding, TDD/BDD

Collaboration Tools: JIRA, Confluence, Slack, Microsoft Teams, GitLab CI/CD

Other Tools & Platforms: Streamlit, LangChain, OpenAI APIs, Apache Spark, Hadoop

Certifications

Amazon Web Services - Developer Associate

Oracle Certified Professional - Certified Java Developer
