EDUCATION

Master of Engineering in Computer Science- University of Cincinnati, Ohio | (August 2023-April 2025)

Coursework: Advanced Algorithms, Operating Systems, Cloud Computing, Software Testing and Quality Assurance.

Bachelor of Technology in Computer Science and Engg. – GITAM University , Hyderabad, India | (June 2019 – April 2023)

Coursework: Natural Language Processing, Neural Networks and Deep Learning, Machine Learning, Software Engineering, OOPS with Java, Programming with C

PROFESSIONAL EXPERIENCE

Software Developer -Synergy Software Solutions | (Jan 2025 – Apr 2025)

- Contributed to the development and maintenance of a real-time analytics platform, ensuring accurate documentation and adherence to architectural standards.
- Developed and deployed REST APIs in Java facilitating back-end data access and reliable model inference for dashboards.
- Automated workflows using Lambda and hosted services on EC2, demonstrating proficiency in maintaining digital workflows.
- Designed and implemented user-centered dashboards using ReactJS and Tableau, focusing on strong visualization and user-interface design to boost stakeholder engagement by 30%.

Machine Learning Research Assistant - Centella AI Therapeutics | (Aug 2022 – July 2023)

- Applied advanced data validation techniques, reducing data discrepancies by 40% through API-driven validation to ensure data quality and integrity.
- Conducted detailed domain analysis and feature engineering on molecular descriptors to support predictive insights, improving accuracy by 20%.

Software Developer Intern - Kognitive LLC | (Nov 2021 – July 2022)

- Redesigned the client-facing website using ReactJS and contemporary styling practices (CSS/Bootstrap principles), boosting user engagement by 25% and reducing bounce rates by 10%.
- Enhanced application performance and scalability by 15% using AWS services (S3, Lambda, DynamoDB), optimizing deployment and maintenance of digital solutions.
- Refined event management systems, demonstrating commitment to delivering stable, functional, and well-documented solutions.

PROJECTS

Customer Feedback Sentiment Analyzer (Guided Project) | .NET, Blazor, TensorFlow (October 2024)

- Developed a full-stack web application using ASP.NET Core and Blazor, focusing on real-time data ingestion and processing, showcasing versatility across the web stack.
- Designed and integrated a highly interactive Blazor dashboard, utilizing modern user-interface design principles to effectively visualize complex sentiment data for end-users.
- Architected the back-end via an ASP.NET Core Web API to handle concurrent data processing and ensured maintainable and scalable performance through rigorous unit testing and optimization.

Fitness & Nutrition Tracker Portal | Microsoft Power Apps & SQL Server (Implementable Design) (Ongoing)

- Designed an implementable application using **Microsoft Power Apps** to manage user profiles, track complex workout routines, and log daily food and caloric intake.
- Established a centralized data structure on a **SQL Server backend**, demonstrating expertise in designing and managing **relational databases** for tracking user progress and nutritional data.
- Implemented automated **digital workflows** (e.g., goal tracking alerts, daily summary emails) and mobile-responsive interfaces to ensure **usability** and streamline personalized member experience.

Hybrid Recommender System (Guided Project) | Python, TensorFlow, AWS SageMaker (January 2025)

- Engineered a hybrid system to optimize rating predictions by 12% by leveraging efficient data processing techniques on large-scale datasets.
- Leveraged Amazon DSSTNE to process large-scale sparse user-item interactions, improving training efficiency by 35%.

TECHNICAL PROFICIENCY

- **Programming Languages:** Python, Java, C++, SQL
- **Web & Low-Code Development:** Microsoft Power Apps, Low-Code Best Practices, UI/UX Design, HTML, CSS, Bootstrap, JavaScript, jQuery, ReactJS, ASP.NET Core, Java (Spring Boot), SQL Server (Querying/Relational DBs), REST APIs, Visual Studio.
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, SageMaker, DynamoDB), Docker, Kubernetes, Git, GitHub.
- **Data & Analytics:** Pandas, NumPy, Tableau.

CERTIFICATIONS AND WORKSHOPS

- AWS Certified Cloud Practitioner
- Basic Image Classification with TensorFlow
- Neural Networks and Deep Learning by DeepLearning.AI
