EXECUTIVE SUMMARY

Results-oriented scientist with experience in a wide-range of techniques including computational modeling and wet chemistry methods. Highly skilled in GxP laboratory documentation procedures and building relationships both internally and cross-functionality to achieve a respectful and collaborative work environment. Motivated to be part of a team that fosters a continuous learning culture.

EDUCATION

M.S. in Computer Science

Wilmington University, Wilmington, DE

Summer 2025

B.S. in Biotechnology

Wilmington University, Wilmington, DE

Fall 2021

A.S. in Business Administration

Camden County College, Camden, NJ

Spring 2020

BACKGROUND SUMMARY

High-energy scientist with experience in:

- GxP and non-GxP compliance environments
- R | Python | Rstudio | PostgreSQL | Jupyter | GIS
- ELN, lab equipment software, LIMS
- Chromatography techniques and instrumentation, HPLC, GC
- In-Process routine bioanalytical techniques
- EPA/NSF sampling and analytical methodologies
- Spectrophotometry; Turbidimetry; Metrology; Liquid-Liquid Extractions ; High Pressure Extractions
- Gravimetric and volumetric analysis; metrology; reference and working standards
- Biosafety: Level 2+ (double glove, disposable lab coats, etc.)
- Microsoft Office Suite of software (WORD, EXCEL, PowerPoint)

PROFESSIONAL EXPERIENCE

Scientist, Johnson & Johnson, **contracted** through Randstad US , Malvern, PA

JANUARY 2022 - FEBRUARY 2024

- Expertise in Empower, Biovia software
- Working and troubleshooting knowledge of chromatography instrumentation such as HPLC using UV/Vis (all spectrum) detectors and various types of analysis such as, size, ion and hydrophobic interactions, to quantify antibodies in therapeutic applications.
- Working knowledge of techniques used to quantify properties of antibodies including: capillary isoelectric focusing via iCE, spectrophotometric analysis via variable path lengths, impurities analysis using Gas Chromatography and particle assays via ProteinSimples's microflow digital analysis.
- Collaboration with other groups in Janssen's R&D, with a focus in monoclonal, bi- and tri-specific antibodies in gene therapy
- Assisted in implementation and trained other scientists on a new process for documenting, in collaboration with a new high throughput method of data transfer.
- GxP method documentation to non-GxP guidance documentation writing.
- Assisted in a Co-Op collaboration project, focusing on a new approach to 2MEA analysis by HPLC.

Laboratory Technician, Lab Street, Narberth, PA

JULY 2021- FEBRUARY 2022

- Digestion of lead samples with the use of nitric acid via HotBlock.
- Spectroscopic analysis of lead via Flame AA.
- Prepared standards and quality control solutions/ maintained records for current regulations.
- Maintained lab equipment and lab area.

Analytical Associate, Quality Filter Testing, Williamstown, NJ

OCTOBER 2020 – JANUARY 2021

- Write and evaluate reports and data sheets.
- Supported the analytical teams in the isolation and spectroscopic characterization of organic and inorganic impurities in water by means of HPLC-MS/MS, ICP-MS, LC & GC.
- Performed independent tests per SOPs, EPA methods and quality control procedures.

VOLUNTEER EXPERIENCE

Science Olympiad, Camden County College, NJ

2020

HERITAGE CONSERVANCY, BUCKS COUNTY, PA

2024- PRESENT
