SUMMARY

Data Analyst with **4+ years** of experience delivering insights across healthcare, marketing, and infrastructure sectors. Skilled in **SQL, Python, and R** for large-scale data analysis and **ETL pipeline development**. Built interactive dashboards in **Power BI, Tableau, and QuickSight** to track **KPIs** and campaign performance across **10+ projects**. Applied **regression** and **clustering** to uncover trends and improve engagement strategies for 3 client teams. Designed scalable **ETL pipelines** and validated **EHR** and **claims data**, enhancing compliance accuracy across 4 audit cycles. **Automated data workflows** and **improved reporting efficiency** by **40%**, enabling data-driven decisions through **advanced analytics and visualization**.

PROFESSIONAL EXPERIENCE

Data Analyst | Paul Fredrick MenStyle| USA

June 2024 – Present

- Created a unified campaign dashboard by **using Power BI**, enabling performance monitoring across 7 product categories and saving **12 hours of manual reporting each week**.
- Queried 500K+ purchase records using **CTE-based SQL** in BigQuery, streamlining daily data loads to support accurate reporting across 7 product categories.
- Constructed a **Python ETL pipeline** to integrate inventory and sales feeds from **3 systems**, applying schema validation rules and automating daily loads via cron, saving **20+ analyst hours** monthly.
- Integrated event-level data from GA4 by **transforming JSON schemas** into structured tables, resolving alignment issues across **3 analytics platforms**.
- Validated campaign metrics by reconciling **vendor spreadsheets** with internal sales data in **Excel**, identifying discrepancies and improving dashboard accuracy across **6 regional units**.
- Collaborated with internal marketing and data engineering teams to validate and integrate **multi-source campaign datasets**, ensuring end-to-end data consistency.

Data Analyst Intern | Molina Healthcare| USA

February 2024 – May 2024

- Analyzed care coordination data by **using Power BI** to build visual summaries of service gaps, enabling clinical teams to identify and address **120+ high-risk patient cases** during the pilot period.
- Queried EHR and claims records by **writing validation scripts in SQL**, detecting **35 data mismatches** and improving HEDIS reporting accuracy for compliance submissions.
- Optimized **PostgreSQL** queries and streamlined slow-running datasets, reducing analytics turnaround time by 2.6 hours weekly for operations teams.
- Structured unorganized patient outreach data into audit-ready **CSVs** using **Python** and **Excel**, accelerating CMS compliance readiness across **4 reporting cycles**.

Data Analyst Intern | McKesson | USA

August 2023 – December 2023

- Designed oncology distribution dashboards in **PowerBI**, presenting prescription movement trends across **4 U.S. territories** to assist demand planning for over 85 cancer drug products.
- Analyzed patient refill adherence in **PostgreSQL** and joined prescription logs with behavioral attributes to uncover **churn clusters** used for targeted outreach planning across **3 territories**.
- Automated recurring report generation by **developing Excel macros**, minimizing repetitive data prep and saving **48 analyst hours each quarter**.
- Applied association rule mining techniques using **Python and SQL** on prescription datasets to uncover 10+ frequent drug pairings, informing bundling strategies in 3 retail campaigns across regional pharmacy outlets.

Data Analyst | Adani | India

June 2020 – December 2021

- Built **AWS QuickSight** dashboards for **85+ power infrastructure** assets, visualizing uptime ratios, maintenance gaps, and consumption variance across 4 regional grids
- Developed **Python forecasting models** and performed **statistical analysis** on historical energy data to **predict demand**, identify cost-saving opportunities, and support resource planning.
- Developed **PL/SQL** procedures to calculate energy loss factors and reconcile meter data with plant-level **SCADA** inputs, enabling root cause analysis for billing discrepancies.
- Automated ingestion workflows using **Python and Pandas** to standardize **10+ Oracle** exports and regional logs into structured reporting datasets, reducing manual data prep time by 6–8 hours per month for monthly dashboard updates.
- Engineered Athena-backed **data lake architecture** on **AWS S3**, indexing daily shipment and equipment logs to support **audit-ready** energy compliance reporting.
- Integrated **Python scripts** to **monitor key service metrics** across 3 renewable portfolios, reducing reporting lag in **monthly dashboards** and supporting accurate compliance reviews for 20+ grid-linked assets.

PROJECTS

Sentiment Analysis & Clustering – Movie Review Dataset (Python, EDA, Feature Engineering, Power BI)

- Developed a Python-based sentiment classification model using Scikit-learn, achieving 80% accuracy on 5,000+ labeled reviews. Applied K-means++ to cluster reviews into 50 sentiment-based groups and optimized model performance using GridSearchCV. Visualized clustering and sentiment patterns through interactive Power BI dashboards.

Predictive Analytics – Customer Buying Behavior Analysis (Python, Hypothesis Testing, Random Forest)

- Analyzed 100,000+ customer transactions using Python, Pandas, and hypothesis testing to uncover purchasing trends and inform pricing strategies. Built a Random Forest model with 90% accuracy to predict churn, identifying 20% higher attrition among high-power users and guiding targeted retention efforts.

TECHNICAL SKILLS

- **Languages & Scripting:** Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Regex), SQL (T-SQL, PL/SQL), R, SAS, VBA (Excel)
- **Analytics & Statistics:** Regression (Linear, Logistic), Classification, Forecasting, A/B Testing, Hypothesis Testing, Clustering, Churn Analysis, Market Basket Analysis, Feature Engineering, Sentiment Analysis, Predictive Modeling, Time Series Analysis, EDA, Statistical Data Analysis
- **Visualization Tools:** Microsoft Power BI (DAX, Power Query), Tableau, AWS QuickSight, Looker, Qlik Sense, Excel Dashboards(Pivot Tables,Power Pivot, Macros, VBA), Performance Dashboards, Data Visualization
- **Cloud & Data Platforms:** AWS (S3, EC2, Lambda, RDS, Athena, Glue, Redshift), Azure (ADF, Synapse, Databricks), GCP (BigQuery), ServiceNow, SharePoint
- **Databases:** MySQL, PostgreSQL, Oracle, MongoDB, PrestoDB, Snowflake, SQL Server Management Studio, Workday
- **ETL & Data Engineering:** SSIS, Alteryx, Python ETL, APIs, JSON Flattening, Data Warehousing (Star/Snowflake Schema), Data Modeling, Data Governance, Data Validation,Data Cleaning, Data Pipelines, Data Extraction
- **Tools & IDEs:** Jupyter Notebook, PyCharm, VS Code, Git, SQL Workbench, SnowSQL, Jira, Confluence
- **Business & Healthcare Analytics:** Clinical Data Management, Business Intelligence (BI), Business Requirements, Business Analysis, Healthcare Data Analysis

EDUCATION

University of Maryland | Baltimore County, USA

January 2022 – December 2023

Master of Science in Engineering Management, Specialization: Data Science

Savitribai Phule Pune University | India

July 2017 – September 2020

Bachelor of Technology in Electrical Engineering

CERTIFICATIONS

- **Microsoft Certified: Power BI Data Analyst Associate PL-300**
- **Amperity Certified Data Grid Operator**
- **Certified ScrumMaster®(CSM®)- Scrum Alliance**
- **Lean Six Sigma Green Belt Certification- Six Sigma Institute**
- **Supply Chain Foundations – Project Management Institute**
