

Samarendra Pitta Software Developer

samarendra@myworkmails.com | (216)-303-5671 | USA | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Experienced Software Developer with 5 years of experience in designing, developing, and maintaining scalable and efficient software solutions. Proficient in full-stack development with expertise in Java, JavaScript, and modern frameworks like React and Spring Boot. Strong background in database management, cloud services, containerization, and CI/CD automation. Adept at working in Agile environments, collaborating with cross-functional teams, and implementing best practices to enhance performance, security, and user experience. Committed to delivering high-quality software through continuous testing and optimization.

Technical Skills

- **Programming Languages:** Java, Python, C, JavaScript, TypeScript
- **Frontend Technologies:** React.js, Redux, HTML, CSS, AJAX
- **Backend Technologies:** Spring Boot, Spring Data JPA, Spring Security, Maven, Node.js, JDBC, J2EE, Spring MVC, ASP.NET
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis, Cassandra
- **Cloud, DevOps & CI/CD:** AWS (EC2, S3, CodePipeline, CloudWatch), Docker, Kubernetes, Jenkins, Git, GitHub, Load Balancing
- **Testing & Quality Assurance:** JUnit, Mockito, Selenium, Postman, TDD, A/B Testing
- **Messaging & Monitoring:** Apache Kafka, RabbitMQ, Prometheus, Grafana, Splunk, JProfiler, Infor ION Dashboards
- **System Design & Architecture:** Distributed Systems, Object-Oriented Design (OOD), Data Structures and Algorithms, Microservices, Event-Driven Architecture, Agile (Scrum, Kanban, SDLC)

Professional Experience

Software Developer, *Betterment*

10/2024 – Present | Remote, USA

- Collaborated with product owners, UX designers, and financial analysts at Betterment to gather requirements and create detailed user stories for the React-based Financial Goal Tracker. Followed **Agile** methodologies, improving sprint delivery velocity by 20%.
- Build interactive React components, with a **goal creation wizard** and progress visualization dashboards. Managed complex state with **Redux** and executed **A/B testing** to optimize user experience, increasing engagement by 15% across target customer segments.
- Designed and optimized AWS-hosted **PostgreSQL** databases for efficient financial goal data management. Implemented data encryption and query optimization strategies, resulting in a 25% improvement in response times and enhanced security compliance.
- Build scalable **Spring Boot microservices** to calculate savings projections, recommend monthly contributions, and integrate real-time investment account data. Developed notification engines using **Spring Scheduler** and implemented role-based access control for advisors and clients.
- Achieved 85% test coverage with unit and integration tests using **JUnit** and **Mockito**. Automated CI/CD pipelines with AWS CodePipeline and collaborated with DevOps engineers to deploy on AWS ECS, ensuring 99.9% uptime and seamless autoscaling.

Software Engineer, *Infor*

08/2021 – 06/2023 | Hyderabad, India

- Designed scalable **ERP** modules using **Java**, **Spring Boot**, and **PL/SQL**, optimizing logic and database access patterns to reduce API response times by 30%, improving overall system efficiency and performance significantly.
- Implemented secure **microservice authentication** with **Spring Security**, **OAuth 2.0**, and **JWT tokens**, ensuring compliance with enterprise security standards and enabling scalable **role-based access control** across ERP ecosystems.
- Designed and integrated **RESTful & SOAP APIs** with **Spring Boot** and **Apache CXF**, enabling seamless ERP module interoperability and third-party system integrations; boosted API throughput by 50% via **Redis caching** and **async processing**.
- Automated integration and regression testing with JUnit, Mockito, and Postman, embedding these tests into the CI/CD pipeline and leveraging **Infor OS / ION deployment workflows**, resulting in a 40% reduction in post-release defects and **faster deployment cycles**.
- Integrated **Kafka** data bus for real-time data processing, reducing message latency by 30%, and used Docker and Kubernetes for containerization and orchestration, improving deployment consistency and auto-scaling capabilities.
- Built monitoring pipelines with **AWS CloudWatch**, **Prometheus**, and **Grafana**, integrated into Infor ION dashboards, enabling performance tracking and reducing mean time to recovery (MTTR) by 20%.
- Collaborated with cross-functional teams including analysts, QA, and DevOps to align ERP customizations with evolving business needs, leading to a 20% increase in system adoption and user satisfaction.

Full Stack Developer, *Smart Nuts and Bolts India*

06/2019 – 08/2021 | India

- Developed a full-stack eCommerce platform using **React.js**, **Node.js**, REST APIs, and SQL, ensuring responsive and seamless user experience across devices with optimized frontend and backend integration.
- Developed REST APIs in Node.js to automate invoice delivery, streamlining transactional email workflows and reducing manual efforts by 60%. Integrated **Jenkins**-based CI/CD pipelines to automate deployments, cutting release delays by 40% and improving time-to-market for internal tools.
- Identified and resolved latency issues in product and order APIs by optimizing backend logic, SQL queries, and frontend sync bugs, improving data retrieval time by 35% and ensuring smoother page loads and user experience.

Education

Master of Science in Computer Science
Cleveland State University - Cleveland, OH, USA
Bachelor of Engineering in Computer Science
Sri Venkateswara University - Tirupati, India

08/2023 – 05/2025

07/2017 – 07/2021
