

SAKSHITH REDDY KASMOLA

skasmola@asu.edu | Tempe, AZ | (602) 580-5051 | [linkedin](#)

PROFILE SUMMARY

Highly motivated Full-Stack Developer with a strong command of JavaScript, React.js, Node.js, and Python. Proven ability to deliver high-quality, scalable solutions by expertly designing responsive user interfaces, developing robust APIs, and managing databases. Eager to leverage a diverse technical skill set to lead projects and solve complex problems in a collaborative environment.

EDUCATION

- **Master in Software Engineering** | Arizona State University | Arizona, USA **Aug 2022 – May 2024**
Key courses – Advanced Data Structures and Algorithms, Mobile Development, Data Science for Software Engineers.
- **Bachelor's in Information Technology** | Jawaharlal Nehru Technological University | India **Jul 2017 – July 2021**
Key courses – Object Oriented Programming, Web Technologies, Design and Analysis of Algorithms.

SKILLS

Python | Java | C++ | JavaScript | TypeScript | C | Go | HTML | CSS | Bash | React.js | Next.js | Node.js | Express.js | Django | Spring | Bootstrap | Material UI | Redux | TailwindCSS | Terraform | Git | Docker | Kafka | AWS (EC2, S3, Glue, Lambda) | MySQL | PostgreSQL | MongoDB | AEM

EXPERIENCE

Application Engineer Intern | University of Phoenix, Arizona, USA **May 2025 – Aug 2025**

- Revamped **jump logic** for the NAE application, ensuring a consistent **90/10** ratio between loan takers and non-loan takers.
- Automated monthly SFTP file uploads using AWS Glue, Terraform, and Spacelift, **reducing manual work by 80%**.
- Achieved **2nd place** in the intern hackathon for building a **Retrieval-Augmented Generation (RAG)** chatbot that answered common student queries, recognized for best collaboration.
- Developed and deployed **ADA-compliant B2B employer landing pages** using Adobe Experience Manager (AEM), ensuring accessibility standards and delivering optimized user experience for two major clients.

Full Stack Engineer Intern | Lynor.ai, Remote, USA

Jan 2025 – May 2025

- Devised RESTful APIs in Python for job application management, enabling candidate–job mapping and improving **tracking efficiency by 30%**.
- Architected a **job listings portal** with end-to-end functionality, allowing candidates to search, filter, and apply for positions.
- Built the **frontend dashboard** for an AI-powered HR application, enabling recruiters to review applications, view **AI scoring results**, and access detailed candidate insights.

Backend Engineer Intern | Flow, Remote, USA

Jun 2024 – Jan 2025

- Engineered and deployed an Internal HR backend on Hetzner Cloud with **Nginx** and **Gunicorn**, enabling secure job management and integration with Flow's careers website.
- Built a **JWT** token-based authentication system for user registration and account portal management, ensuring secure access to Flow products.
- Integrated **Salesforce CRM** with custom APIs and front-end forms, streamlining lead capture and enhancing marketing insights.

Software Engineer Intern | FocusAI, Sunnyvale, USA

May 2023 – Dec 2023

- Innovatively designed an **archival service** that enables users to securely store and retrieve footage from specific timeframes, enhancing data accessibility and retention, while presenting stored content in a user-friendly manner.
- Orchestrated the integration of **Google Maps services** into the application, elevating user experience by enabling effortless address selection directly from the map interface.
- Involved in improvising and upgrading the front-end of a SaaS web application, offering real-time camera monitoring for registered users.

Programmer Analyst Trainee | Cognizant, Hyderabad, India

Jan 2021 – Jul 2022

- Played a key role in transforming an existing online pharmacy application, enabling users to subscribe, prescribe, and refill drugs using **Spring MVC and JDBC**.
- Optimized **REST APIs** to enable auto-ordering of drugs in the cart, improving response time by **30%**. Collaborated in **Agile sprint planning** to expand project roadmaps and timelines.

ACADEMIC PROJECTS

Full Stack Blog Application

- Led the development of responsive UI utilizing React.js and implemented dynamic routing with **react-router-dom**.
- Formulated REST APIs using **Node & Express.js**, incorporating user authentication and middleware to enhance data security and **decrease error rates by 20%**.
- Oversaw the creation of MongoDB schemas and executed CRUD operations with mongoose.

Privacy Recommender Mobile Application

- Created and developed an Android mobile application using **Expo**, with integrated user authentication through **Google Firebase**.
- Implemented **Bluetooth Low Energy (BLE)** detection utilizing the **Triangulation method**, resulting in a **30% improvement** in BLE detection accuracy.
- Proposed and implemented **mitigation strategies** based on user proximity to detected sensors to enhance overall user safety.

Netflix Stock Price Prediction Using Regression and LSTM Models

- Engineered and fine-tuned multiple models, including **LSTM**, for accurate **Netflix stock price prediction** using historical data and market indicators, showcasing superior performance through comparative analysis.
- Conducted comprehensive **data collection, preprocessing, and exploratory analysis** of Netflix stock prices from Yahoo Finance, utilizing advanced **visualization techniques** to identify key trends and relationships.
- Implemented and evaluated LSTM and other machine learning models, demonstrating the suitability of LSTM for **time series forecasting** and highlighting its advantages over conventional models.

CERTIFICATIONS

AWS Certified AI Practitioner | LangSmith and LangGraph from LangChain Academy.
