Summary

Software Engineer with a strong foundation in Full Stack development and hands-on expertise in Generative AI. Proven ability to build secure, scalable web applications using React, Node.js, and Spring Boot, while integrating advanced AI capabilities such as GPT-4 and RAG pipelines. Experienced in developing microservices, deploying on AWS, and optimizing real-time systems with responsible AI design. Passionate about delivering user-centric, AI-powered solutions that drive business impact.

Technical Skills

Frontend & UI: React, Redux, Next.js, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, TailwindCSS, Framer Motion
Backend & APIs: Node.js, Express.js, Spring Boot, MongoDB, GraphQL, Hibernate, RESTful APIs, Java, Python
Databases & Caching: PostgreSQL, MySQL, MongoDB, AWS DynamoDB, Redis, Cassandra
Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, GitHub Actions, SonarQube, OpenTelemetry
Security & Testing: OAuth2, JWT, Bcrypt, Spring Security, Jest, Mocha, Cypress, JUnit, Mockito, Selenium
Generative AI & ML: GPT-4, Claude 3, LangChain, LLaMA 3, RAG pipelines, Embeddings, Prompt Engineering, Bedrock, OpenAI API, HuggingFace Transformers, PyTorch, TensorFlow, Scikit-learn, BERT, FastAPI, Streamlit
Other Tools: Kafka, WebSockets, Agile (Scrum), Microservices

Education

University of Florida, M.S. in Computer and Information Science and Engineering

Jan 2023 – Dec 2024

GPA: 3.36/4.0

Experience

Software Engineer (Full Stack)

Lincoln Financial

Remote, USA

Jan 2024 – Present

- Developed a secure financial transaction portal using **Java (Spring Boot)**, optimizing fraud detection across \$12.8B+ in annuity transactions. Conducted **A/B testing**, reducing transaction failures by 32% and improving risk mitigation.
- Integrated **Generative AI-powered document summarization** using **GPT-4** and **LangChain**, reducing manual review effort by 60% for financial policy documents.
- Built dynamic frontends using **React**, **Redux**, and **TypeScript**, building modular authoring interfaces aligned with evolving UX standards and product goals, increasing client engagement by 45%.
- Designed a distributed database architecture using **PostgreSQL**, **MongoDB**, **AWS Aurora**, and **Redis**, improving query performance by 60% and securing 10M+ financial records with end-to-end encryption, achieving SOC 2 compliance.
- Implemented a scalable, event-driven **microservices** architecture with **Spring Boot**, **Kafka**, and **gRPC**, supporting real-time processing of 25K+ transactions per second and reducing fraudulent activity by 40%.
- Automated **CI/CD** workflows using **GitHub Actions**, **JUnit**, **Cypress**, and **Jest**, and deployed resilient services on **AWS** (ECS, Fargate, Lambda, RDS), integrating CloudWatch and **OpenTelemetry** for predictive autoscaling—achieving 99.99% uptime, reducing deployment failures by 80%, and cutting cloud costs by 35%.

Associate Software Engineer (Full Stack)

Metadologie

Jaipur, India

Jan 2022 – Dec 2022

- Developed a modular HRMS platform using **React**, **TypeScript**, and **Spring Boot**, improving HR operations efficiency by 40% through real-time dashboards and role-based components.
- Engineered scalable backend services using **GraphQL**, **Kafka**, and **Microservices**, enabling asynchronous processing for high-volume HR workflows.
- Optimized **MySQL** database design with partitioning, indexing, query caching, and stored procedures, reducing data retrieval latency by 50% and ensuring **ACID compliance**.
- Managed **AWS** infrastructure and implemented **CI/CD pipelines** with **JUnit**, **SonarQube**, and robust **security layers** using **Spring Security**, **OAuth2**, and **JWT**, reducing production defects by 60% and ensuring regulatory compliance.

Projects

Gator.ai — MERN-based AI chatbot inspired by ChatGPT

- Built using **React**, **Node.js**, **Express.js**, and **MongoDB** with RESTful APIs for conversation management.
- Integrated OpenAI API to generate contextual responses using GPT-4.
- Implemented secure authentication using **JWT**, **HTTP-only cookies**, and encrypted user sessions.
- Designed a modular architecture for message CRUD operations; deployed locally using **Docker** for testing.

SmartHire AI — AI-Powered Resume and Interview Assistant

- Built a resume assistant using **GPT-4**, **LangChain**, and **ChromaDB** to give personalized feedback.
- Created a web app using **Streamlit** and **FastAPI** for uploading and scoring resumes.
- Added mock interview questions and job-fit scores using custom prompt templates.
