EXPERIENCE

Ipserlab

Product Business Analyst

May 2024 – Present

Mountain View, CA

- **Product Strategy and Vision:** Evaluated user requirements, industry trends and competitor insights through market research and strategic analysis, driving product requirements for a video conferencing platform.
- **Product Development:** Uplifted development velocity by 15% through leading product backlog refinement and prioritizing features, based on drafting user stories and requirements in PRD's, with a strong focus on user experience (UX).
- **Product Testing:** Accomplished a 25% increase in user engagement by conducting A/B testing to evaluate feature performance.
- **Product Management:** Improved product usability and engagement by 20% using XML and Figma to simulate user flows and design prototypes, ensuring alignment with business goals.

Ernst & Young

Business Analyst

Apr 2021 – Jul 2023

Gurugram, India

- **Business Requirements:** Collaborated with banking & financial clients to assess 20+ business processes for RPA automation, leading requirement gathering and BRD creation while coordinating functional design, process mapping, testing, and support.
- **Process Improvement:** Reduced processing days by 40% using Celonis to identify bottlenecks and performing root cause analysis, accelerating project delivery and aligning with business goals.
- **User Acceptance Testing (UAT):** Achieved an acceptance rate above 90% through effective end-to-end testing.
- **Dashboard Development:** Improved ROI for banks by 25% by developing Power BI/Tableau and Excel dashboards to track key business metrics, enabling faster data-driven decision-making.
- **Project Management:** Accomplished Agile project milestones using MS Project Plan and Charter, overseeing automation initiatives that delivered \$500K in cost budget savings, 50% faster transactions, and 90% fewer errors.
- **Risk Mitigation:** Reduced project risks by 30% through various risk mitigation strategies and ensured smooth transitions. Ensured adherence to banking regulations by automating compliance checks, AML monitoring, and regulatory reporting.

Cognizant Technology Solutions

Salesforce Business Analyst

Jul 2020 – Apr 2021

Bengaluru, India

- **Process Mapping:** Enhanced workflow efficiency by 25% by maintaining Salesforce solution documentation for a healthcare client, covering 15+ process flows and data models, while collaborating with the design team.
- **System Configuration and Customization:** Optimized system functionality and user experience by 30% by configuring Salesforce solutions and implementing over 20 workflow rules and custom objects in partnership with developers.

Salesforce Analyst Intern

Feb 2020 – Jun 2020

- Gained hands-on Salesforce experience; documented functional specifications of 10+ healthcare processes and launched a fundraising website.

ACADEMIC PROJECTS

PrecisionLend: Intelligent Loan Approval System | Python, Data Mining

Mar 2024 – May 2024

- Addressed loan eligibility for 7,000+ applicants using Logistic Regression and Decision Tree, enhancing predictions with data transformation.
- Attained a 40% improvement in data accuracy, reduced errors by 25%, and attained an overall model accuracy of 85%, minimizing risks for lenders.

Wine Quality Prediction | Python, Data Mining

Mar 2024 – May 2024

- Enhanced wine quality predictions by preprocessing 5,000+ records through ETL, normalization, feature selection and statistical model building, improving model accuracy by 15% while visualizing key patterns.
- Engineered Decision Trees and Random Forests with 80% precision, 75% recall, and 82% accuracy, enabling quality improvements for winemakers.
